Although nonaccrual and classified loans have increased, they remain below historical averages. Through the Bank's ongoing portfolio review processes and active management, we have not identified any evidence of systemic risk," explained Rick Smith, President and Chief Executive Officer. Peter Wiese, EVP and Chief Financial Officer added, "As deposit balances grew and repayment of principal from the investment security portfolio accelerated, excess proceeds were utilized to reduce the balance and costs associated with short-term borrowing. As we look to the second half of 2023, margin preservation and expense control will be our focused priorities."

Loans outstanding increased by $\$ 98.3$ million or $6.1 \%$ on an annualized basis during the quarter ended June 30, 2023. During the quarter, loan originations/draws totaled approximately $\$ 456.0$ million while payoffs/repayments of loans totaled $\$ 356.0$ million, which compares to originations/draws and payoffs/repayments during the trailing quarter ended of $\$ 357.0$ million and $\$ 389.0$ million, respectively. Management continues to believe that the current loan pipeline is sufficient to support the Company's objectives. Investment security balances decreased $\$ 92.4$ million or $14.3 \%$ on an annualized basis as the result of net prepayments, maturities, and purchases totaling approximating $\$ 75.2$ million and net decreases in the market value of securities of $\$ 16.9$ million. Management seeks to utilize excess cash flows from the investment security portfolio to support loan growth or reduce borrowings thus resulting in an improved mix of earning assets. Deposit balances increased by $\$ 69.5$ million or $3.5 \%$ annualized during the period. Net cash flow surpluses during the quarter resulted in a net decrease of $\$ 41.4$ million in short-term borrowings, which totaled $\$ 392.7$ million as of the period ended June 30, 2023.

Loans may be acquired at a premium or discount to par value, in which case, the premium is amortized (subtracted from) or the discount is accreted (added to) interest income over the remaining life of the loan. The dollar impact of loan discount accretion and loan premium amortization decrease as the purchased loans mature or pay off early. Upon the early pay off of a loan, any remaining unaccreted discount or unamortized premium is immediately taken into interest income; and as loan payoffs may vary significantly from quarter to quarter, so may the impact of discount accretion and premium amortization on interest income. As a result of the increase in interest rates, the prepayment rate of portfolio loans, inclusive of those acquired at a premium or discount, declined during 2023 as compared to 2022. During the three months ended June 30, 2023, March 31, 2023, and June 30, 2022, purchased loan discount accretion was $\$ 1.5$ million, $\$ 1.4$ million, and $\$ 1.7$ million, respectively.

The following table shows the components of net interest income and net interest margin on a fully tax-equivalent (FTE) basis for the quarterly periods indicated:

(1) Fully taxable equivalent (FTE). All yields and rates are calculated using specific day counts for the period and year as applicable.
(2) Net interest spread is the average yield earned on interest-earning assets minus the average rate paid on interest-bearing liabilities.
(3) Net interest margin is computed by calculating the difference between interest income and interest expense, divided by the average balance of interest-earning assets.

Net interest income (FTE) during the three months ended June 30, 2023, decreased $\$ 4.7$ million or $5.1 \%$ to $\$ 89.0$ million compared to $\$ 93.7$ million during the three months ended March 31, 2023. In addition, net interest margin declined 25 basis points to $3.96 \%$, compared to the trailing quarter. The decrease in net interest income is primarily attributed to an additional $\$ 6.3$ million in deposit interest expense and $\$ 2.6$ million in additional interest expense on other borrowings, both due to increases in interest rates as compared to the trailing quarter. As a partial offset, total interest income also increased as compared to the trailing quarter, up $\$ 4.3$ million or $4.1 \%$.

As compared to the same quarter in the prior year, average loan yields, excluding PPP, increased 68 basis points from $4.70 \%$ during the three months ended June 30, 2022, to $5.38 \%$ during the three months ended June 30, 2023. The accretion of discounts from acquired loans added 9 and 11 basis points to loan yields during the quarters ended June 30, 2023 and June 30, 2022, respectively.

The rates paid on interest bearing deposits increased by 52 basis points during the quarter ended June 30, 2023, compared to the trailing quarter. The cost of interest-bearing deposits increased by 88 basis points between the quarter ended June 30, 2023, and the same quarter of the prior year. In addition, the average balance of noninterest-bearing deposits decreased by $\$ 244.1$ million quarter over quarter. As of June 30, 2023, the ratio of average total noninterest-bearing deposits to total average deposits was $39.2 \%$, as compared to $41.0 \%$ and $41.2 \%$ at March 31, 2023 and June 30, 2022, respectively.

## Interest Rates and Earning Asset Composition

During the quarter ended June 30, 2023, market interest rates, including many rates that serve as reference indices for variable rate loans and investment securities continued to increase. As noted above, these rate increases have continued to benefit growth in total interest income. As of June 30, 2023, the Company's loan portfolio consisted of approximately $\$ 6.5$ billion in outstanding principal with a weighted average coupon rate of $5.15 \%$. During the three-month periods ending June 30, 2023, March 31, 2023, and December 31, 2022, the weighted average coupon on loan production in the quarter was $6.85 \%, 6.71 \%$, and $6.05 \%$, respectively. Included in the June 30, 2023 loan total are adjustable rate loans totaling $\$ 3.8$ billion, of which, $\$ 859.9$ million are considered floating based on the Wall Street Prime index. In addition, the Company holds certain investment securities with fair values totaling $\$ 375.5$ million which are subject to repricing on not less than a quarterly basis.

## Asset Quality and Credit Loss Provisioning

During the three months ended June 30, 2023, the Company recorded a provision for credit losses of $\$ 9.7$ million, as compared to $\$ 4.2$ million during the trailing quarter, and $\$ 2.1$ million during the first quarter of 2022.

The following table presents details of the provision for credit losses for the periods indicated:

| (dollars in thousands) | Three months ended |  |  |  | Six months ended |  |  |  |

The following table presents the activity in the allowance for credit losses on loans for the periods indicated:

| Balance, end of period | \$ | 117,329 | \$ | 97,944 | \$ | 117,329 | \$ | 97,944 |

The allowance for credit losses (ACL) was $\$ 117.3$ million as of June 30, 2023, a net increase of $\$ 8.9$ million over the immediately preceding quarter. The provision for credit losses of $\$ 9.0$ million during the recent quarter was the net effect of increases in required reserves due to individually analyzed credits, qualitative factors, and quantitative reserves under the cohort model. On a comparative basis, the provision for credit losses of $\$ 1.9$ million during the three months ended June 30, 2022, was largely the result of loan growth in the period. For the current quarter, the qualitative components of the ACL resulted in a net increase in required reserves totaling approximately $\$ 2.9$ million due to softening of the California employment data, and increase in the corporate debt yields. Meanwhile, the quantitative component of the ACL increased reserve requirements by approximately $\$ 6.0$ million over the trailing quarter primarily due to increases in specific reserves.

The Company utilizes a forecast period of approximately eight quarters and obtains the forecast data from publicly available sources as of the balance sheet date. This forecast data continues to evolve and includes improving shifts in the magnitude of changes for both the unemployment and GDP factors leading up to the balance sheet date, particularly CA unemployment trends. Despite continued declines on a year over year comparative basis, core inflation remains elevated from wage pressures, and higher living costs such as housing and food prices. Management notes the rapid intervals of rate increases by the Federal Reserve and flattening or inversion of the yield curve, have informed expectations of the US entering a recession within 12 months. As a result, management continues to believe that certain credit weaknesses are likely present in the overall economy and that it is appropriate to cautiously maintain a reserve level that incorporates such risk factors.
Loans past due 30 days or more increased by $\$ 1.6$ million during the quarter ended June 30,2023 , to $\$ 9.5$ million, as compared to $\$ 7.9$ million at March 31, 2023. Non-performing loans were $\$ 37.6$ million at June 30, 2023, an increase of $\$ 21.6$ million from $\$ 16.0$ million as of March 31, 2023, and an increase of $\$ 25.7$ million from $\$ 11.9$ million as of June 30, 2022. The current quarter increase in nonperforming assets is nearly entirely attributed to a single relationship. Of the $\$ 37.6$ million loans designated as non-performing as of June 30, 2023, approximately $\$ 31.7$ million are current with respect to payments required under their original loan agreements.

The following table illustrates the total loans by risk rating and their respective percentage of total loans for the periods presented:

The ratio of classified loans of $1.00 \%$ as of June 30, 2023, remained consistent with the trailing quarter, but increased by 23 basis points from June 30, 2022. The Company's criticized loan balances increased during the current quarter by $\$ 31.4$ million to $\$ 220.8$ million as of June 30, 2023. The recent increase in special mention loans as a percentage of total loans outstanding is consistent with volumes experienced prior to the recent quantitative easing cycle spurred by the COVID pandemic and reflects management's historically conservative approach to credit risk monitoring. The newly criticized special mention loans are spread amongst a handful of relationships, with diversity amongst geographies and collateral types.

There were no properties added or disposed within Other Real Estate Owned during the second quarter of 2023. Total write-downs of $\$ 0.5$ million were incurred during the current quarter across four properties. As of June 30, 2023, other real estate owned consisted of nine properties with a carrying value of approximately $\$ 2.9$ million.

Non-performing assets of $\$ 40.5$ million at June 30, 2023, represented $0.41 \%$ of total assets, a change from the $\$ 19.5$ million or $0.20 \%$ and $\$ 15.3$ million or $0.15 \%$ as of March 31, 2023 and June 30, 2022, respectively.

In addition to the allowance for credit losses above, the Company has acquired various performing loans whose fair value as of the acquisition date was determined to be less than the principal balance owed on those loans. This difference represents the collective discount of credit, interest rate and liquidity measurements which is expected to be amortized over the life of the loans. As of June 30, 2023, the unamortized discount associated with acquired loans totaled $\$ 27.6$ million.

## Non-interest Income

The following table presents the key components of non-interest income for the current and trailing quarterly periods indicated:

Total salaries and benefits expense increased by $\$ 2.2$ million or $6.6 \%$, led by $\$ 1.5$ million of growth in incentive compensation expense related to the achievement of certain loan and deposit volume targets and a $\$ 1.1$ million or $4.6 \%$ increase in salaries which were primarily driven by Company-wide merit increases which became effective in late March of this year. Data processing and software expenses increased by $\$ 0.6$ million or $15.0 \%$ related to ongoing investments in the Company's data management and security infrastructure. Advertising costs increased $\$ 0.3$ million or $33.9 \%$ during the quarter, connected to an increase in media advertising for promotional campaigns. Regulatory assessments increased $\$ 1.2$ million or $151.6 \%$ during the quarter as a result of increases in assessment rates. Management estimates that the near-term future quarterly run rate of these regulatory assessment expenses will be approximately $\$ 1.75$ million per quarter, but anticipates that these costs will increase further if the economic environment in which the Company operates continues to deteriorate. The Company does not anticipate that it will be subject to the recently announced special assessments as its total uninsured deposits do not exceed $\$ 5.0$ billion. Operational losses also increased by $\$ 0.7$ million or $150.6 \%$, primarily as a result of burglary at several ATM machines. Other miscellaneous expenses increased $\$ 1.7$ million or $49.3 \%$, due primarily to changes in regulatory requirements which is expected to result in an estimated $\$ 0.8$ million in refunds to customers previously charged non-sufficient funds fees and an additional increase of $\$ 0.5$ million in provision expense on real estate owned and various other increases across the Company, including travel and entertainment costs.

## Provision for Income Taxes

The Company's effective tax rate was $25.6 \%$ for the quarter ended June 30, 2023, as compared to $26.8 \%$ for the period ended March 31,2023 , and $28.1 \%$ for the year ended December 31, 2022. ## TRICO BANCSHARES—NON-GAAP FINANCIAL MEASURES

(Unaudited. Dollars in thousands)
In addition to results presented in accordance with generally accepted accounting principles in the United States of America (GAAP), this press release contains certain non-GAAP financial measures. Management has presented these non-GAAP financial measures in this press release because it believes that they provide useful and comparative information to assess trends in the Company's core operations reflected in the current quarter's results and facilitate the comparison of our performance with the performance of our peers. However, these non-GAAP financial measures are supplemental and are not a substitute for any analysis based on GAAP. Where applicable, comparable earnings information using GAAP financial measures is also presented. Because not all companies use the same calculations, our presentation may not be comparable to other similarly titled measures as calculated by other companies. For a reconciliation of these non-GAAP financial measures, see the tables below:
