ANALYSIS OF CHANGE IN NET INTEREST MARGIN ON EARNING ASSETS (unaudited. dollars in thousands)

Net interest income (FTE) during the three months ended September 30, 2013 increased \$774,000 (3.0%) from the same period in 2012 to \$26,470,000. The increase in net interest income (FTE) was primarily due to increased loan and investment balances that were funded by reducing lower yielding cash at the Federal Reserve Bank. A decrease in the average balance of other borrowings also helped to increase net interest income from the year-ago quarter. Average loan and investment balances increased \$61,690,000 (3.9%) and \$65,199,000 (31.7%), respectively, and added \$1,001,000 and \$605,000 to net interest income, respectively, when compared to the year-ago quarter. Included in the increase in average loan balances was the effect of the purchase of \$60,647,000 of residential real estate loans in the quarter ended June 30, 2013. The increase in the average balance of investments was due to the Company's decision to deploy some of its excess cash at the Federal Reserve Bank into higher yielding investments during the quarters ended June 30 and September 30, 2013. The average balance of other borrowings decreased \$34,158,000 (81.6%) as the Company paid off a \$50,000,000 borrowing on August 30,2012, and this reduction in other borrowings added \$323,000 to net interest income when compared to the year-ago quarter. These favorable changes in asset and liability balances were partially offset by a 35 basis point decrease in the average yield on loans to 6.14% that decreased net interest income by \$1,408,000 when compared to the year-ago quarter. The decrease in loan yields from the year-ago quarter is due mainly to the repricing of existing loans and the origination of new loans at current market yields that are lower than the yields that existed at earlier repricing and origination dates. Accretion of loan purchase discounts totaling \$2,153,000 and \$1,807,000 are included in net interest income for the three months ended September 30, 2013 and 2012, respectively. Decreases in rates paid for all categories of interest bearing liabilities added \$292,000 to net interest income when compared to the year-ago quarter.

Loans acquired through purchase or acquisition of other banks are classified as Purchased Not Credit Impaired (PNCI), Purchased Credit Impaired – cash basis (PCI – cash basis), or Purchased Credit Impaired – other (PCI – other). Loans not acquired in an acquisition or otherwise "purchased" are classified as "originated". Often, such purchased loans are purchased at a discount to face value, and part of this discount is accreted into (added to) interest income over the remaining life of the loan. Generally, as time goes on, the effect of this discount accretion becomes less and less as these purchased loans mature or payoff early. Further details regarding interest income from loans, including fair value discount accretion, may be found under the heading "Supplemental Loan Interest Income Data" in the Consolidated Financial Data table at the end of this announcement.

The Company benefited from a \$393,000 reversal of provision for loan losses in the third quarter of 2013 versus a provision for loan losses of \$532,000 in the third quarter of 2012. The level of provision for loan losses during the third quarter of 2013 was due primarily to a decrease in the required allowance for loan losses as of September 30, 2013 when compared to the required allowance for loan losses as of June 30, 2013 less net charge-offs during the three months ended September 30, 2013. The decrease in the required allowance for loan losses during the quarter ended September 30, 2013 was due primarily to reduced impaired loans, improvements in estimated cash flows and collateral values for the remaining and newly impaired loans, and reductions in historical loss factors that, in part, determine the required loan loss allowance for performing loans in accordance with the Company's allowance for loan losses methodology.

The following table presents the key components of noninterest income for the periods indicated:

	Three month	ns ended		
	Septemb	er 30,		
(dollars in thousands)	2013	2012	\$ Change	% Change
Service charges on deposit accounts	3,353	3,617	(\$264)	(7.3%)

Change in value of mortgage servicing rights	181	(681)	862	(126.6%)
Total service charges and fees	6,662	5,783	879	15.2%
Gain on sale of loans	1,083	1,430	(347)	(24.3%)
Commission on NDIP	692	803	(111)	(13.8%)
Increase in cash value of life insurance	531	450	81	18.0%
Change in indemnification asset	(461)	(94)	(367)	390.4%
Gain on sale of foreclosed assets	313	418	(105)	(25.1%)
Other noninterest income	307	337	(30)	(8.9%)
Total other noninterest income	2,465	3,344	(879)	(26.3%)
Total noninterest income	9,127	9,127	\$0	0.0%

Noninterest income was \$9,127,000 during the three months ended September 30, 2013, and was unchanged when compared to the three months ended September 30, 2012. Increases in ATM and interchange fees and change in value of mortgage servicing rights were offset by decreases in service charges on deposit accounts, gain on sale of loans, and change in indemnification asset. ATM and interchange fees increased \$255,000 to \$2,132,000 due to increased interchange fees from an ongoing effort to expand this business line. Change in value of mortgage servicing rights had an improvement of \$862,000 going from a negative contribution of \$681,000 in the three months ended September 30, 2012 to a positive contribution of \$181,000 in the three months ended September 30, 2013. The \$681,000 negative contribution from change in value of mortgage servicing rights in the quarter ended September 30, 2012 was due to decreased expected life of such assets, and an increase in market discount rates for such assets during the quarter ended September 30, 2012. The \$181,000 positive contribution from change in value of mortgage servicing rights in the quarter ended September 30, 2013 was due to increased expected life of such assets during the quarter ended September 30, 2013. Service charges on deposit accounts decreased \$264,000 to \$3,353,000 due to reduced customer overdrafts and a resulting decrease in non-sufficient funds fees. Gain on sale of loans decreased \$347,000 to \$1,083,000 due to increased mortgage rates and a resulting decrease in mortgage refinance activity from the year-ago quarter. Change in indemnification asset was a negative contribution of \$461,000 in the quarter ended September 31, 2013 compared to a negative contribution of \$94,000 in the quarter ended September 30, 2012. This \$367,000 increase in negative contribution from change in indemnification asset is reflective of continued and larger decreases in estimated future losses from covered assets. Such decreases in estimated losses from covered loans are also reflected in decreases in the Company's provision for loan losses that offset this negative contribution from change in indemnification asset.

Salary and benefit expenses increased \$499,000 (4.0%) to \$12,861,000 during the three months ended September 30, 2013 compared to the three months ended September 30, 2012. Base salaries increased \$379,000 (4.5%) to \$8,716,000 during the three months ended September 30, 2013 versus the year ago period due mainly to annual merit increases, and the addition of several higher compensated management positions, while the average number full-time equivalent staff decreased to 732 from 740 in the year-ago quarter. Incentive and commission related salary expenses decreased \$88,000 (7.0%) to \$1,166,000 during three months ended September 30, 2013 due

primarily to decreases in production related incentives. Benefits expense, including retirement, medical and workers' compensation insurance, and taxes, increased \$208,000 (7.5%) to \$2,979,000 during the three months ended September 30, 2013 due primarily to increased health insurance and workers compensation insurance expenses.

Other noninterest expenses decreased \$2,473,000 (18.7%) to \$10,755,000 during the three months ended September 30, 2013 when compared to the three months ended September 30, 2012. The decrease in other noninterest expense was due primarily a \$1,751,000 decrease in legal settlement expense to \$339,000, a \$622,000 (86.8%) decrease in the provision for, and expenses related to, foreclosed assets to \$95,000, a \$218,000 (30.7%) decrease in advertising and marketing expense to \$492,000, and a \$300,000 increase in reversal of provision for losses for unfunded commitments to a reversal of \$335,000. Data processing and software expense was up \$167,000 (16.4%) to \$1,184,000. The decrease in foreclosed asset provision and expenses was due to increased property values and a reduction in foreclosed assets from \$12,743,000 at June 30, 2012 to \$4,140,000 at September 30, 2013. The decrease in advertising and marketing expense from the year ago period was due to cost savings efforts in this area. The increase in reversal of provision for losses for unfunded commitments was due to a decrease in construction loan related commitments and a decrease in historical loss rates.
