FORWARD-LOOKING STATEMENTS

This report on Form 10-Q contains forward-looking statements about TriCo Bancshares (the "Company") that are subject to the protection of the safe harbor provisions contained in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on the current knowledge and belief of the Company's management ("Management") and include information concerning the Company's possible or assumed future financial condition and results of operations. When you see any of the words "believes", "expects", "anticipates", "estimates", or similar expressions, it may mean the Company is making forward-looking statements. A number of factors, some of which are beyond the Company's ability to predict or control, could cause future results to differ materially from those contemplated. The reader is directed to the Company's annual report on Form 10-K for the year ended December 31, 2014 and Part II, Item 1A of this report for further discussion of factors which could affect the Company's business and cause actual results to differ materially from those suggested by any forward-looking statement made in this report. Such Form 10-K and this report should be read in their entirety to put any forward-looking statements in context and to gain a more complete understanding of the risks and uncertainties involved in the Company's business. Any forward-looking statement may turn out to be wrong and cannot be guaranteed. The Company does not intend to update any forward-looking statement after the date of this report.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Summary of Significant Accounting Policies

Description of Business and Basis of Presentation

TriCo Bancshares (the "Company") is a California corporation organized to act as a bank holding company for Tri Counties Bank (the "Bank"). The Company and the Bank are headquartered in Chico, California. The Bank is a California-chartered bank that is engaged in the general commercial banking business in 26 California counties. Tri Counties Bank currently operates from 57 traditional branches and 16 in-store branches. The Company has five capital subsidiary business trusts (collectively, the Capital Trusts) that issued trust preferred securities, including two organized by TriCo and three acquired with the acquisition of North Valley Bancorp. See Note 17 – Junior Subordinated Debt.

The consolidated financial statements are prepared in accordance with accounting policies generally accepted in the United States of America and general practices in the banking industry. The financial statements include the accounts of the Company. All intercompany accounts and transactions have been eliminated in consolidation. For financial reporting purposes, the Company's investments in the Capital Trusts of \$1,691,000 are accounted for under the equity method and, accordingly, are not consolidated and are included in other assets on the consolidated balance sheet. The subordinated debentures issued and guaranteed by the Company and held by the Capital Trusts are reflected as debt on the Company's consolidated balance sheet.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company evaluates its estimates on an on-going basis. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

As described in Note 2, the Company acquired North Valley Bancorp on October 3, 2014. The acquired assets and assumed liabilities were measured at estimated fair value values under the acquisition method of accounting. The Company made significant estimates and exercised significant judgment in accounting for the acquisition. The Company determined loan fair values based on loan file reviews, loan risk ratings, appraised collateral values, expected cash flows and historical loss factors. Foreclosed assets were primarily valued based on appraised values of the repossessed loan collateral. Land and building were valued based on appraised values. An identifiable intangible was also recorded representing the fair value of the core deposit customer base based on an evaluation of the cost of such deposits relative to alternative funding sources. The fair value of time deposits and borrowings were determined based on the present value of estimated future cash flows using current rates as of the acquisition date.

Significant Group Concentration of Credit Risk

The Company grants agribusiness, commercial, consumer, and residential loans to customers located throughout the northern San Joaquin Valley, the Sacramento Valley and northern mountain regions of California. The Company has a diversified loan portfolio within the business segments located in this geographical area. The Company currently classifies all its operation into one business segment that it denotes as community banking.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash on hand, amounts due from banks, and federal funds sold. Net cash flows are reported for loan and deposit transactions and other borrowings.

Investment Securities

The Company classifies its debt and marketable equity securities into one of three categories: trading, available for sale or held to maturity. Trading securities are bought and held principally for the purpose of selling in the near term. Held to maturity securities are those securities which the Company has the ability and intent to hold until maturity. These securities are carried at cost adjusted for amortization of premium and accretion of discount, computed by the effective interest method over their contractual lives. All other securities not included in trading or held to maturity are classified as available for sale. Available for sale securities are recorded at fair value. Unrealized gains and losses, net of the related tax effect, on available for sale securities are reported as a separate component of other accumulated comprehensive income in shareholders' equity until realized. Premiums and discounts are amortized or accreted

over the life of the related investment security as an adjustment to yield using the effective interest method. Dividend and interest income are recognized when earned. Realized gains and losses are derived from the amortized cost of the security sold. During the three months ended March 31, 2015, and the year ended December 31, 2014, the Company did not have any securities classified as trading.

The Company assesses other-than-temporary impairment ("OTTI") based on whether it intends to sell a security or if it is likely that the Company would be required to sell the security before recovery of the amortized cost basis of the investment, which may be maturity. For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income ("OCI"). Impairment losses related to all other factors are presented as separate categories within OCI. The accretion of the amount recorded in OCI increases the carrying value of the investment and does not affect earnings. If there is an indication of additional credit losses the security is re-evaluated according to the procedures described above. No OTTI losses were recognized during the three months ended March 31, 2015 or the year ended December 31, 2014.

Restricted Equity Securities

Restricted equity securities represent the Company's investment in the stock of the Federal Home Loan Bank of San Francisco ("FHLB") and are carried at par value, which reasonably approximates its fair value. While technically these are considered equity securities, there is no market for the FHLB stock. Therefore, the shares are considered as restricted investment securities. Management periodically evaluates FHLB stock for other-than-temporary impairment. Management's determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as (1) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, (3) the impact of legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB, and (4) the liquidity position of the FHLB.

As a member of the FHLB system, the Company is required to maintain a minimum level of investment in FHLB stock based on specific percentages of its outstanding mortgages, total assets, or FHLB advances. The Company may request redemption at par value of any stock in excess of the minimum required investment. Stock redemptions are at the discretion of the FHLB.

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or fair value, as determined by aggregate outstanding commitments from investors of current investor yield requirements. Net unrealized losses are recognized through a valuation allowance by charges to noninterest income.

Mortgage loans held for sale are generally sold with the mortgage servicing rights retained by the Company. Gains or losses on the sale of loans that are held for sale are recognized at the time of the sale and determined by the difference between net sale proceeds and the net book value of the loans less the estimated fair value of any retained mortgage servicing rights.

Loans and Allowance for Loan Losses

Loans originated by the Company, i.e., not purchased or acquired in a business combination, are referred to as originated loans. Originated loans that management has the intent and ability to hold for the foreseeable future or until maturity or payoff are reported at the principal amount outstanding, net of deferred loan fees and costs. Loan origination and commitment fees and certain direct loan origination costs are deferred, and the net amount is amortized as an adjustment of the related loan's yield over the actual life of the loan. Originated loans on which the accrual of interest has been discontinued are designated as nonaccrual loans.

Originated loans are placed in nonaccrual status when reasonable doubt exists as to the full, timely collection of interest or principal, or a loan becomes contractually past due by 90 days or more with respect to interest or principal and is not well secured and in the process of collection. When an originated loan is placed on nonaccrual status, all interest previously accrued but not collected is reversed. Income on such loans is then recognized only to the extent that cash is received and where the future collection of principal

is probable. Interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of Management, the loan is estimated to be fully collectible as to both principal and interest.

An allowance for loan losses for originated loans is established through a provision for loan losses charged to expense. The allowance is maintained at a level which, in Management's judgment, is adequate to absorb probable incurred credit losses inherent in the loan portfolio as of the balance sheet date. Originated loans and deposit related overdrafts are charged against the allowance for loan losses when Management believes that the collectability of the principal is unlikely or, with respect to consumer installment loans, according to an established delinquency schedule. The allowance is an amount that Management believes will be adequate to absorb probable incurred losses inherent in existing loans, based on evaluations of the collectability, impairment and prior loss experience of loans. The evaluations take into consideration such factors as changes in the nature and size of the portfolio, overall portfolio quality, loan concentrations, specific problem loans, and current economic conditions that may affect the borrower's ability to pay. The Company defines an originated loan as impaired when it is probable the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired originated loans are measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate. As a practical expedient, impairment may be measured based on the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. When the measure of the impaired loan is less than the recorded investment in the loan, the impairment is recorded through a valuation allowance.

In situations related to originated loans where, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession for other than an insignificant period of time to the borrower that the Company would not otherwise consider, the related loan is classified as a troubled debt restructuring (TDR). The Company strives to identify borrowers in financial difficulty early and work with them to modify to more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where the Company grants the borrower new terms that result in the loan being classified as a TDR, the Company measures any impairment on the restructuring as noted above for impaired loans. TDR loans are classified as impaired until they are fully paid off or charged off. Loans that are in nonaccrual status at the time they become TDR loans, remain in nonaccrual status until the borrower demonstrates a sustained period of performance which the Company generally believes to be six consecutive months of payments, or equivalent. Otherwise, TDR loans are subject to the same nonaccrual and charge-off policies as noted above with respect to their restructured principal balance.

Credit risk is inherent in the business of lending. As a result, the Company maintains an allowance for loan losses to absorb probable incurred losses inherent in the Company's originated loan portfolio. This is maintained through periodic charges to earnings. These charges are included in the Consolidated Statements of Income as provision for loan losses. All specifically identifiable and quantifiable losses are immediately charged off against the allowance. However, for a variety of reasons, not all losses are immediately known to the Company and, of those that are known, the full extent of the loss may not be quantifiable at that point in time. The balance of the Company's allowance for originated loan losses is meant to be an estimate of these unknown but probable losses inherent in the portfolio.

The Company formally assesses the adequacy of the allowance for originated loan losses on a quarterly basis. Determination of the adequacy is based on ongoing assessments of the probable risk in the outstanding originated loan portfolio, and to a lesser extent the Company's originated loan commitments. These assessments include the periodic re-grading of credits based on changes in their individual credit characteristics including delinquency, seasoning, recent financial performance of the borrower, economic factors, changes in the interest rate environment, growth of the portfolio as a whole or by segment, and other factors as warranted. Loans are initially graded when originated. They are re-graded as they are renewed, when there is a new loan to the same borrower, when identified facts demonstrate heightened risk of nonpayment, or if they become delinquent. Re-grading of larger problem loans occurs at least quarterly. Confirmation of the quality of the grading process is obtained by independent credit reviews conducted by consultants specifically hired for this purpose and by various bank regulatory agencies.

The Company's method for assessing the appropriateness of the allowance for originated loan losses includes specific allowances for impaired originated loans, formula allowance factors for pools of credits, and allowances for changing environmental factors (e.g., interest rates, growth, economic conditions, etc.). Allowance factors for loan pools were based on historical loss experience by product type and prior risk rating.

During the three months ended March 31, 2014, the Company modified its methodology used to determine the allowance for changing environmental factors by adding a new environmental factor based on the California Home Affordability Index ("CHAI"). The CHAI measures the percentage of households in California that can afford to purchase the median priced home in California based on current home prices and mortgage interest rates. The use of the CHAI environmental factor consists of comparing the current CHAI to its historical baseline, and allows management to consider the adverse impact that a lower than historical CHAI may have on general economic activity and the performance of our borrowers. Based on an analysis of historical data, management believes this environmental factor gives a better estimate of current economic activity compared to other environmental factors that may lag current

economic activity to some extent. This change in methodology resulted in no change to the allowance for loan losses as of March 31, 2014 compared to what it would have been without this change in methodology.

During the three months ended June 30, 2014, the Company refined the method it uses to evaluate historical losses for the purpose of estimating the pool allowance for unimpaired loans. In the third quarter of 2010, the Company moved from a six point grading system (Grades A-F) to a nine point risk rating system (Risk Ratings 1-9), primarily to allow for more distinction within the "Pass" risk rating. Initially, there was not sufficient loss experience within the nine point scale to complete a migration analysis for all nine risk ratings, all loans risk rated Pass or 2-5 were grouped together, a loss rate was calculated for that group, and that loss rate was established as the loss rate for risk rating 4. The reserve ratios for risk ratings 2, 3 and 5 were then interpolated from that figure. As of June 30, 2014, the Company was able to compile twelve quarters of historical loss information for all risk ratings and use that information to calculate the loss rates for each of the nine risk ratings without interpolation. This refinement led to an increase of \$1,438,000 in the reserve requirement for unimpaired loans, driven primarily by home equity lines of credit with a risk rating of 5 or "Pass-Watch."

Loans purchased or acquired in a business combination are referred to as acquired loans. Acquired loans are valued as of the acquisition date in accordance with Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 805, Business Combinations. Loans acquired with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are referred to as purchased credit impaired (PCI) loans. PCI loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. Under FASB ASC Topic 805 and FASB ASC Topic 310-30, PCI loans are recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. Fair value is defined as the present value of the future estimated principal and interest payments of the loan, with the discount rate used in the present value calculation representing the estimated effective yield of the loan. Default rates, loss severity, and prepayment speed assumptions are periodically reassessed and our estimate of future payments is adjusted accordingly. The difference between contractual future payments and estimated future payments is referred to as the nonaccretable difference. The difference between estimated future payments and the present value of the estimated future payments is referred to as the accretable yield. The accretable yield represents the amount that is expected to be recorded as interest income over the remaining life of the loan. If after acquisition, the Company determines that the estimated future cash flows of a PCI loan are expected to be more than originally estimated, an increase in the discount rate (effective yield) would be made such that the newly increased accretable yield would be recognized, on a level yield basis, over the remaining estimated life of the loan. If, after acquisition, the Company determines that the estimated future cash flows of a PCI loan are expected to be less than previously estimated, the discount rate would first be reduced until the present value of the reduced cash flow estimate equals the previous present value however, the discount rate may not be lowered below its original level at acquisition. If the discount rate has been lowered to its original level and the present value has not been sufficiently lowered, an allowance for loan loss would be established through a provision for loan losses charged to expense to decrease the present value to the required level. If the estimated cash flows improve after an allowance has been established for a loan, the allowance may be partially or fully reversed depending on the improvement in the estimated cash flows. Only after the allowance has been fully reversed may the discount rate be increased. PCI loans are put on nonaccrual status when cash flows cannot be reasonably estimated. PCI loans on nonaccrual status are accounted for using the cost recovery method or cash basis method of income recognition. The Company refers to PCI loans on nonaccrual status that are accounted for using the cash basis method of income recognition as "PCI – cash basis" loans; and the Company refers to all other PCI loans as "PCI – other" loans PCI loans are charged off when evidence suggests cash flows are not recoverable. Foreclosed assets from PCI loans are recorded in foreclosed assets at fair value with the fair value at time of foreclosure representing cash flow from the loan. ASC 310-30 allows PCI loans with similar risk characteristics and acquisition time frame to be "pooled" and have their cash flows aggregated as if they were one loan. The Company elected to use the "pooled" method of ASC 310-30 for PCI – other loans in the acquisition of certain assets and liabilities of Granite Community Bank, N.A. ("Granite") during 2010 and Citizens Bank of Northern California ("Citizens") during 2011.

Acquired loans that are not PCI loans are referred to as purchased not credit impaired (PNCI) loans. PNCI loans are accounted for under FASB ASC Topic 310-20, *Receivables – Nonrefundable Fees and Other Costs*, in which interest income is accrued on a level-yield basis for performing loans. For income recognition purposes, this method assumes that all contractual cash flows will be collected, and no allowance for loan losses is established at the time of acquisition. Post-acquisition date, an allowance for loan losses may need to be established for acquired loans through a provision charged to earnings for credit losses incurred subsequent to acquisition. Under ASC 310-20, the loss would be measured based on the probable shortfall in relation to the contractual note requirements, consistent with our allowance for loan loss policy for similar loans.

Throughout these financial statements, and in particular in Note 4 and Note 5, when we refer to "Loans" or "Allowance for loan losses" we mean all categories of loans, including Originated, PNCI, PCI – cash basis, and PCI - other. When we are not referring to all categories of loans, we will indicate which we are referring to – Originated, PNCI, PCI – cash basis, or PCI - other.

When referring to PNCI and PCI loans we use the terms "nonaccretable difference", "accretable yield", or "purchase discount". Nonaccretable difference is the difference between undiscounted contractual cash flows due and undiscounted cash flows we expect to collect, or put another way, it is the undiscounted contractual cash flows we do not expect to collect. Accretable yield is the difference between undiscounted cash flows we expect to collect and the value at which we have recorded the loan on our financial statements. On the date of acquisition, all purchased loans are recorded on our consolidated financial statements at estimated fair value. Purchase discount is the difference between the estimated fair value of loans on the date of acquisition and the principal amount owed by the borrower, net of charge offs, on the date of acquisition. We may also refer to "discounts to principal balance of loans owed, net of charge-offs". Discounts to principal balance of loans owed, net of charge-offs, and loans as recorded on our financial statements. Discounts to principal balance of loans owed, net of charge-offs arise from purchase discounts, and equal the purchase discount on the acquisition date.

Loans are also categorized as "covered" or "noncovered". Covered loans refer to loans covered by a Federal Deposit Insurance Corporation ("FDIC") loss sharing agreement. Noncovered loans refer to loans not covered by a FDIC loss sharing agreement.

Foreclosed Assets

Foreclosed assets include assets acquired through, or in lieu of, loan foreclosure. Foreclosed assets are held for sale and are initially recorded at fair value less estimated costs to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, management periodically performs valuations and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in other noninterest expense. Gain or loss on sale of foreclosed assets is included in noninterest income. Foreclosed assets that are not subject to a FDIC loss-share agreement are referred to as noncovered foreclosed assets.

Foreclosed assets acquired through FDIC-assisted acquisitions that are subject to a FDIC loss-share agreement, and all assets acquired via foreclosure of covered loans are referred to as covered foreclosed assets. Covered foreclosed assets are reported exclusive of expected reimbursement cash flows from the FDIC. Foreclosed covered loan collateral is transferred into covered foreclosed assets at the loan's carrying value, inclusive of the acquisition date fair value discount.

Covered foreclosed assets are initially recorded at estimated fair value less estimated costs to sell on the acquisition date based on similar market comparable valuations less estimated selling costs. Any subsequent valuation adjustments due to declines in fair value will be charged to noninterest expense, and will be mostly offset by noninterest income representing the corresponding increase to the FDIC indemnification asset for the offsetting loss reimbursement amount. Any recoveries of previous valuation adjustments will be credited to noninterest expense with a corresponding charge to noninterest income for the portion of the recovery that is due to the FDIC.

Premises and Equipment

Land is carried at cost. Land improvements, buildings and equipment, including those acquired under capital lease, are stated at cost less accumulated depreciation and amortization. Depreciation and amortization expenses are computed using the straight-line method over the estimated useful lives of the related assets or lease terms. Asset lives range from 3-10 years for furniture and equipment and 15-40 years for land improvements and buildings.

Goodwill and Other Intangible Assets

Goodwill represents the excess of costs over fair value of net assets of businesses acquired. Goodwill and other intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment.

The Company has an identifiable intangible asset consisting of core deposit intangibles (CDI). CDI are amortized over their respective estimated useful lives, and reviewed for impairment.

Impairment of Long-Lived Assets and Goodwill

Long-lived assets, such as premises and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset. Assets to be disposed of

would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposed group classified as held for sale would be presented separately in the appropriate asset and liability sections of the consolidated balance sheet.

As of December 31 of each year, goodwill is tested for impairment, and is tested for impairment more frequently if events and circumstances indicate that the asset might be impaired. An impairment loss is recognized to the extent that the carrying amount exceeds the asset's fair value. This determination is made at the reporting unit level. The Company may choose to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, after assessing the totality of events or circumstances, the Company determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then goodwill is deemed not to be impaired. However, if the Company concludes otherwise, or if the Company elected not to first assess qualitative factors, then the Company performs the first step of a two-step impairment test by calculating the fair value of the reporting unit and comparing the fair value with the carrying amount of the reporting unit. Second, if the carrying amount of the reporting unit exceeds its fair value, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. Currently, and historically, the Company is comprised of only one reporting unit that operates within the business segment it has identified as "community banking". Goodwill was not impaired as of December 31, 2014 because the fair value of the reporting unit exceeded its carrying value.

Mortgage Servicing Rights

Mortgage servicing rights (MSR) represent the Company's right to a future stream of cash flows based upon the contractual servicing fee associated with servicing mortgage loans. Our MSR arise from residential and commercial mortgage loans that we originate and sell, but retain the right to service the loans. The net gain from the retention of the servicing right is included in gain on sale of loans in noninterest income when the loan is sold. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. Servicing fees are recorded in noninterest income when earned.

The Company accounts for MSR at fair value. The determination of fair value of our MSR requires management judgment because they are not actively traded. The determination of fair value for MSR requires valuation processes which combine the use of discounted cash flow models and extensive analysis of current market data to arrive at an estimate of fair value. The cash flow and prepayment assumptions used in our discounted cash flow model are based on empirical data drawn from the historical performance of our MSR, which we believe are consistent with assumptions used by market participants valuing similar MSR, and from data obtained on the performance of similar MSR. The key assumptions used in the valuation of MSR include mortgage prepayment speeds and the discount rate. These variables can, and generally will, change from quarter to quarter as market conditions and projected interest rates change. The key risks inherent with MSR are prepayment speed and changes in interest rates. The Company uses an independent third party to determine fair value of MSR.

Indemnification Asset/Liability

The Company accounts for amounts receivable or payable under its loss-share agreements entered into with the FDIC in connection with its purchase and assumption of certain assets and liabilities of Granite as indemnification assets in accordance with FASB ASC Topic 805, *Business Combinations*. FDIC indemnification assets are initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreements. The difference between the fair value and the undiscounted cash flows the Company expects to collect from or pay to the FDIC will be accreted into noninterest income over the life of the FDIC indemnification assets. FDIC indemnification assets are reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered portfolios. These adjustments are measured on the same basis as the related covered loans and covered other real estate owned. Any increases in cash flow of the covered assets over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC indemnification asset. Increases and decreases to the FDIC indemnification asset are recorded as adjustments to noninterest income.

Reserve for Unfunded Commitments

The reserve for unfunded commitments is established through a provision for losses – unfunded commitments charged to noninterest expense. The reserve for unfunded commitments is an amount that Management believes will be adequate to absorb probable losses

inherent in existing commitments, including unused portions of revolving lines of credits and other loans, standby letters of credits, and unused deposit account overdraft privilege. The reserve for unfunded commitments is based on evaluations of the collectability, and prior loss experience of unfunded commitments. The evaluations take into consideration such factors as changes in the nature and size of the loan portfolio, overall loan portfolio quality, loan concentrations, specific problem loans and related unfunded commitments, and current economic conditions that may affect the borrower's or depositor's ability to pay.

Income Taxes

The Company's accounting for income taxes is based on an asset and liability approach. The Company recognizes the amount of taxes payable or refundable for the current year, and deferred tax assets and liabilities for the future tax consequences that have been recognized in its financial statements or tax returns. The measurement of tax assets and liabilities is based on the provisions of enacted tax laws. A valuation allowance, if needed, reduces deferred tax assets to the expected amount most likely to be realized. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. Although realization is not assured, management believes it is more likely than not that all of the deferred tax assets will be realized. Interest and/or penalties related to income taxes are reported as a component of noninterest income.

Off-Balance Sheet Credit Related Financial Instruments

In the ordinary course of business, the Company has entered into commitments to extend credit, including commitments under credit card arrangements, commercial letters of credit, and standby letters of credit. Such financial instruments are recorded when they are funded.

Geographical Descriptions

For the purpose of describing the geographical location of the Company's loans, the Company has defined northern California as that area of California north of, and including, Stockton; central California as that area of the state south of Stockton, to and including, Bakersfield; and southern California as that area of the state south of Bakersfield.

Reclassifications

Certain amounts reported in previous consolidated financial statements have been reclassified to conform to the presentation in this report. These reclassifications did not affect previously reported net income or total shareholders' equity.

Recent Accounting Pronouncements

FASB issued ASU No. 2014-04, *Receivables (Topic 310): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. ASU 2014-04 clarifies when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. ASU 2014-04 became effective for the Company on January 1, 2015, and did not have a significant impact on the Company's consolidated financial statements.

FASB issued ASU No. 2014-08, *Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity.* ASU 2014-08 improves the definition of discontinued operations by limiting discontinued operations reporting to disposals of components of an entity that represent strategic shifts that have (or will have) a major effect on an entity's operations and financial results. ASU 2014-08 requires expanded disclosures for discontinued operations that provide users of financial statements with more information about the assets, liabilities, revenues, and expenses of discontinued operations. ASU 2014-08 also requires an entity to disclose the pretax profit or loss of an individually significant component of an entity that does not qualify for discontinued operations reporting, and provide users with information about the financial effects of significant disposals that do not qualify for discontinued operations reporting. The amendments in ASU 2014-08 include several changes to the Accounting Standards Codification to improve the organization and readability of Subtopic 205-20 and Subtopic 360-10, Property, Plant, and Equipment—Overall. ASU 2014-08 is effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. ASU 2014-08 became effective for the Company on January 1, 2015, and did not have a significant impact on the Company's consolidated financial statements.

FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers (Topic 606)*. The core principle of the guidance under ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. ASU 2014-09 is effective

for a public entity for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. ASU 2014-09 is not expected to have a significant impact on the Company's consolidated financial statements.

FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures.* ASU 2014-11 requires that repurchase-to-maturity transactions be accounted for as secured borrowings consistent with the accounting for other repurchase agreements. In addition, ASU 2014-11 requires separate accounting for repurchase financings, which entails the transfer of a financial asset executed contemporaneously with a repurchase agreement with the same counterparty. ASU 2014-11 requires entities to disclose certain information about transfers accounted for as sales in transactions that are economically similar to repurchase agreements. In addition, ASU 2014-11 requires disclosures related to collateral, remaining contractual tenor and of the potential risks associated with repurchase agreements, securities lending transactions and repurchase-to-maturity transactions. ASU 2014-11 became effective for the Company on January 1, 2015, and did not have a significant impact on the Company's consolidated financial statements.

FASB issued ASU No. 2014-12, Compensation—Stock Compensation (Topic 718): Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be achieved after the Requisite Service Period. ASU 2014-12 requires that a performance target that affects the vesting of a share-based payment award and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718 as it relates to awards with performance conditions that affect vesting to account for such awards. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. If the performance target becomes probable of being achieved before the end of the requisite service period, the remaining unrecognized compensation cost should be recognized prospectively over the remaining requisite service period. The total amount of compensation cost recognized during and after the requisite service period should reflect the number of awards that are expected to vest and should be adjusted to reflect those awards that ultimately vest. The requisite service period ends when the employee can cease rendering service and still be eligible to vest in the award if the performance target is achieved. The stated vesting period (which includes the period in which the performance target could be achieved) may differ from the requisite service period. Current U.S. GAAP does not contain explicit guidance on whether to treat a performance target that could be achieved after the requisite service period as a performance condition that affects vesting or as a nonvesting condition that affects the grant-date fair value of an award. ASU 2014-12 provides explicit guidance for those awards. For all entities, ASU 2014-12 is effective for annual periods and interim periods within those annual periods beginning after December 15, 2015. Earlier adoption is permitted. The Company has elected to not adopt ASU 2014-12 early.

FASB issued ASU No. 2014-14, Receivables—Troubled Debt Restructurings by Creditors (Topic 310): Classification of Certain Government Mortgage Loans upon Foreclosure. ASU 2014-14 requires that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: 1) the loan has a government guarantee that is not separable from the loan before foreclosure, 2) at the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim, and 3) at the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. ASU 2014-14 became effective for the Company on January 1, 2015, and did not have a significant impact on the Company's consolidated financial statements.

Note 2 – Business Combinations

On October 3, 2014, TriCo completed its acquisition of North Valley Bancorp originally announced January 21, 2014. Based on a fixed exchange ratio of 0.9433 shares of TriCo common stock for each share of North Valley Bancorp common stock, North Valley Bancorp shareholders received 6,575,550 shares of TriCo common stock and \$6,823 of cash in-lieu of fractional shares. The 6,575,550 shares of TriCo common stock issued to North Valley Bancorp shareholders represented, on a pro forma basis, approximately 28.9% of the 22,714,964 shares of the combined company outstanding on October 3, 2014. Based on TriCo's closing stock price of \$23.01 on October 3, 2014, North Valley Bancorp shareholders received consideration valued at \$151,310,000 or approximately \$21.71 per share of North Valley common stock outstanding.

The acquisition of North Valley Bancorp was to expand the Company's market presence in Northern California. The customer base and locations of North Valley Bancorp's branches had significant overlap when compared to the Company's Northern California customer base and branch locations. This made North Valley Bancorp a very good fit in terms of potential cost savings and future growth potential. With the levels of excess capital at the time, the acquisitions fit well into the Company's growth strategy.

North Valley Bancorp, was headquartered in Redding, California, and was the parent of North Valley Bank that had approximately \$935 million in assets and 22 commercial banking offices in Shasta, Humboldt, Del Norte, Mendocino, Yolo, Sonoma, Placer and Trinity Counties in Northern California at June 30, 2014. In connection with the acquisition, North Valley Bank was merged into Tri Counties Bank on October 3, 2014.

On October 25, 2014, North Valley Bank's electronic customer service and other data processing systems were converted into Tri Counties Bank's systems. Between January 7, 2015 and January 21, 2015, four Tri Counties Bank branches and four former North Valley Bank branches were consolidated into other Tri Counties Bank or other former North Valley Bank branches.

Beginning on October 4, 2014, the effect of revenue and expenses from the operations of North Valley Bancorp, and the issuance of TriCo Bancshares common shares as consideration in the merger are included in the results of the Company.

The assets acquired and liabilities assumed from North Valley Bancorp were accounted for in accordance with ASC 805 "Business Combinations," using the acquisition method of accounting and were recorded at their estimated fair values on the October 3, 2014 acquisition date, and its results of operations are included in the Company's consolidated statements of income since that date. These fair value estimates are considered provisional, as additional analysis will be performed on certain assets and liabilities in which fair values are primarily determined through the use of inputs that are not observable from market-based information. Management may further adjust the provisional fair values for a period of up to one year from the date of the acquisition. The excess of the fair value of consideration transferred over total identifiable net assets was recorded as goodwill. The goodwill arising from the acquisition consists largely of the synergies and economies of scale expected from combining the operations of the Company and North Valley Bancorp. None of the goodwill is deductible for income tax purposes as the acquisition was accounted for as a tax-free exchange. The assets and liabilities that continue to be provisional include loans, intangible assets, OREO, deferred tax assets, accrued assets and liabilities, and the residual effects that the adjustments would have on goodwill.

The following table discloses the calculation of the fair value of consideration transferred, the total identifiable net assets acquired and the resulting goodwill relating to the North Valley Bancorp acquisition:

(in thousands)	North Valley Ban October 3, 201				
Fair value of consideration transferred:		_			
Fair value of shares issued	\$	151,303			
Cash consideration		7			
Total fair value of consideration transferred		151,310			
Asset acquired:					
Cash and cash equivalents		141,412			
Securities available for sale		17,288			
Securities held to maturity		189,950			
Restricted equity securities		5,378			
Loans		499,327			
Foreclosed assets		695			
Premises and equipment		11,936			
Cash value of life insurance		38,075			
Core deposit intangible		6,614			
Other assets		20,064			
Total assets acquired		930,739			
Liabilities assumed:	·	_			
Deposits		801,956			
Other liabilities		10,429			
Junior subordinated debt		14,987			
Total liabilities assumed		827,372			
Total net assets acquired		103,367			
Goodwill recognized	\$	47,943			

A summary of the estimated fair value adjustments resulting in the goodwill recorded in the North Valley Bancorp acquisition are presented below:

(in thousands)	North Valley Bancorp October 3, 2014			
Value of stock consideration paid to North Valley Bancorp Shareholders	\$	151,303		
Cash payments to North Valley Bancorp Shareholders		7		
Cost basis net assets acquired		(98,040)		
Fair value adjustments:				
Loans		5,832		
Premises and Equipment		(4,785)		
Core deposit intangible		(6,283)		
Deferred income taxes		6,293		
Junior subordinated debt		(6,664)		
Other		280		
Goodwill	\$	47,943		

The loan portfolio of North Valley Bancorp was recorded at fair value at the date of each acquisition. A valuation of North Valley Bancorp's loan portfolio was performed as of the acquisition date to assess the fair value of the loan portfolio. The North Valley Bancorp loan portfolio was segmented into two groups; loans with credit deterioration (PCI loans) and loans without credit deterioration (PNCI). For North Valley Bancorp PNCI loans, the present value of estimated future cash flows, based primarily on contractual cash flows, was used to determine fair value. For North Valley Bancorp PCI loans, the present value of estimated future cash flows, based primarily on liquidation value of collateral, was used to determine fair value.

North Valley Bancorp PNCI loans were grouped into pools based on similar loan characteristics such as loan type, payment amortization method, and fixed or variable interest rates. A discounted cash flow schedule was prepared for each pool in which the present value of all estimated future cash flows was calculated using a specifically calculated discount rate for each pool. The discount rate used to estimate the fair value of each loan pool was composed of the sum of: an estimated cost of funds rate, an estimated capital charge reflecting the market participant required return on capital, estimated loan servicing costs, and a liquidity premium. All PNCI loan pools included some estimate regarding prepayment rates, and estimated principal default and loss rates, based primarily on North Valley Bancorp's historical loss experience. The difference between the sum of recorded balances of the North Valley Bancorp PNCI loans in each pool and the present value of each pool represented the total discount (if the recorded value exceeded the present value) or premium (if the present value exceeded the recorded value) for each pool. The total discount, or premium, for each pool was then allocated to the individual loans within each pool based on outstanding loan balance, individual loan risk rating as compared to the weighted average risk rating of the pool, and the contractual payments remaining for the individual loan as compared to the pool.

North Valley Bancorp PCI loans were fair valued on an individual basis. A discounted cash flow schedule was prepared for each loan in which the present value of all future estimated cash flows was calculated using a specifically calculated discount rate, estimated liquidation value and estimated liquidation timing for each loan. The discount rate used in the calculation of the present value of North Valley Bancorp PCI loans was composed of the sum of: an estimated cost of funds rate, an estimated capital charge reflecting the market participant required return on capital, estimated loan servicing costs, and a liquidity premium. The difference between the recorded balance and the present value of each North Valley Bancorp PCI loan represented the discount for each PCI loan. All North Valley Bancorp PCI loans had recorded values in excess of their present value of estimated future cash flows.

The Company identified the North Valley Bancorp PCI loans as having cash flows that were not reasonably estimable and placed these loans in nonaccrual status under ASC 310-30 and included them in the category of loans the Company refers to as "PCI – other" loans.

The following table presents the cost basis, fair value discount, and fair value of loans acquired from North Valley Bancorp on October 3, 2014:

	North Valley Bancorp Acquired Loans October 3, 2014								
(in thousands)		Cost Basis		Discount	Fair Value				
PNCI	\$	502,637	\$	(12,721)	\$	489,916			
PCI – other		11,488		(2,077)		9,411			
Total	\$	514,125	\$	(14,798)	\$	499,327			

Although the discount on PNCI loans is completely accretable to interest income over the remaining life of such loans, the discount on PCI – other loans from the North Valley Bancorp acquisition are not accretable into interest income until the loan principal balance has been reduced to the loan's fair value recorded at acquisition. This method of accounting for the PCI – other loans from the North Valley Bancorp acquisition is often referred to as the "cost recovery" method of income recognition.

The following table presents a reconciliation of the undiscounted contractual cash flows, nonaccretable difference, accretable yield, fair value, purchase discount, and principal balance of loans for the PNCI and PCI – other categories of North Valley Bancorp loans as of the acquisition date. For North Valley Bancorp PCI – other loans, the purchase discount does not necessarily represent cash flows to be collected:

	North Valley Bancorp Loans – October 3, 2014							
(in thousands)	PNCI		PNCI PCI – other		PNCI PCI – other		er Total	
Undiscounted contractual cash flows	\$	718,731	\$	15,706	\$	734,437

Principal balance loans acquired	\$	502,637	\$	11,488	\$	514,125		

As part of the acquisition of North Valley Bancorp, the Company performed a valuation of premises and equipment acquired. This valuation resulted in a \$4,785,000 increase in the net book value of land and buildings acquired, and was based on current appraisals of such land and buildings.

The Company recognized a core deposit intangible of \$6,614,000 related to the acquisition of North Valley Bancorp's core deposits. The recorded core deposit intangibles represented approximately 0.97% of core deposits for North Valley Bancorp and will be amortized over their useful lives of 7 years.

A valuation of time deposits for North Valley Bancorp was also performed as of the acquisition date. Time deposits were split into similar pools based on size, type of time deposits, and maturity. A discounted cash flow analysis was performed on the pools based on current market rates currently paid on similar time deposits. The valuation resulted in no material fair value discount or premium, and none was recorded.

The fair value of junior subordinated debentures assumed from North Valley Bancorp was estimated using a discounted cash flow method based on the current market rates for similar liabilities. As a result a discount of \$6,664,000 was recorded on the junior subordinated debentures acquired from North Valley Bancorp. The discount on the subordinated debentures will be amortized using the effective yield method the remaining life to maturity of the debentures at acquisition which range from 18 years to 21 years.

Note 3 – Investment Securities

The amortized cost and estimated fair values of investments in debt and equity securities are summarized in the following tables:

No investment securities were sold during the three months ended March 31, 2015 or the three months ended March 31, 2014. Investment securities with an aggregate carrying value of \$153,121,000 and \$143,992,000 at March 31, 2015 and December 31, 2014, respectively, were pledged as collateral for specific borrowings, lines of credit and local agency deposits.

The amortized cost and estimated fair value of debt securities at March 31, 2015 by contractual maturity are shown below. Actual maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. At March 31, 2015, obligations of U.S. government corporations and agencies with a cost basis totaling \$993,365,000 consist almost entirely of mortgage-backed securities whose contractual maturity, or principal repayment, will follow the repayment of the underlying mortgages. For purposes of the following table, the entire outstanding balance of these mortgage-backed securities issued by U.S. government corporations and agencies is categorized based on final maturity date. At March 31, 2015, the Company estimates the average remaining life of these mortgage-backed securities issued by U.S. government corporations and agencies to be approximately 5.2 years. Average remaining life is defined as the time span after which the principal balance has been reduced by half.

Obligations of U.S. government corporations and agencies: Unrealized losses on investments in obligations of U.S. government corporations and agencies are caused by interest rate increases. The contractual cash flows of these securities are guaranteed by U.S. Government Sponsored Entities (principally Fannie Mae and Freddie Mac). It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell and more likely than not will not be required to sell, these investments are not considered other-than-temporarily impaired. At March 31, 2015, 14 debt securities representing obligations of U.S. government corporations and agencies had unrealized losses with aggregate depreciation of (0.21%) from the Company's amortized cost basis.

Obligations of states and political subdivisions: The unrealized losses on investments in obligations of states and political subdivisions were caused by increases in required yields by investors in these types of securities. It is expected that the securities would not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company does not intend to sell and more likely than not will not be required to sell, these investments are not considered other-than-temporarily impaired. At March 31, 2015, 13 debt securities representing obligations of states and political subdivisions had unrealized losses with aggregate depreciation of (2.48%) from the Company's amortized cost basis.

Corporate debt securities: At March 31, 2015, no corporate debt securities had unrealized losses.

Marketable equity securities: At March 31, 2015, no marketable equity securities had unrealized losses.

As part of the on-going monitoring of the credit quality of the Company's loan portfolio, management tracks certain credit quality indicators including, but not limited to, trends relating to (i) the level of criticized and classified loans, (ii) net charge-offs, (iii) non-performing loans, and (iv) delinquency within the portfolio.

The Company utilizes a risk grading system to assign a risk grade to each of its loans. Loans are graded on a scale ranging from Pass to Loss. A description of the general characteristics of the risk grades is as follows:

- Pass This grade represents loans ranging from acceptable to very little or no credit risk. These loans typically meet most if not all policy standards in regard to: loan amount as a percentage of collateral value, debt service coverage, profitability, leverage, and working capital.
- Special Mention This grade represents "Other Assets Especially Mentioned" in accordance with regulatory guidelines and includes loans that display some potential weaknesses which, if left unaddressed, may result in deterioration of the repayment prospects for the asset or may inadequately protect the Company's position in the future. These loans warrant more than normal supervision and attention.
- Substandard This grade represents "Substandard" loans in accordance with regulatory guidelines. Loans within this rating typically exhibit weaknesses that are well defined to the point that repayment is jeopardized. Loss potential is, however, not necessarily evident. The underlying collateral supporting the credit appears to have sufficient value to protect the Company from loss of principal and accrued interest, or the loan has been written down to the point where this is true. There is a definite need for a well defined workout/rehabilitation program.
- Doubtful This grade represents "Doubtful" loans in accordance with regulatory guidelines. An asset classified as Doubtful has all the weaknesses inherent in a loan classified Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and financing plans.
- Loss This grade represents "Loss" loans in accordance with regulatory guidelines. A loan classified as Loss is considered uncollectible and of such little value that its continuance as a bankable asset is not warranted. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off the loan, even though some recovery may be affected in the future. The portion of the loan that is graded loss should be charged off no later than the end of the quarter in which the loss is identified.

The following tables present ending loan balances by loan category and risk grade for the periods indicated:

Consumer loans, whether unsecured or secured by real estate, automobiles, or other personal property, are susceptible to three primary risks; non-payment due to income loss, over-extension of credit and, when the borrower is unable to pay, shortfall in collateral value. Typically non-payment is due to loss of job and will follow general economic trends in the marketplace driven primarily by rises in the unemployment rate. Loss of collateral value can be due to market demand shifts, damage to collateral itself or a combination of the two.

Problem consumer loans are generally identified by payment history of the borrower (delinquency). The Bank manages its consumer loan portfolios by monitoring delinquency and contacting borrowers to encourage repayment, suggest modifications if appropriate, and, when continued scheduled payments become unrealistic, initiate repossession or foreclosure through appropriate channels.

Collateral values may be determined by appraisals obtained through Bank approved, licensed appraisers, qualified independent third parties, public value information (blue book values for autos), sales invoices, or other appropriate means. Appropriate valuations are obtained at initiation of the credit and periodically (every 3-12 months depending on collateral type) once repayment is questionable and the loan has been classified.

Commercial real estate loans generally fall into two categories, owner-occupied and non-owner occupied. Loans secured by owner occupied real estate are primarily susceptible to changes in the business conditions of the related business. This may be driven by, among other things, industry changes, geographic business changes, changes in the individual fortunes of the business owner, and general economic conditions and changes in business cycles. These same risks apply to commercial loans whether secured by equipment or other personal property or unsecured. Losses on loans secured by owner occupied real estate, equipment, or other personal property generally are dictated by the value of underlying collateral at the time of default and liquidation of the collateral. When default is driven by issues related specifically to the business owner, collateral values tend to provide better repayment support and may result in little or no loss. Alternatively, when default is driven by more general economic conditions, underlying collateral generally has devalued more and results in larger losses due to default. Loans secured by non-owner occupied real estate are primarily susceptible to risks associated with swings in occupancy or vacancy and related shifts in lease rates, rental rates or room rates. Most often these shifts are a result of changes in general economic or market conditions or overbuilding and resultant over-supply. Losses are dependent on value of underlying collateral at the time of default. Values are generally driven by these same factors and influenced by interest rates and required rates of return as well as changes in occupancy costs.

Construction loans, whether owner occupied or non-owner occupied commercial real estate loans or residential development loans, are not only susceptible to the related risks described above but the added risks of construction itself including cost over-runs, mismanagement of the project, or lack of demand or market changes experienced at time of completion. Again, losses are primarily related to underlying collateral value and changes therein as described above.

Problem C&I loans are generally identified by periodic review of financial information which may include financial statements, tax returns, rent rolls and payment history of the borrower (delinquency). Based on this information the Bank may decide to take any of several courses of action including demand for repayment, additional collateral or guarantors, and, when repayment becomes unlikely through borrower's income and cash flow, repossession or foreclosure of the underlying collateral.

Collateral values may be determined by appraisals obtained through Bank approved, licensed appraisers, qualified independent third parties, public value information (blue book values for autos), sales invoices, or other appropriate means. Appropriate valuations are obtained at initiation of the credit and periodically (every 3-12 months depending on collateral type) once repayment is questionable and the loan has been classified.

Once a loan becomes delinquent and repayment becomes questionable, a Bank collection officer will address collateral shortfalls with the borrower and attempt to obtain additional collateral. If this is not forthcoming and payment in full is unlikely, the Bank will estimate its probable loss, using a recent valuation as appropriate to the underlying collateral less estimated costs of sale, and charge the loan down to the estimated net realizable amount. Depending on the length of time until ultimate collection, the Bank may revalue the underlying collateral and take additional charge-offs as warranted. Revaluations may occur as often as every 3-12 months depending on the underlying collateral and volatility of values. Final charge-offs or recoveries are taken when collateral is liquidated and actual loss is known. Unpaid balances on loans after or during collection and liquidation may also be pursued through lawsuit and attachment of wages or judgment liens on borrower's other assets.

At March 31, 2015, \$45,641,000 of originated loans were TDR and classified as impaired. The Company had obligations to lend \$4,000 of additional funds on these TDR as of March 31, 2015. At March 31, 2015, \$1,231,000 of PNCI loans were TDR and classified as impaired. The Company had no obligations to lend additional funds on these TDR as of March 31, 2015.

At December 31, 2014, \$45,676,000 of Originated loans were TDRs and classified as impaired. The Company had obligations to lend \$54,000 of additional funds on these TDRs as of December 31, 2014. At December 31, 2014, \$1,307,000 of PNCI loans were TDRs and classified as impaired. The Company had no obligations to lend additional funds on these TDRs as of December 31, 2014.

At March 31, 2014, \$56,179,000 of originated loans were TDRs and classified as impaired. The Company had obligations to lend \$1,000 of additional funds on these TDRs as of March 31, 2014. At March 31, 2014, \$1,179,000 of PNCI loans were TDRs and classified as impaired. The Company had no obligations to lend additional funds on these TDRs as of March 31, 2014.

The following tables show certain information regarding Troubled Debt Restructurings (TDRs) that occurred during the periods indicated:

Modifications classified as TDRs can include one or a combination of the following: rate modifications, term extensions, interest only modifications, either temporary or long-term, payment modifications, and collateral substitutions/additions.

For all new TDRs, an impairment analysis is conducted. If the loan is determined to be collateral dependent, any additional amount of impairment will be calculated based on the difference between estimated collectible value and the current carrying balance of the loan. This difference could result in an increased provision and is typically charged off. If the asset is determined not to be collateral dependent, the impairment is measured on the net present value difference between the expected cash flows of the restructured loan and the cash flows which would have been received under the original terms. The effect of this could result in a requirement for additional provision to the reserve. The effect of these required provisions for the period are indicated above.

Typically if a TDR defaults during the period, the loan is then considered collateral dependent and, if it was not already considered collateral dependent, an appropriate provision will be reserved or charge will be taken. The additional provisions required resulting from default of previously modified TDR's are noted above.

Note 6 - Foreclosed Assets

A summary of the activity in the balance of foreclosed assets follows (in thousands):

	Three months ended March 31, 2015					Three months ended March 31, 2014						
	Noncovered		Covered		Total		Noncovered		Covered			Total

 (33,152)		(33,570)
 42,830		43,447
 16		46
\$ 42,846	\$	43,493
\$	2015 (In the standard	2015 (In thousand \$ 8,883 \$ 38,939 28,160 75,982 (33,152) 42,830 16

Depreciation expense for premises and equipment amounted to \$1,268,000 and \$1,180,000 for the three months ended March 31, 2015 and 2014, respectively.

Note 8 - Cash Value of Life Insurance

A summary of the activity in the balance of cash value of life insurance follows (in thousands):

	Three months ended March 31,					
	2015			2014		
Beginning balance	\$	92,337	\$	52,309		
Increase in cash value of life insurance		675		397		
Ending balance	\$	93,012	\$	52,706		
End of period death benefit	\$	165,847	\$	94,999		
Number of policies owned		189		133		
Insurance companies used		14		6		
Current and former employees and directors covered		60		36		

As of March 31, 2015, the Bank was the owner and beneficiary of 189 life insurance policies, issued by 14 life insurance companies, covering 60 current and former employees and directors. These life insurance policies are recorded on the Company's financial statements at their reported cash (surrender) values. As a result of current tax law and the nature of these policies, the Bank records any increase in cash value of these policies as nontaxable noninterest income. If the Bank decided to surrender any of the policies prior to the death of the insured, such surrender may result in a tax expense related to the life-to-date cumulative increase in cash value of the policy. If the Bank retains such policies until the death of the insured, the Bank would receive nontaxable proceeds from the insurance company equal to the death benefit of the policies. The Bank has entered into Joint Beneficiary Agreements (JBAs) with certain of the insured that for certain of the policies provide some level of sharing of the death benefit, less the cash surrender value, among the Bank and the beneficiaries of the insured upon the receipt of death benefits. See Note 15 of these condensed consolidated financial statements for additional information on JBAs.

Note 9 – Goodwill and Other Intangible Assets

The following table summarizes the Company's goodwill intangible as of the dates indicated:

(Dollar in Thousands)	March 31 2015	, Additions	Reductions	D	December 31, 2014
Goodwill	\$ 63,40	<u>62</u> —	_	\$	63,462

The following table summarizes the Company's core deposit intangibles as of the dates indicated:

(Dollar in Thousands)	N	Iarch 31, 2015	Additions	ductions/ nortization	Fully Depreciated	De	cember 31, 2014
Core deposit intangibles	\$	8,074	_	_	_	\$	8,074
Accumulated amortization		(1,312)	_	\$ (289)	_		(1,023)
Core deposit intangibles, net	\$	6,762	_	\$ (289)		\$	7,051

The Company recorded additions to its CDI of \$6,614,000 in conjunction with the North Valley Bancorp acquisition on October 3, 2014, \$898,000 in conjunction with the Citizens acquisition on September 23, 2011, and \$562,000 in conjunction with the Granite acquisition on May 28, 2010. The following table summarizes the Company's estimated core deposit intangible amortization (dollars in thousands):

E-4:---4-1 C--- D-----:4

Years Ended	Estimated Core Deposit Intangible Amortization					
2015	\$	1,157				
2016		1,157				
2017		1,109				
2018		1,044				
2019		948				
Thereafter	\$	1,636				

Note 10 - Mortgage Servicing Rights

The following tables summarize the activity in, and the main assumptions we used to determine the fair value of mortgage servicing rights ("MSRs") for the periods indicated (dollars in thousands):

	 Three months	ended	March 31,
	2015		2014
Balance at beginning of period	\$ 7,378	\$	6,165
Additions	185		123
Change in fair value	(506)		(181)
Balance at end of period	\$ 7,057	\$	6,107
Contractually specified servicing fees, late fees and ancillary fees			
earned	\$ 534	\$	420
Balance of loans serviced at:			
Beginning of period	\$ 840,288	\$	680,197
End of period	\$ 832,143	\$	672,341
Weighted-average prepayment speed (CPR)	13.0%		10.6%
Weighted-average discount rate	10.0%		10.0%

The changes in fair value of MSRs that occurred during the three months ended March 31, 2015 and 2014 were mainly due to changes in principal balances and changes in estimate life of the MSRs.

Note 11 - Indemnification Asset

A summary of the activity in the balance of indemnification asset follows (in thousands):

	Three months ended March 31					
		2015		2014		
Beginning balance	\$	(349)	\$	206

Amount of indemnification asset (liability) recorded in other assets	\$	114	\$	(220)		
Amount of indemnification asset (liability) recorded in other liabilities	\$	(547)		_		
Ending balance	\$	(433)	\$	(220)		

Note 12 - Other Assets

Other assets were comprised of (in thousands):

	March 31, 2015		De	ecember 31, 2014
Deferred tax asset, net	\$	36,994	\$	37,706
Prepaid expense		3,268		2,034
Software		1,198		1,327
Advanced compensation		825		908
Capital Trusts		1,691		1,690
Miscellaneous other assets		7,026		8,070
Total other assets	\$	51,002	\$	51,735

Note 13 – Deposits

A summary of the balances of deposits follows (in thousands):

	March 31 2015			December 31, 2014
Noninterest-bearing demand	\$	1,034,012	\$	1,083,900
Interest-bearing demand		795,471		782,385
Savings		1,172,257		1,156,126
Time certificates, \$250,000 and over		37,181		38,217
Other time certificates		310,567		319,795
Total deposits	\$	3,349,488	\$	3,380,423

Certificate of deposit balances of \$5,000,000 and \$5,000,000 from the State of California were included in time certificates, \$250,000 and over, at each of March 31, 2015 and December 31, 2014, respectively. The Bank participates in a deposit program offered by the State of California whereby the State may make deposits at the Bank's request subject to collateral and credit worthiness constraints. The negotiated rates on these State deposits are generally more favorable than other wholesale funding sources available to the Bank. Overdrawn deposit balances of \$1,096,000 and \$1,216,000 were classified as consumer loans at March 31, 2015 and December 31, 2014, respectively.

Note 14 – Reserve for Unfunded Commitments

The following tables summarize the activity in reserve for unfunded commitments for the periods indicated (dollars in thousands):

	Three months ended Warch 51,			
	2015			2014
Balance at beginning of period	\$	2,145	\$	2,415
Provision for losses – Unfunded commitments		(130)		(185)
Balance at end of period	\$	2,015	\$	2,230

Note 15 – Other Liabilities

Other liabilities were comprised of (in thousands):

	March 31, 2015			December 31, 2014		
Deferred compensation	\$	7,484	\$	7,408		
Pension liability		27,074		26,798		
Joint beneficiary agreements		2,785		2,728		
Miscellaneous other liabilities		15,913		12,258		
Total other liabilities	\$	53,256	\$	49,192		

Note 16 – Other Borrowings

A summary of the balances of other borrowings follows:

	N	1arch 31, 2015	De	2014
Other colleteralized horrowings fixed rate as of March 21, 2015 of		(in the	housand	ls)
Other collateralized borrowings, fixed rate, as of March 31, 2015 of 0.05%, payable on April 1, 2015	\$	9,096	\$	9,276
Total other borrowings	\$	9,096	\$	9,276

The Company did not enter into any repurchase agreements during the three months ended March 31, 2015 or the year ended December 31, 2014.

The Company had \$9,096,000 and \$9,276,000 of other collateralized borrowings at March 31, 2015 and December 31, 2014, respectively. Other collateralized borrowings are generally overnight maturity borrowings from non-financial institutions that are collateralized by securities owned by the Company. As of March 31, 2015, the Company has pledged as collateral and sold under agreements to repurchase investment securities with fair value of \$9,096,000 under these other collateralized borrowings.

The Company maintains a collateralized line of credit with the Federal Home Loan Bank of San Francisco. Based on the FHLB stock requirements at March 31, 2015, this line provided for maximum borrowings of \$978,743,000 of which none was outstanding, leaving \$978,743,000 available. As of March 31, 2015, the Company has designated loans totaling \$1,567,140,000 as potential collateral under this collateralized line of credit with the FHLB.

The Company maintains a collateralized line of credit with the San Francisco Federal Reserve Bank. As of March 31, 2015, this line provided for maximum borrowings of \$138,447,000 of which none was outstanding, leaving \$138,447,000 available. As of March 31, 2015, the Company has designated investment securities with fair value of \$427,000 and loans totaling \$205,883,000 as potential collateral under this collateralized line of credit with the San Francisco Federal Reserve Bank.

The Company has available unused correspondent banking lines of credit from commercial banks totaling \$15,000,000 for federal funds transactions at March 31, 2015.

Note 17 - Junior Subordinated Debt

On July 31, 2003, the Company formed a subsidiary business trust, TriCo Capital Trust I, to issue trust preferred securities. Concurrently with the issuance of the trust preferred securities, the trust issued 619 shares of common stock to the Company for \$1,000 per share or an aggregate of \$619,000. In addition, the Company issued a junior subordinated debenture to the trust in the amount of \$20,619,000. The terms of the junior subordinated debenture are materially consistent with the terms of the trust preferred securities issued by TriCo Capital Trust I. Also on July 31, 2003, TriCo Capital Trust I completed an offering of 20,000 shares of cumulative trust preferred securities for cash in an aggregate amount of \$20,000,000. The trust preferred securities are mandatorily redeemable upon maturity on October 7, 2033 with an interest rate that resets quarterly at three-month LIBOR plus 3.05%. TriCo Capital Trust I has the right to redeem the trust preferred securities on or after October 7, 2008. The trust preferred securities were issued through an underwriting syndicate to which the Company paid underwriting fees of \$7.50 per trust preferred security or an

aggregate of \$150,000. The net proceeds of \$19,850,000 were used to finance the opening of new branches, improve bank services and technology, repurchase shares of the Company's common stock under its repurchase plan and increase the Company's capital.

On June 22, 2004, the Company formed a second subsidiary business trust, TriCo Capital Trust II, to issue trust preferred securities. Concurrently with the issuance of the trust preferred securities, the trust issued 619 shares of common stock to the Company for \$1,000 per share or an aggregate of \$619,000. In addition, the Company issued a junior subordinated debenture to the trust in the amount of \$20,619,000. The terms of the junior subordinated debenture are materially consistent with the terms of the trust preferred securities issued by TriCo Capital Trust II. Also on June 22, 2004, TriCo Capital Trust II completed an offering of 20,000 shares of cumulative trust preferred securities for cash in an aggregate amount of \$20,000,000. The trust preferred securities are mandatorily redeemable upon maturity on July 23, 2034 with an interest rate that resets quarterly at three-month LIBOR plus 2.55%. TriCo Capital Trust II has the right to redeem the trust preferred securities on or after July 23, 2009. The trust preferred securities were issued through an underwriting syndicate to which the Company paid underwriting fees of \$2.50 per trust preferred security or an aggregate of \$50,000. The net proceeds of \$19,950,000 were used to finance the opening of new branches, improve bank services and technology, repurchase shares of the Company's common stock under its repurchase plan and increase the Company's capital.

As a result of the Company's acquisition of North Valley Bancorp on October 3, 2014, the Company assumed the junior subordinated debentures issued by North Valley Bancorp to North Valley Capital Trusts II, III & IV with face amounts of \$6,186,000, \$5,155,000 and \$10,310,000, respectively. Also, as a result of the North Valley Bancorp acquisition, the Company acquired common stock interests in North Valley Capital Trusts II, III and IV with face valley of \$186,000, \$155,000, and \$310,000, respectively. At the acquisition date of October 3, 2014, the junior subordinated debentures associated with North Valley Capital Trust II, III and IV were recorded on the Company's books at their fair values of \$5,006,000, \$3,918,000, and \$6,063,000, respectively. The related fair value discounts to face value of these debentures will be amortized over the remaining time to maturity for each of these debentures using the effective interest method. Similar, and proportional, discounts were applied to the acquired common stock interest in North Valley Capital Trusts II, III and IV, and these discounts will be proportionally amortized over the remaining time to maturity for each related debenture.

TriCo Capital Trusts I and II, and North Valley Capital Trusts II, III and IV are collectively referred to as the Capital Trusts. The recorded book values of the junior subordinated debentures issued by the Capital Trusts are reflected as junior subordinated debt in the Company's consolidated balance sheets. The common stock issued by the Capital Trusts and owned by the Company is recorded in other assets in the Company's consolidated balance sheets. The recorded book value of the debentures issued by the Capital Trusts, less the recorded book value of the common stock of the Capital Trusts owned by the Company, continues to qualify as Tier 1 or Tier 2 capital under interim guidance issued by the Board of Governors of the Federal Reserve System.

The following table summarizes the terms and recorded balance of each subordinated debenture as of the date indicated (dollars in thousands):

				Coupon Rate	As of March 31, 2015			
Subordinated Debt Series	Maturity Date		Face Value	(Variable) 3 mo. LIBOR +	Current Coupon Rate		Recorded ook Value	
TriCo Cap Trust I	10/7/2033	\$	20,619	3.05%	3.30%	\$	20,619	
TriCo Cap Trust II	7/23/2034		20,619	2.55%	2.81%		20,619	
North Valley Trust II	4/24/2033		6,186	3.25%	3.50%		5,025	
North Valley Trust III	4/24/2034		5,155	2.80%	3.06%		3,936	
North Valley Trust IV	3/15/2036		10,310	1.33%	1.60%		6,121	
		\$	62,889			\$	56,320	

Note 18 – Commitments and Contingencies

Restricted Cash Balances— Reserves (in the form of deposits with the San Francisco Federal Reserve Bank) of \$64,997,000 and \$57,616,000 were maintained to satisfy Federal regulatory requirements at March 31, 2015 and December 31, 2014. These reserves are included in cash and due from banks in the accompanying consolidated balance sheets.

Lease Commitments— The Company leases 47 sites under non-cancelable operating leases. The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with the option to extend the lease term one or more times following expiration of the initial term. The Company currently does not have any capital leases.

At December 31, 2014, future minimum commitments under non-cancelable operating leases with initial or remaining terms of one year or more are as follows:

		Operating Leases
2015	_	(in thousands)
2015	\$	3,419
2016		2,510
2017		1,856
2018		1,323
2019		859
Thereafter		1,180
Future minimum lease payments	\$	11,147

Rent expense under operating leases was \$959,000 and \$755,000 during the three months ended March 31, 2015 and 2014, respectively. Rent expense was offset by rent income of \$48,000 and \$54,000 during the three months ended March 31, 2015 and 2014, respectively.

Financial Instruments with Off-Balance-Sheet Risk— The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit, and deposit account overdraft privilege. Those instruments involve, to varying degrees, elements of risk in excess of the amount recognized in the balance sheet. The contract amounts of those instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

The Company's exposure to loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit written is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The Company's exposure to loss in the event of nonperformance by the other party to the financial instrument for deposit account overdraft privilege is represented by the overdraft privilege amount disclosed to the deposit account holder.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)		March 31, 2015		December 31, 2014	
Financial instruments whose amounts represent risk:					
Commitments to extend credit:					
Commercial loans	\$	195,295	\$	177,557	
Consumer loans		392,005		392,705	
Real estate mortgage loans		40,014		36,139	
Real estate construction loans		40,935		49,774	
Standby letters of credit		16,307		17,531	
Deposit account overdraft privilege	\$	99,002	\$	101,060	

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates of one year or less or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company upon extension of credit, is based on Management's credit evaluation of the customer. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, residential properties, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support private borrowing arrangements. Most standby letters of credit are issued for one year or less. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. Collateral requirements vary, but in general follow the requirements for other loan facilities.

Deposit account overdraft privilege amount represents the unused overdraft privilege balance available to the Company's deposit account holders who have deposit accounts covered by an overdraft privilege. The Company has established an overdraft privilege for

certain of its deposit account products whereby all holders of such accounts who bring their accounts to a positive balance at least once every thirty days receive the overdraft privilege. The overdraft privilege allows depositors to overdraft their deposit account up to a predetermined level. The predetermined overdraft limit is set by the Company based on account type.

Legal Proceedings— The Bank owns 13,396 shares of Class B common stock of Visa Inc. which are convertible into Class A common stock at a conversion ratio of 1.648265 per Class B share. As of March 31, 2015, the value of the Class A shares was \$65.41 per share. Utilizing the conversion ratio, the value of unredeemed Class A equivalent shares owned by the Bank was \$1,444,000 as of March 31, 2015, and has not been reflected in the accompanying financial statements. The shares of Visa Class B common stock are restricted and may not be transferred. Visa Member Banks are required to fund an escrow account to cover settlements, resolution of pending litigation and related claims. If the funds in the escrow account are insufficient to settle all the covered litigation, Visa may sell additional Class A shares, use the proceeds to settle litigation, and further reduce the conversion ratio. If funds remain in the escrow account after all litigation is settled, the Class B conversion ratio will be increased to reflect that surplus.

On January 24, 2014, a putative shareholder class action lawsuit was filed against TriCo, North Valley Bancorp and certain other defendants in connection with TriCo entering into the merger agreement with North Valley Bancorp. The lawsuit, which was filed in the Shasta County, California Superior Court, alleges that the members of the North Valley Bancorp board of directors breached their fiduciary duties to North Valley Bancorp shareholders by approving the proposed merger for inadequate consideration; approving the transaction in order receive benefits not equally shared by other North Valley Bancorp shareholders; entering into the merger agreement containing preclusive deal protection devices; and failing to take steps to maximize the value to be paid to the North Valley Bancorp shareholders. The lawsuit alleges claims against TriCo for aiding and abetting these alleged breaches of fiduciary duties. The plaintiff seeks, among other things, declaratory and injunctive relief concerning the alleged breaches of fiduciary duties injunctive relief prohibiting consummation of the merger, rescission, attorneys' of the merger agreement, fees and costs, and other and further relief. On July 31, 2014 the defendants entered into a memorandum of understanding with the plaintiffs regarding the settlement of this lawsuit. In connection with the settlement contemplated by the memorandum of understanding and in consideration for the full settlement and release of all claims, TriCo and North Valley Bancorp agreed to make certain additional disclosures related to the proposed merger, which are contained in a Current Report on Form 8-K filed by each of the companies. The memorandum of understanding contemplates that the parties will negotiate in good faith and use their reasonable best efforts to enter into a stipulation of settlement. The stipulation of settlement will be subject to customary conditions, including court approval following notice to North Valley Bancorp's shareholders. In the event that the parties enter into a stipulation of settlement, a hearing will be scheduled at which the court will consider the settlement. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that the court will approve the settlement even if the parties were to enter into such stipulation. In such event, the proposed settlement as contemplated by the memorandum of understanding may be terminated.

On September 15, 2014, a former Personal Banker at one of the Bank's in-store branches filed a Class Action Complaint against the Bank in Butte County Superior Court, alleging causes of action related to the observance of meal periods. Plaintiff seeks to represent a class of "current and former hourly-paid or non-exempt 'personal bankers', or employees with the same or similar job duties, employed by Defendants within the State of California during the preceding four years." The Bank filed an Answer to the Complaint on November 6, 2014, denies the charges, and the Bank intends to vigorously defend the lawsuit against class certification and liability.

On January 20, 2015, a current Personal Banker at one of the Bank's in-store branches filed a First Amended Complaint against Tri Counties Bank and TriCo Bancshares, dba Tri Counties Bank, in Sacramento County Superior Court, alleging causes of action related to wage statement violations. Plaintiff seeks to represent a class of current and former exempt and non-exempt employees who worked for the Bank "during the time period beginning October 18, 2013 through the date of the filing of this action". The Company and the Bank have not yet responded to the First Amended Complaint, deny the charges, and intend to vigorously defend the lawsuit against class certification and liability.

Neither the Company nor its subsidiaries, are party to any other material pending legal proceeding, nor is their property the subject of any material pending legal proceeding, except routine legal proceedings arising in the ordinary course of their business. None of these proceedings is expected to have a material adverse impact upon the Company's business, consolidated financial position or results of operations.

Other Commitments and Contingencies—The Company has entered into employment agreements or change of control agreements with certain officers of the Company providing severance payments and accelerated vesting of benefits under supplemental retirement agreements to the officers in the event of a change in control of the Company and termination for other than cause or after a substantial and material change in the officer's title, compensation or responsibilities.

Mortgage loans sold to investors may be sold with servicing rights retained, with only the standard legal representations and warranties regarding recourse to the Bank. Management believes that any liabilities that may result from such recourse provisions are not significant.

Note 19 - Shareholders' Equity

Dividends Paid

The Bank paid to the Company cash dividends in the aggregate amounts of \$2,120,000 and \$2,050,000 during the three months ended March 31, 2015 and 2014 respectively. The Bank is regulated by the Federal Deposit Insurance Corporation (FDIC) and the State of California Department of Business Oversight. Absent approval from the Commissioner of the Department of Business Oversight, California banking laws generally limit the Bank's ability to pay dividends to the lesser of (1) retained earnings or (2) net income for the last three fiscal years, less cash distributions paid during such period. Under this law, at December 31, 2014, the Bank may pay dividends of \$52,798,000.

Shareholders' Rights Plan

On June 25, 2001, the Company announced that its Board of Directors adopted and entered into a Shareholder Rights Agreement designed to protect and maximize shareholder value and to assist the Board of Directors in ensuring fair and equitable benefit to all shareholders in the event of a hostile bid to acquire the Company. The Company adopted this Rights Agreement to protect shareholders from coercive or otherwise unfair takeover tactics. In general terms, the Rights Plan would have imposed a significant penalty upon any person or group that acquired 15% or more of the Company's outstanding common stock without approval of the Company's Board of Directors.

On June 4, 2014, the Company entered into an amendment to its Rights Agreement that accelerated the expiration of the Rights from July 10, 2021 to July 1, 2014 and had the effect of terminating the Rights Agreement as of that date. At the time of the termination, all Rights distributed to holders of the Company's common stock pursuant to the Rights Agreement expired.

Stock Repurchase Plan

On August 21, 2007, the Board of Directors adopted a plan to repurchase, as conditions warrant, up to 500,000 shares of the Company's common stock on the open market. The timing of purchases and the exact number of shares to be purchased will depend on market conditions. The 500,000 shares authorized for repurchase under this stock repurchase plan represented approximately 3.2% of the Company's 15,814,662 outstanding common shares as of August 21, 2007. This stock repurchase plan has no expiration date. As of March 31, 2015, the Company had repurchased 166,600 shares under this plan.

Stock Repurchased Under Equity Compensation Plans

During the three months ended March 31, 2015 and 2014, employees tendered 21,461 and 100,385 shares, respectively, of the Company's common stock with market value of \$509,000, and \$2,482,000, respectively, in lieu of cash to exercise options to purchase shares of the Company's stock and to pay income taxes related to such exercises as permitted by the Company's shareholder-approved equity compensation plans. The tendered shares were retired. The market value of tendered shares is the last market trade price at closing on the day an option is exercised. Stock repurchased under equity incentive plans are not included in the total of stock repurchased under the stock repurchase plan announced on August 21, 2007.

Note 20 – Stock Options and Other Equity-Based Incentive Instruments

In March 2009, the Company's Board of Directors adopted the TriCo Bancshares 2009 Equity Incentive Plan (2009 Plan) covering officers, employees, directors of, and consultants to, the Company. The 2009 Plan was approved by the Company's shareholders in May 2009. The 2009 Plan allows for the granting of the following types of "stock awards" (Awards): incentive stock options, nonstatutory stock options, performance awards, restricted stock, restricted stock unit (RSU) awards and stock appreciation rights. RSUs that vest based solely on the grantee remaining in the service of the Company for a certain amount of time, are referred to as "service condition vesting RSUs". RSUs that vest based on the grantee remaining in the service of the Company for a certain amount of time and a market condition such as the total return of the Company's common stock versus the total return of an index of bank stocks, are referred to as "market plus service condition vesting RSUs". In May 2013, the Company's shareholders approved an amendment to the 2009 Plan increasing the maximum aggregate number of shares of TriCo's common stock which may be issued pursuant to or subject to Awards from 650,000 to 1,650,000. The number of shares available for issuance under the 2009 Plan is reduced by: (i) one share for each share of common stock issued pursuant to a stock option or a Stock Appreciation Right and (ii) two shares for each share of common stock issued pursuant to a Performance Award, a Restricted Stock Award or a Restricted Stock Unit Award. When Awards made under the 2009 Plan expire or are forfeited or cancelled, the underlying shares will become available for

future Awards under the 2009 Plan. To the extent that a share of common stock pursuant to an Award that counted as two shares against the number of shares again becomes available for issuance under the 2009 Plan, the number of shares of common stock available for issuance under the 2009 Plan shall increase by two shares. Shares awarded and delivered under the 2009 Plan may be authorized but unissued, or reacquired shares. As of March 31, 2015, 694,000 options for the purchase of common shares, and 46,427 restricted stock units were outstanding, and 822,146 shares remain available for issuance, under the 2009 Plan.

In May 2001, the Company adopted the TriCo Bancshares 2001 Stock Option Plan (2001 Plan) covering officers, employees, directors of, and consultants to, the Company. Under the 2001 Plan, the option exercise price cannot be less than the fair market value of the Common Stock at the date of grant except in the case of substitute options. Options for the 2001 Plan expire on the tenth anniversary of the grant date. Vesting schedules under the 2001 Plan are determined individually for each grant. As of March 31, 2015, 361,850 options for the purchase of common shares were outstanding under the 2001 Plan. As of May 2009, as a result of the shareholder approval of the 2009 Plan, no new options may be granted under the 2001 Plan.

Stock option activity during the three months ended March 31, 2015 is summarized in the following table:

	Number of Shares		Option I			Weighted Average Exercise Price	Weighted Average Fair Value on Date of Grant
Outstanding at December 31, 2014	1,102,850	\$ 12	.63 t	o \$	25.91	\$ 18.25	
Options granted	_	-	_ t	О	_	_	_
Options exercised	(47,000)	\$ 15	.34 t	o \$	19.46	\$ 18.86	
Options forfeited	<u> </u>	-	_ t	o	_	_	
Outstanding at March 31, 2015	1,055,850	\$ 12	.63 t	o \$	25.91	\$ 18.22	

The following table shows the number, weighted-average exercise price, intrinsic value, and weighted average remaining contractual life of options exercisable, options not yet exercisable and total options outstanding as of March 31, 2015:

		Currently Exercisable	Currently Not Exercisable	Total Outstanding
Number of options		772,850	283,000	1,055,850
Weighted average exercise price	\$	18.60	\$ 17.20	\$ 18.22
Intrinsic value (in thousands)	\$	4,334	\$ 1,962	\$ 6,296
Weighted average remaining contractual term (yrs.)		4.4	7.3	5.2

The 283,000 options that are currently not exercisable as of March 31, 2015 are expected to vest, on a weighted-average basis, over the next 2.3 years, and the Company is expected to recognize \$1,562,000 of pre-tax compensation costs related to these options as they vest. The Company did not modify any option grants during 2014 or the three months ended March 31, 2015.

Restricted stock unit (RSU) activity is summarized in the following table for the dates indicated:

	Service Condition Vesting RSUs M		Market Plus Service Condition Vesting R			
	Number of RSUs	Weighted Average Fair Value on Date of Grant	Number of RSUs	Weighted Average Fair Value on Date of Grant		
Outstanding at December 31, 2014	30,920		15,366			
RSUs granted	<u> </u>	_	_	_		
RSUs added through dividend credits	141		_			
RSUs released	_		_			
RSUs forfeited/expired	_		_			
Outstanding at March 31, 2015	31,061		15,366			

The 31,061 of service condition vesting RSUs outstanding as of March 31, 2015 include a feature whereby each RSU outstanding is credited with a dividend amount equal to any common stock cash dividend declared and paid, and the credited amount is divided by the closing price of the Company's stock on the dividend payable date to arrive at an additional amount of RSUs outstanding under the original grant. The 31,061 of service condition vesting RSUs outstanding as of March 31, 2015 are expected to vest, and be released, on a weighted-average basis, over the next 2.6 years. The Company is expected to recognize \$489,000 of pre-tax compensation costs related to these service condition vesting RSUs between March 31, 2015 and their vesting dates. During the three months ended

March 31, 2015, the Company did not modify any service condition vesting RSUs. During the three months ended December 31, 2014, the Company modified 13,749 service condition vesting RSUs that were granted on August 11, 2014 such that their vesting schedule was changed from 100% vesting on August 11, 2018 to 25% vesting on each of August 11, 2015, 2016, 2017 and 2018. During the nine months ended September 30, 2014, the Company did not modify any service condition vesting RSUs.

The 15,366 of market plus service condition vesting RSUs that are currently outstanding as of March 31, 2015 are expected to vest, and be released, on a weighted-average basis, over the next 2.4 years. The Company is expected to recognize \$259,000 of pre-tax compensation costs related to these RSUs between March 31, 2015 and their vesting dates. As of March 31, 2015, the number of market plus service condition vesting RSUs outstanding that will actually vest, and be released, may be reduced to zero or increased to 23,049 depending on the total return of the Company's common stock versus the total return of an index of bank stocks from the grant date to the vesting date. The Company did not modify any market plus service condition vesting RSUs during the three months ended March 31, 2015 or during the year ended December 31, 2014.

Note 21 – Noninterest Income and Expense

The components of other noninterest income were as follows (in thousands):

	Three months ended March 3				
	2015			2014	
Service charges on deposit accounts	\$	3,600	\$	2,690	
ATM and interchange fees		3,002		2,013	
Other service fees		714		520	
Mortgage banking service fees		534		420	
Change in value of mortgage servicing rights		(506)		(181)	
Total service charges and fees		7,344		5,462	
Gain on sale of loans		622		464	
Commissions on sale of non-deposit investment products		965		771	
Increase in cash value of life insurance		675		397	
Change in indemnification asset		(65)		(412)	
Gain on sale of foreclosed assets		311		1,227	
Sale of customer checks		128		101	
Lease brokerage income		137		107	
Loss on disposal of fixed assets		(84)		(1)	
Other		147		179	
Total other noninterest income		2,836		2,833	
Total noninterest income	\$	10,180	\$	8,295	

Mortgage loan servicing fees, net of change in fair value of mortgage loan servicing rights, totaling \$28,000 and \$239,000 were recorded in service charges and fees noninterest income for the three months ended March 31, 2015 and 2014, respectively.

The components of noninterest expense were as follows (in thousands):

	Three months ended Man				
		2015		2014	
Base salaries, net of deferred loan origination costs Incentive compensation Benefits and other compensation costs	\$	11,744 1,596 4,760	\$	8,866 1,123 3,314	
Total salaries and benefits expense		18,100		13,303	
Occupancy		2,417		1,962	
Equipment		1,414		1,036	
Data processing and software		1,952		1,178	
ATM network charges		770		643	
Telecommunications		886		580	
Postage		312		227	
Courier service		248		234	
Advertising		808		342	
Assessments		651		521	
Operational losses		124		177	
Professional fees		1,119		614	
Foreclosed assets expense		98		158	
Provision for foreclosed asset losses		67		36	
Change in reserve for unfunded commitments		(130)		(185)	
Intangible amortization		289		52	
Merger expense		586		225	
Other		2,571		2,214	
Total other noninterest expense		14,182		10,014	
Total noninterest expense	\$	32,282	\$	23,317	
Merger expense:					
Data processing and software	\$	108		_	
Professional fees		120	\$	225	
Other		358			
Total merger expense	\$	586	\$	225	

Note 22 – Income Taxes

The provisions for income taxes applicable to income before taxes differ from amounts computed by applying the statutory Federal income tax rates to income before taxes. The effective tax rate and the statutory federal income tax rate are reconciled for the periods indicated as follows:

	Three months ended March 31,				
	2015	2014			
Federal statutory income tax rate	35.0%	35.0%			
State income taxes, net of federal tax benefit	6.9	6.9			
Tax-exempt interest on municipal obligations	(0.4)	(0.4)			
Increase in cash value of insurance policies	(1.7)	(1.1)			
Other	0.8	0.2			
Effective Tax Rate	40.6%	40.6%			

Note 23 - Earnings Per Share

Basic earnings per share represents income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustments to income that would result from assumed issuance. Potential common shares that may be issued by the Company relate solely from outstanding stock options, and are determined using the treasury stock method. Earnings per share have been computed based on the following:

	Three months ended March 31,			
(In thousands)		2015		2014
Net income	\$	8,336	\$	7,365
Average number of common shares outstanding		22,727		16,097
Effect of dilutive stock options and restricted stock		223		225
Average number of common shares outstanding used to calculate diluted earnings per share		22,950		16,322
Options excluded from diluted earnings per share because the effect of these options was antidilutive		23		101
Restricted stock excluded from diluted earnings per share because the effect of these restricted stock was antidilutive		_		n/a

Note 24 - Comprehensive Income

Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income. The components of other comprehensive income and related tax effects are as follows:

		Three Mor	nths End	ded
	,	2015		2014
(in thousands) Unrealized holding gains (losses) on available for sale securities before reclassifications Amounts reclassified out of accumulated other comprehensive income-	\$	15 —	\$	(105)
Unrealized holding gains (losses) on available for sale securities after reclassifications Tax effect		15 (6)		(105) 45
Unrealized holding gains (losses) on available for sale securities, net of tax		9		(60)
Change in unfunded status of the supplemental retirement plans before reclassifications Amounts reclassified out of accumulated other comprehensive income:		_		_
Amortization of prior service cost Amortization of actuarial losses		(14) 206		5 4
Total amounts reclassified out of accumulated other comprehensive income		192		9
Change in unfunded status of the supplemental retirement plans after reclassifications Tax effect		192 (81)		9 (4)
Change in unfunded status of the supplemental retirement plans, net of tax		111		5
Change in joint beneficiary agreement liability before reclassifications Amounts reclassified out of accumulated other comprehensive income				
Change in joint beneficiary agreement liability after reclassifications Tax effect		_		_
Change in joint beneficiary agreement liability, net of tax	-			
Total other comprehensive gain (loss)	\$	120	\$	(55)

The components of accumulated other comprehensive income, included in shareholders' equity, are as follows:

	 March 31, 2015	Ι	December 31, 2014
	(in t	housan	ds)
Net unrealized gains on available for sale securities	\$ 4,055	\$	4,040

Note 25 - Retirement Plans

401(k) Plan

The Company sponsors a 401(k) Plan whereby substantially all employees age 21 and over with 90 days of service may participate. Participants may contribute a portion of their compensation subject to certain limits based on federal tax laws. The Company does not contribute to the 401(k) Plan. The Company did not incur any material expenses attributable to the 401(k) Plan during 2014 or the three months ended March 31, 2015.

Employee Stock Ownership Plan

Substantially all employees with at least one year of service are covered by a discretionary employee stock ownership plan (ESOP). Contributions are made to the plan at the discretion of the Board of Directors. Contributions to the plan totaling \$368,000 and \$195,000 during the three months ended March 31, 2015 and 2014, respectively, are included in salary expense. Company shares owned by the ESOP are paid dividends and included in the calculation of earnings per share exactly as other common shares outstanding.

Deferred Compensation Plans

The Company has deferred compensation plans for certain directors and key executives, which allow certain directors and key executives designated by the Board of Directors of the Company to defer a portion of their compensation. The Company has purchased insurance on the lives of the participants and intends to hold these policies until death as a cost recovery of the Company's deferred compensation obligations of \$7,484,000 and \$7,408,000 at March 31, 2015 and December 31, 2014, respectively. Earnings credits on deferred balances totaling \$149,000 and \$152,000 during the three months ended March 31, 2015 and 2014, respectively, are included in noninterest expense.

Supplemental Retirement Plans

The Company has supplemental retirement plans for current and former directors and key executives. These plans are non-qualified defined benefit plans and are unsecured and unfunded. The Company has purchased insurance on the lives of the participants and intends (but is not required) to use the cash values of these policies to pay the retirement obligations. The following table sets forth the net periodic benefit cost recognized for the plans:

		ended Ma	2014			
	(In thousands)					
Net pension cost included the following components:						
Service cost-benefits earned during the period	\$	256	\$	163		
Interest cost on projected benefit obligation		239		174		
Amortization of net obligation at transition		_		_		
Amortization of prior service cost		(14)		35		
Recognized net actuarial loss		206		4		
Net periodic pension cost	\$	687	\$	376		

During the three months ended March 31, 2015 and 2014, the Company contributed and paid out as benefits \$219,000 and \$125,000, respectively, to participants under the plans. For the year ending December 31, 2015, the Company expects to contribute and pay out as benefits \$1,194,000 to participants under the plans.

Note 26 – Related Party Transactions

Certain directors, officers, and companies with which they are associated were customers of, and had banking transactions with, the Company or the Bank in the ordinary course of business.

The following table summarizes the activity in these loans for 2015 and 2014 (in thousands):

Balance December 31, 2013	\$ 2,636
Advances/new loans	2,106
Removed/payments	(1,610)
Balance December 31, 2014	\$ 3,132
Advances/new loans	235
Removed/payments	 (416)
Balance March 31, 2015	\$ 2,951

Director Chrysler is a principal owner and CEO of Modern Building Inc. Modern Building Inc. provided construction services to the Company related to new and existing Bank facilities for aggregate payments of \$166,000 during the three months ended March 31, 2015 and \$1,181,000 during the year ended December 31, 2014.

Note 27 – Fair Value Measurement

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. In estimating fair value, the Company utilizes valuation techniques that are consistent with the market approach, income approach, and/or the cost approach. Inputs to valuation techniques include the assumptions that market participants would use in pricing an asset or liability including assumptions about the risk inherent in a particular valuation technique, the effect of a restriction on the sale or use of an asset and the risk of nonperformance. Securities available-for-sale and mortgage servicing rights are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets on a nonrecurring basis, such as loans held for sale, loans held for investment and certain other assets. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or impairment write-downs of individual assets.

The Company groups assets and liabilities at fair value in three levels, based on the markets in which the assets and liabilities are traded and the observable nature of the assumptions used to determine fair value. These levels are:

- Level 1 Valuation is based upon quoted prices for identical instruments traded in active markets.
- Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.
- Level 3 Valuation is generated from model-based techniques that use at least one significant assumption not observable in the market. These unobservable assumptions reflect estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of option pricing models, discounted cash flow models and similar techniques.

Securities available for sale – Securities available for sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities. The Company had no securities classified as Level 3 during any of the periods covered in these financial statements.

Loans held for sale – Loans held for sale are carried at the lower of cost or fair value. The fair value of loans held for sale is based on what secondary markets are currently offering for loans with similar characteristics. As such, we classify those loans subjected to nonrecurring fair value adjustments as Level 2.

Impaired originated and PNCI loans – Originated and PNCI loans are not recorded at fair value on a recurring basis. However, from time to time, an originated or PNCI loan is considered impaired and an allowance for loan losses is established. Originated and PNCI loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. The fair value of an impaired originated or PNCI loan is estimated using one of several methods, including collateral value, fair value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired originated and PNCI loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. Impaired originated and PNCI loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value which uses substantially observable data, the Company records the impaired originated or PNCI loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value, or the appraised value contains a significant unobservable assumption, such as deviations from comparable sales, and there is no observable market price, the Company records the impaired originated or PNCI loan as nonrecurring Level 3.

Foreclosed assets – Foreclosed assets include assets acquired through, or in lieu of, loan foreclosure. Foreclosed assets are held for sale and are initially recorded at fair value at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, management periodically performs valuations and the assets are carried at the lower of carrying amount or fair value less cost to sell. When the fair value of foreclosed assets is based on an observable market price or a current appraised value which uses substantially observable data, the Company records the impaired originated loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value, or the appraised value contains a significant unobservable assumption, such as deviations from comparable sales, and there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3. Revenue and expenses from operations and changes in the valuation allowance are included in other noninterest expense.

Mortgage servicing rights – Mortgage servicing rights are carried at fair value. A valuation model, which utilizes a discounted cash flow analysis using a discount rate and prepayment speed assumptions is used in the computation of the fair value measurement. While the prepayment speed assumption is currently quoted for comparable instruments, the discount rate assumption currently requires a significant degree of management judgment and is therefore considered an unobservable input. As such, the Company classifies mortgage servicing rights subjected to recurring fair value adjustments as Level 3. Additional information regarding mortgage servicing rights can be found in Note 10 in the consolidated financial statements at Item 1 of this report.

The table below presents the recorded amount of assets and liabilities measured at fair value on a recurring basis (in thousands):

Fair value at March 31, 2015		Total	Level 1		Level 2]	Level 3
Securities available for sale: Obligations of U.S. government corporations and agencies	\$	210,535	_	\$	210,535		_

Securities available for sale: Obligations of U.S. government corporations and agencies Obligations of states and political subdivisions	\$	75,120 3,175	Level 1 	\$	75,120 3,175	1	Level 3
Securities available for sale: Obligations of U.S. government corporations and agencies Obligations of states and political subdivisions Corporate debt securities	\$	75,120 3,175 1,908	_ _ _	\$	75,120]	Level 3
Securities available for sale: Obligations of U.S. government corporations and agencies Obligations of states and political subdivisions Corporate debt securities Marketable equity securities	\$	75,120 3,175 1,908 3,002	\$ Level 1	\$	75,120 3,175		_ _ _ _
Securities available for sale: Obligations of U.S. government corporations and agencies Obligations of states and political subdivisions Corporate debt securities	\$	75,120 3,175 1,908	_ _ _	\$	75,120 3,175	\$	Level 3 7,378
Securities available for sale: Obligations of U.S. government corporations and agencies Obligations of states and political subdivisions Corporate debt securities Marketable equity securities	\$	75,120 3,175 1,908 3,002	_ _ _	\$	75,120 3,175		_ _ _ _

Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally corresponds with the Company's quarterly valuation process. There were no transfers between any levels during the three months ended March 31, 2015 or the year ended December 31, 2014.

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the time periods indicated. Had there been any transfer into or out of Level 3 during the time periods indicated, the amount included in the "Transfers into (out of) Level 3" column would represent the beginning balance of an item in the period (interim quarter) during which it was transferred (in thousands):

	_	Transfers Beginning into (out of) Balance Level 3]	Change Included Earnings	Is	suances	Ending Balance
Three months ended March 31,								
2015: Mortgage servicing rights	\$	7,378	_	\$	(506)	\$	185	\$ 7,057
2014: Mortgage servicing rights	\$	6,165	_	\$	(181)	\$	123	\$ 6,107

The Company's method for determining the fair value of mortgage servicing rights is described in Note 1. The key unobservable inputs used in determining the fair value of mortgage servicing rights are mortgage prepayment speeds and the discount rate used to discount cash projected cash flows. Generally, any significant increases in the mortgage prepayment speed and discount rate utilized in the fair value measurement of the mortgage servicing rights will result in a negative fair value adjustments (and decrease in the fair value measurement). Conversely, a decrease in the mortgage prepayment speed and discount rate will result in a positive fair value adjustment (and increase in the fair value measurement). Note 10 contains additional information regarding mortgage servicing rights.

The following table presents quantitative information about recurring Level 3 fair value measurements at March 31, 2015:

	Fair Value Valuation (in thousands) Technique		Unobservable Inputs	Range, Weighted Average	
Mortgage Servicing Rights	\$	7,057	Discounted cash flow	Constant prepayment rate Discount rate	6.0%-23.1%, 13.0% 10.0%-12.0%, 10.0%

The following table presents quantitative information about recurring Level 3 fair value measurements at December 31, 2014:

		nir Value	Valuation	Unobservable	Range,
		(housands)	Technique	Inputs	Weighted Average
Mortgage Servicing Rights	\$	7,378	Discounted cash flow	Constant prepayment rate Discount rate	5.7%-23.4%, 12.0% 10.0%-12.0%, 10.0%

The tables below present the recorded amount of assets and liabilities measured at fair value on a nonrecurring basis, as of the dates indicated, that had a write-down or an additional allowance provided during the periods indicated (in thousands):

Three months ended March 31, 2015	Total	Level 1	Level 2	Level 3	Total (Losses)
Fair value: Impaired Originated & PNCI loans Foreclosed assets	\$ 3,690 2,384	_	_	\$ 3,690 2,384	\$ (181) (64)
Total assets measured at fair value	\$ 6,074	_		\$ 6,074	\$ (245)
Year ended December 31, 2014 Fair value:	Total	Level 1	Level 2	Level 3	Total (Losses)
Impaired Originated & PNCI loans	\$ 2,480	_	_	\$ 2,480	\$ (636)
Foreclosed assets	 2,611			2,611	 (137)
Total assets measured at fair value	\$ 5,091			\$ 5,091	\$ (773)
Three months ended March 31, 2014 Fair value:	Total	Level 1	Level 2	Level 3	Total (Losses)
Impaired Originated & PNCI loans	\$ 21,498	_	_	\$ 21,498	\$ (272)
Foreclosed assets	802	_		802	(21)
Total assets measured at fair value	\$ 22,300			\$ 22,300	\$ (293)

The impaired Originated and PNCI loan amount above represents impaired, collateral dependent loans that have been adjusted to fair value. When we identify a collateral dependent loan as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan, the fair value of collateral is generally estimated by obtaining external appraisals. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans for fair value adjustments based on the fair value of collateral. The carrying value of loans fully charged-off is zero.

The foreclosed assets amount above represents impaired real estate that has been adjusted to fair value. Foreclosed assets represent real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses.

After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned. The loss represents impairments on non-covered other real estate owned for fair value adjustments based on the fair value of the real estate.

The Company's property appraisals are primarily based on the sales comparison approach and income approach methodologies, which consider recent sales of comparable properties, including their income generating characteristics, and then make adjustments to reflect the general assumptions that a market participant would make when analyzing the property for purchase. These adjustments may increase or decrease an appraised value and can vary significantly depending on the location, physical characteristics and income producing potential of each property. Additionally, the quality and volume of market information available at the time of the appraisal can vary from period to period and cause significant changes to the nature and magnitude of comparable sale adjustments. Given these variations, comparable sale adjustments are generally not a reliable indicator for how fair value will increase or decrease from period to period. Under certain circumstances, management discounts are applied based on specific characteristics of an individual property.

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a nonrecurring basis at March 31, 2015:

	_	Fair Value thousands)	Valuation Technique	Unobservable Inputs	Range, Weighted Average
Impaired Originated & PNCI loans	\$	3,690	Sales comparison approach	Adjustment for differences between comparable sales	(5.0)%-(41.0)%, (8.8)%
			Income approach	Capitalization rate	8.0%-9.1%, 8.1%
Foreclosed assets	\$	2,384	Sales comparison	Adjustment for differences	
			approach	between comparable sales	(5.0)%-(30.1)%, (9.3)%

The following table presents quantitative information about Level 3 fair value measurements for financial instruments measured at fair value on a nonrecurring basis at December 31, 2014:

	_	Fair Value thousands)	Valuation Technique	Unobservable Inputs	Range, Weighted Average
Impaired Originated & PNCI loans	\$	2,480	Sales comparison approach Income approach	Adjustment for differences between comparable sales Capitalization rate	(5.0)%-(42.5)%, (10.1)% 9.09%-9.09%, 9.09%
Foreclosed assets	\$	2,611	Sales comparison approach	Adjustment for differences between comparable sales	(5.0)%-(29.4)%, (8.2)%

In addition to the methods and assumptions used to estimate the fair value of each class of financial instrument noted above, the following methods and assumptions were used to estimate the fair value of other classes of financial instruments for which it is practical to estimate the fair value.

Short-term Instruments – Cash and due from banks, fed funds purchased and sold, interest receivable and payable, and short-term borrowings are considered short-term instruments. For these short-term instruments their carrying amount approximates their fair value.

Securities held to maturity – The fair value of securities held to maturity is based upon quoted prices, if available. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions. Level 1 securities include those traded on an active exchange, such as the New York Stock Exchange, U.S. Treasury securities that are traded by dealers or brokers in active over-the-counter markets and money market funds. Level 2 securities include mortgage-backed securities issued by government sponsored entities, municipal bonds and corporate debt securities. The Company had no securities held to maturity classified as Level 3 during any of the periods covered in these financial statements.

Restricted Equity Securities – The carrying value of restricted equity securities approximates fair value as the shares can only be redeemed by the issuing institution at par.

Originated and PNCI loans - The fair value of variable rate originated and PNCI loans is the current carrying value. The interest rates on these originated and PNCI loans are regularly adjusted to market rates. The fair value of other types of fixed rate originated and PNCI loans is estimated by discounting the future cash flows using current rates at which similar loans would be made to borrowers

with similar credit ratings for the same remaining maturities. The allowance for loan losses is a reasonable estimate of the valuation allowance needed to adjust computed fair values for credit quality of certain originated and PNCI loans in the portfolio.

PCI Loans – PCI loans are measured at estimated fair value on the date of acquisition. Carrying value is calculated as the present value of expected cash flows and approximates fair value.

Deposit Liabilities – The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. These values do not consider the estimated fair value of the Company's core deposit intangible, which is a significant unrecognized asset of the Company. The fair value of time deposits and other borrowings is based on the discounted value of contractual cash flows.

Other Borrowings – The fair value of other borrowings is calculated based on the discounted value of the contractual cash flows using current rates at which such borrowings can currently be obtained.

Junior Subordinated Debentures – The fair value of junior subordinated debentures is estimated using a discounted cash flow model. The future cash flows of these instruments are extended to the next available redemption date or maturity date as appropriate based upon the spreads of recent issuances or quotes from brokers for comparable bank holding companies compared to the contractual spread of each junior subordinated debenture measured at fair value.

Commitments to Extend Credit and Standby Letters of Credit – The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit worthiness of the counter parties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligation with the counter parties at the reporting date.

Fair values for financial instruments are management's estimates of the values at which the instruments could be exchanged in a transaction between willing parties. These estimates are subjective and may vary significantly from amounts that would be realized in actual transactions. In addition, other significant assets are not considered financial assets including, any mortgage banking operations, deferred tax assets, and premises and equipment. Further, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on the fair value estimates and have not been considered in any of these estimates.

The estimated fair values of financial instruments that are reported at amortized cost in the Corporation's consolidated balance sheets, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value, were as follows (in thousands):

	 March	31, 20)15	Decembe	r 31,	1, 2014		
	Carrying Amount		Fair Value	Carrying Amount		Fair Value

Note 29 - Regulatory Matters

The Company is subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company to maintain minimum amounts and ratios (set forth in the table below) of total, Tier 1, and common equity Tier 1 capital to risk-weighted assets, and of Tier 1 capital to average assets. Management believes, as of March 31, 2015, that the Company meets all capital adequacy requirements to which it is subject.

The following table presents actual and required capital ratios as of March 31, 2015 for the Company and the Bank under Basel III Capital Rules. The minimum capital amounts presented include the minimum required capital levels as of March 31, 2015 based on the phased-in provisions of the Basel III Capital Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Capital Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Capital Rules.

Minimum Capital

Tri Counties Bank	\$ 406,142	13.94%	\$ 131,140	4.50%	\$	203,996	7.00%	\$	189,424	6.50%
Tier 1 Capital (to Average Assets):										
Consolidated	\$ 407,722	10.68%	\$ 152,748	4.00%	\$	152,748	4.00%	\$	190,935	5.00%
Tri Counties Bank	\$ 406,142	10.64%	\$ 152,676	4.00%	\$	152,676	4.00%	\$	190,845	5.00%

The following table presents actual and required capital ratios as of December 31, 2014 for the Company and the Bank under the regulatory capital rules then in effect.

	 Actua	ıl	Minimu Capital Requ		Minimu To Be W Capitalized Prompt Corr Action Prov	Vell Under rective
	 Amount	Ratio	Amount	Ratio	Amount	Ratio
			(dollars in thou	isands)		
As of December 31, 2014:						
Total Capital (to Risk Weighted Assets):						
Consolidated	\$ 436,955	15.63%	\$ 223,603	8.0%	N/A	N/A
Tri Counties Bank	\$ 433,286	15.51%	\$ 223,449	8.0%	\$ 279,311	10.0%
Tier 1 Capital (to Risk Weighted Assets):						
Consolidated	\$ 401,971	14.38%	\$ 111,801	4.0%	N/A	N/A
Tri Counties Bank	\$ 398,325	14.26%	\$ 111,724	4.0%	\$ 167,587	6.0%
Tier 1 Capital (to Average Assets):						
Consolidated	\$ 401,971	10.80%	\$ 148,819	4.0%	N/A	N/A
Tri Counties Bank	\$ 398,325	10.71%	\$ 148,734	4.0%	\$ 185,918	5.0%

As of March 31, 2015, capital levels at the Company and the Bank exceed all capital adequacy requirements under the Basel III Capital Rules on a fully phased-in basis. Based on the ratios presented above, capital levels as March 31, 2015 at the Company and the Bank exceed the minimum levels necessary to be considered "well capitalized".

Note 30 – Summary of Quarterly Results of Operations (unaudited)

The following table sets forth the results of operations for the periods indicated, and is unaudited; however, in the opinion of Management, it reflects all adjustments (which include only normal recurring adjustments) necessary to present fairly the summarized results for such periods.

2014 Overtons Ended

Note – 31 Subsequent Event

On April 29, 2015, the Company issued a press release announcing its earnings for the three months ended March 31, 2015. Included in that announcement was a statement by the Company that following a thorough analysis of profitability and market opportunity, the bank has identified five additional branches for closure. Two of those branches are former North Valley Bank branches. The bank expects that all five branches will close by September 30, 2015.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

As TriCo Bancshares (referred to in this report as "we", "our" or the "Company") has not commenced any business operations independent of Tri Counties Bank (the "Bank"), the following discussion pertains primarily to the Bank. Average balances, including such balances used in calculating certain financial ratios, are generally comprised of average daily balances for the Company. Within Management's Discussion and Analysis of Financial Condition and Results of Operations, interest income, net interest yield, and efficiency ratio are generally presented on a fully tax-equivalent ("FTE") basis. The Company believes the use of these non-generally accepted accounting principles (non-GAAP) measures provides additional clarity in assessing its results, and the presentation of these measures on a FTE basis is a common practice within the banking industry. Interest income and net interest income are shown on a non-FTE basis in the Part I – Financial Information section of this Form 10-Q, and a reconciliation of the FTE and non-FTE presentations is provided below in the discussion of net interest income.

Critical Accounting Policies and Estimates

There have been no changes to the Company's critical accounting policies during the three months ended March 31, 2015.

The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of

America. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those that materially affect the financial statements and are related to the adequacy of the allowance for loan losses, investments, mortgage servicing rights, fair value measurements, retirement plans and intangible assets. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The Company's policies related to estimates on the allowance for loan losses, other than temporary impairment of investments and impairment of intangible assets, can be found in Note 1 in Item 1 of Part I of this report.

On October 3, 2014, TriCo completed the acquisition of North Valley Bancorp following receipt of shareholder approval from both institutions and all required regulatory approvals. As part of the acquisition, North Valley Bank, a wholly-owned subsidiary of North Valley Bancorp, merged with and into Tri Counties Bank. In the acquisition, each share of North Valley common stock was converted into the right to receive 0.9433 shares of TriCo common stock. TriCo issued an aggregate of approximately 6.58 million shares of TriCo common stock to North Valley Bancorp shareholders, which was valued at a total of approximately \$151 million based on the closing trading price of TriCo common stock on October 3, 2014 of \$21.73. TriCo also assumed North Valley Bancorp's obligations with respect to its outstanding trust preferred securities. Beginning on October 4, 2014, the effect of revenue and expenses from the operations of North Valley Bancorp, and the TriCo Bancshares common shares issued in consideration of the merger are included in the results of the Company.

North Valley Bank was a full-service commercial bank headquartered in Redding, California. North Valley conducted a commercial and retail banking services which included accepting demand, savings, and money market rate deposit accounts and time deposits, and making commercial, real estate and consumer loans. North Valley Bank had \$935 million in assets and 22 commercial banking offices in Shasta, Humboldt, Del Norte, Mendocino, Yolo, Sonoma, Placer and Trinity Counties in Northern California at June 30, 2014.

On October 25, 2014, North Valley Bank's electronic customer service and other data processing systems were converted onto Tri Counties Bank's systems. Between January 7, 2015 and January 21, 2015, four Tri Counties Bank branches and four former North Valley Bank branches were consolidated into other Tri Counties Bank or other former North Valley Bank branches. See Note 2 in Item 1 of Part I of this report for a discussion about this transaction.

On September 23, 2011, the California Department of Financial Institutions closed Citizens Bank of Northern California ("Citizens"), Nevada City, California and appointed the FDIC as receiver. That same date, the Bank assumed the banking operations of Citizens from the FDIC under a whole bank purchase and assumption agreement without loss sharing.

On May 28, 2010, the Office of the Comptroller of the Currency closed Granite Community Bank, N.A. ("Granite"), Granite Bay, California and appointed the FDIC as receiver. That same date, the Bank assumed the banking operations of Granite from the FDIC under a whole bank purchase and assumption agreement with loss sharing. Under the terms of the loss sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (OREO)/foreclosed assets and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the covered assets acquired from Granite. The loss sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date.

The Company refers to loans and foreclosed assets that are covered by loss sharing agreements as "covered loans" and "covered foreclosed assets", respectively. In addition, the Company refers to loans purchased or obtained in a business combination as "purchased credit impaired" (PCI) loans, or "purchased non-credit impaired" (PNCI) loans. The Company refers to loans that it originates as "originated" loans. Additional information regarding the Citizens and Granite Bank acquisitions can be found in Note 2 in Item 1 of Part I of this report. Additional information regarding the definitions and accounting for originated, PNCI and PCI loans can be found in Notes 1, 2, 4 and 5 in Item 1 of Part I of this report, and under the heading *Asset Quality and Non-Performing Assets* below.

Geographical Descriptions

For the purpose of describing the geographical location of the Company's loans, the Company has defined northern California as that area of California north of, and including, Stockton; central California as that area of the State south of Stockton, to and including, Bakersfield; and southern California as that area of the State south of Bakersfield.

Results of Operations

Overview

The following discussion and analysis is designed to provide a better understanding of the significant changes and trends related to the Company and the Bank's financial condition, operating results, asset and liability management, liquidity and capital resources and should be read in conjunction with the Condensed Consolidated Financial Statements of the Company and the Notes thereto located at Item 1 of this report.

Following is a summary of the components of FTE net income for the periods indicated (dollars in thousands):

		ended		
		2015		2014
Net Interest Income (FTE)	\$	36,440	\$	26,154
(Provision for) benefit from reversal of provision for loan losses				
		(197)		1,355
Noninterest income		10,180		8,295
Noninterest expense		(32,282)		(23,317)
Provision for income taxes (FTE)		(5,805)		(5,122)
Net income	\$	8,336	\$	7,365

Net Interest Income

The Company's primary source of revenue is net interest income, or the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities. Following is a summary of the components of net interest income for the periods indicated (dollars in thousands):

	March 31,					
	2015		2014			
Interest income	\$ 37,725	\$	27,159			
Interest expense	(1,382)		(1,087)			
FTE adjustment	 97		82			
Net interest income (FTE)	\$ 36,440	\$	26,154			
Net interest margin (FTE)	4.10%		4.10%			
Purchased loan discount accretion	\$ 2,794	\$	1,566			
Effect of purchased loan discount accretion on net interest margin (FTE)	0.31%		0.25%			

Net interest income (FTE) during the first quarter of 2014 increased \$10,286,000 (39.3%) from the same period in 2014 to \$36,440,000. The increase in net interest income (FTE) was due primarily to a \$612,391,000 (36.6%) increase in the average balance of loans to \$2,283,622,000, and a \$520,030,000 (127.5%) increase in the average balance of investments to \$927,878,000 that were partially offset by a 22 basis point decrease in the average yield on loans from 5.68% during the three months ended March 31, 2014 to 5.46% during the three months ended March 31, 2015, and a 38 basis point decrease in the average yield on investments from 3.13% during the three months ended March 31, 2014 to 2.76% during the three months ended March 31, 2015. The \$612,391,000 increase in average loan balances from the year ago quarter was primarily due to the addition of \$499,327,000 of loans through the acquisition of North Valley Bancorp on October 4, 2014. The \$520,030,000 increase in average investment balances from the yearago quarter was primarily due to the use of cash at the Federal Reserve and other banks to purchase investments and the addition of \$212,616,000 of investments through the acquisition of North Valley Bancorp on October 4, 2014. The decrease in average loan yields is due primarily to declines in market yields on new and renewed loans compared to yields on repricing, maturing, and paid off loans. The decrease in average investment yields is due primarily to declines in market yields on new investments compared to yields on existing investments. The increases in average loan and investment balances added \$8,696,000 and \$3,984,000, respectively, to net interest income (FTE) while the decreases in average loan and investment yields reduced net interest income (FTE) by \$1,269,000 and \$777,000, respectively, when compared to the year-ago quarter. For more information related to loan interest income, including loan purchase discount accretion, see the following Summary of Average Balances, Yields/Rates and Interest Differential and Note 30 to the consolidated financial statements at Part I, Item 1 of this report.

Summary of Average Balances, Yields/Rates and Interest Differential

The following table presents, for the periods indicated, information regarding the Company's consolidated average assets, liabilities and shareholders' equity, the amounts of interest income from average interest-earning assets and resulting yields, and the amount of interest expense paid on interest-bearing liabilities. Average loan balances include nonperforming loans. Interest income includes proceeds from loans on nonaccrual loans only to the extent cash payments have been received and applied to interest income. Yields

on securities and certain loans have been adjusted upward to reflect the effect of income thereon exempt from federal income taxation at the current statutory tax rate (dollars in thousands).

	For the three months ended													
		M	Iarch	31, 2015		March 31, 2014								
		Average Balance						Interest Income/ Expense	Rates Earned /Paid		Average Balance		Interest Income/ Expense	Rates Earned /Paid

Total interest-bearing liabilities		2,368,440		1,382	0.23%		1,715,886		1,087	0.25%				
Noninterest-bearing deposits		1,047,840					731,731							
Other liabilities		51,495					35,262							
Shareholders' equity		424,701					254,885							
Total liabilities and shareholders' equity	\$	3,892,476				\$	2,737,764							
Net interest spread ⁽¹⁾		_			4.02%		_			4.02%				
Net interest income and interest margin ⁽²⁾			\$	36,440	4.10%			\$	26,154	4.10%				

Net interest spread represents the average yield earned on interest-earning assets minus the average rate paid on interest-bearing liabilities.

Net interest margin is computed by calculating the difference between interest income and interest expense, divided by the average balance of interest-earning assets.

Summary of Changes in Interest Income and Expense due to Changes in Average Asset and Liability Balances and Yields Earned and Rates Paid

The following table sets forth a summary of the changes in interest income and interest expense from changes in average asset and liability balances (volume) and changes in average interest rates for the periods indicated. Changes not solely attributable to volume or rates have been allocated in proportion to the respective volume and rate components (in thousands).

Three months ended March 31, 2015 compared with three months ended March 31, 2014

Provision for Loan Losses

The provision for loan losses during any period is the sum of the allowance for loan losses required at the end of the period and any loan charge offs during the period, less the allowance for loan losses required at the beginning of the period, and less any loan recoveries during the period. See the Tables labeled "Allowance for loan losses – three months ended March 31, 2015 and 2014" at Note 5 in Item 1 of Part I of this report for the components that make up the provision for loan losses for the three months ended March 31, 2015 and 2014.

The Company recorded a provision for loan losses of \$197,000 during the three months ended March 31, 2015 compared to a reversal of provision for loan losses of \$1,355,000 during the three months ended March 31, 2014. As shown in the Table labeled "Allowance" for Loan Losses - three months ended March 31, 2015" at Note 5 in Item 1 of Part I of this report, commercial real estate mortgage loans, home equity loans, other consumer and C&I loans experienced a provision for loan losses during the three months ended March 31, 2015. All other categories of loans experienced a reversal of provision for loan losses during the three months ended March 31, 2015. The level of provision, or reversal of provision, for loan losses of each loan category during the three months ended March 31, 2015 was due primarily to the increase or decrease in the required allowance for loan losses as of March 31, 2015 when compared to the required allowance for loan losses as of December 31, 2014 plus or minus net charge-offs or net recoveries during the three months ended March 31, 2015. All categories of loans except commercial real estate mortgage loans, and home equity loans experienced a decrease in the required allowance for loan losses during the three months ended March 31, 2015. These decreases in required allowance for loan losses were due primarily to reduced impaired loans, improvements in estimated cash flows and collateral values for the remaining and newly impaired loans, and reductions in historical loss factors that, in part, determine the required loan loss allowance for performing loans in accordance with the Company's allowance for loan losses methodology as described under the heading "Loans and Allowance for Loan Losses" at Note 1 in Item 1 of Part I of this report. These same factors were also present, to some extent, for commercial real estate mortgage loans, and home equity loans, but were more than offset by the effect of increased loan balances or changes in credit quality within the "pass" category of these loan categories resulting in net provisions for loan losses in these categories during the three months ended March 31, 2015. For details of the change in nonperforming loans during the three months ended March 31, 2015 see the Tables, and associated narratives, labeled "Changes in nonperforming assets during the three months ended March 31, 2015" under the heading "Asset Quality and Non-Performing Assets" below.

The provision for loan losses related to originated and PNCI loans is based on management's evaluation of inherent risks in these loan portfolios and a corresponding analysis of the allowance for loan losses. The provision for loan losses related to PCI loan portfolio is based on changes in estimated cash flows expected to be collected on PCI loans. Additional discussion on loan quality, our procedures

to measure loan impairment, and the allowance for loan losses is provided under the heading "Asset Quality and Non-Performing Assets" below.

Management re-evaluates the loss ratios and other assumptions used in its calculation of the allowance for loan losses for its originated and PNCI loan portfolios on a quarterly basis and makes changes as appropriate based upon, among other things, changes in loss rates experienced, collateral support for underlying loans, changes and trends in the economy, and changes in the loan mix. Management also re-evaluates expected cash flows used in its accounting for its PCI loan portfolio, including any required allowance for loan losses, on a quarterly basis and makes changes as appropriate based upon, among other things, changes in loan repayment experience, changes in loss rates experienced, and collateral support for underlying loans.

Noninterest Income

The following table summarizes the Company's noninterest income for the periods indicated (in thousands):

	Three months ended March 31,						
		2015		2014			
Service charges on deposit accounts	\$	3,600	\$	2,690			
ATM fees and interchange		3,002		2,013			
Other service fees		714		520			
Mortgage banking service fees		534		420			
Change in value of mortgage servicing rights		(506)		(181)			
Total service charges and fees		7,344		5,462			
Gain on sale of loans		622		464			
Commissions on sale of nondeposit investment products		965		771			
Increase in cash value of life insurance		675		397			
Change in indemnification asset		(65)		(412)			
Gain on disposition of foreclosed assets		311		1,227			
Other noninterest income		328		386			
Total noninterest income	\$	10,180	\$	8,295			

Noninterest income increased \$1,885,000 (22.7%) to \$10,180,000 during the three months ended March 31, 2015 when compared to the three months ended March 31, 2014. The increase in noninterest income was due primarily to an increase in service charges on deposit accounts of \$910,000 (33.8%) to \$3,600,000, and an increase in ATM fees and interchange revenue of 989,000 (49.1%) to \$3,002,000. These increases, and the increases in other categories of noninterest income noted in the table above are primarily the result of the acquisition of North Valley Bancorp on October 4, 2014. Partially offsetting these increases were decreases of \$325,000 and \$916,000 in Change in value of mortgage servicing rights and gain on sale of foreclosed assets, respectively, to \$(506,000) and \$311,000, respectively. The decrease in change in value of mortgage servicing rights is primarily due to a larger increase in estimated prepayment speeds of serviced loans during the three months ended March 31, 2015 than the three months ended March 31, 2014. An increase in prepayment speeds of serviced loans results in reduced expected servicing cash flows, and thus, a lower value of such servicing rights. The decrease in gain on sale foreclosed assets is due to decreased foreclosed asset sales during the three months ended March 31, 2015 when compared to the year-ago period.

Noninterest Expense

The following table summarizes the Company's noninterest expense for the periods indicated (dollars in thousands):

	Three months ended March 31,						
		2015		2014			
Salaries and related benefits: Base salaries, net of deferred loan origination costs Incentive compensation Benefits and other compensation costs	\$	11,744 1,596 4,760	\$	8,866 1,123 3,314			
Total salaries and related benefits		18,100		13,303			
Other noninterest expense: Occupancy Equipment Data processing and software ATM network charges Telecommunications Postage Courier service Advertising and marketing Assessments Operational losses Professional fees Foreclosed asset expense Provision for foreclosed asset losses Change in reserve for unfunded commitments Intangible amortization Merger expense		2,417 1,414 1,952 770 886 312 248 808 651 124 1,119 98 67 (130) 289 586		1,962 1,036 1,178 643 580 227 234 342 521 177 614 158 36 (185) 52 225			
Other		2,571		2,214			
Total other noninterest expenses		14,182		10,014			
Total noninterest expense	\$	32,282	\$	23,317			
Merger expense: Data processing and software Professional fees Other Total merger expense	\$	108 120 358 586	\$ \$				
Average full time equivalent staff Noninterest expense to revenue (FTE)		966 69.2%		732 67.7%			

Salary and benefit expenses increased \$4,797,000 (36.1%) to \$18,100,000 during the three months ended March 31, 2015 compared to the three months ended March 31, 2014. Base salaries, incentive compensation and benefits & other compensation expense increased \$2,878,000 (32.5%), 473,000 (42.1%), and 1,446,000 (43.6%), respectively, to \$11,744,000, \$1,596,000 and \$4,760,000, respectively, during the three months ended March 31, 2015. The increases in these categories of salary and benefits expense are primarily due to the Company's acquisition of North Valley Bancorp on October 4, 2014. The average number of full-time equivalent staff increased 234 (32.0%) from 732 during the three months ended March 31, 2014 to 966 for the three months ended March 31, 2015.

Other noninterest expense increased \$4,168,000 (38.4%) to \$14,182,000 during the three months ended March 31, 2015 compared to the three months ended March 31, 2014. The increase in other noninterest expense was primarily due to the Company's acquisition of North Valley Bancorp on October 4, 2014. Nonrecurring merger expenses related to the North Valley Bancorp acquisition totaling \$586,000 are included in noninterest expense for the three months ended March 31, 2015. These nonrecurring merger related expenses include \$108,000 of data processing expense, \$120,000 of professional fees, and \$358,000 of lease contract resolution, leasehold improvement write-off and facility restoration, and moving expenses related to the consolidation of four former North Valley Bank and four former Tri Counties Bank branches during the three months ended March 31, 2015, six of which were leased. As of

March 31, 2015, the Company had substantially completed all of its previously planned facility consolidations related to the North Valley Bancorp acquisition. Following a thorough analysis of profitability and market opportunity, the bank has identified five additional branches for closure. Two of those branches are former North Valley Bank branches. The bank expects that all five branches will close by September 30, 2015.

Income Taxes

The effective combined Federal and State income tax rate on income was 40.6% and 40.7% for the three months ended March 31, 2014 and 2013, respectively. The effective combined Federal and State income tax rate was greater than the Federal statutory tax rate of 35.0% due to State income tax expense of \$1,311,000 and \$1,488,000, respectively, in these periods. Tax-exempt income of \$136,000 and \$101,000, respectively, from investment securities, and \$397,000 and \$427,000, respectively, from increase in cash value of life insurance in these periods helped to reduce the effective combined Federal and State income tax rate from the combined Federal and State statutory income tax rate of approximately 42.0%.

Financial Condition

Investment Securities

Investment securities available for sale increased \$141,921,000 to \$225,126,000 as of March 31, 2015, as compared to December 31, 2014. This increase is attributable to purchases of \$147,335,000, maturities and principal repayments of \$5,280,000, an increase in fair value of investments securities available for sale of \$15,000 and amortization of net purchase price premiums of \$149,000.

The following table presents the available for sale investment securities portfolio by major type as of March 31, 2015 and December 31, 2014:

	March 31	, 2015		December	31, 2014	
(In thousands)		Fair Value	%	F	air Value	%
Securities available for sale:						
Obligations of U.S. government corporations and agencies	\$	210,535	93.5%	\$	75,120	90.3%
Obligations of states and political subdivisions		9,656	4.3%		3,175	3.8%
Corporate bonds		1,905	0.8%		1,908	2.3%
Marketable equity securities		3,030	1.3%		3,002	3.6%
Total securities available for sale	\$	225,126	100.0%	\$	83,205	100.0%

Investment securities held to maturity increased \$126,056,000 to \$802,482,000 as of March 31, 2015, as compared to December 31, 2014. This increase is attributable to purchases of \$146,100,000, less principal repayments of \$19,474,000, and amortization of net purchase price premiums of \$570,000.

The following table presents the held to maturity investment securities portfolio by major type as of March 31, 2015 and December 31, 2014:

	 March 31	, 2015	December 31, 2014			
(In thousands)	 Cost Basis	%		Cost Basis	%	
Securities held to maturity:						
Obligations of U.S. government corporations and agencies	\$ 786,889	98.1%	\$	660,836	97.7%	
Obligations of states and political subdivisions	 15,593	1.9%		15,590	2.3%	
Total securities held to maturity	\$ 802,482	100.0%	\$	676,426	100.0%	

Additional information about the investment portfolio is provided in Note 3 of the Notes to Unaudited Condensed Consolidated Financial Statements at Item 1 of Part I of this report.

Restricted Equity Securities

Restricted equity securities were \$16,956,000 at March 31, 2015 and \$16,956,000 at December 31, 2014. The entire balance of restricted equity securities at March 31, 2015 and December 31, 2014 represent the Bank's investment in the Federal Home Loan Bank of San Francisco ("FHLB").

Additional information about the restricted equity securities is provided in Note 1 of the Notes to Unaudited Condensed Consolidated Financial Statements at Item 1 of Part I of this report.

Loans

The Bank concentrates its lending activities in four principal areas: real estate mortgage loans (residential and commercial loans), consumer loans, commercial loans (including agricultural loans), and real estate construction loans. The interest rates charged for the loans made by the Bank vary with the degree of risk, the size and maturity of the loans, the borrower's relationship with the Bank and prevailing money market rates indicative of the Bank's cost of funds.

The majority of the Bank's loans are direct loans made to individuals, farmers and local businesses. The Bank relies substantially on local promotional activity and personal contacts by bank officers, directors and employees to compete with other financial institutions. The Bank makes loans to borrowers whose applications include a sound purpose, a viable repayment source and a plan of repayment established at inception and generally backed by a secondary source of repayment.

The following table shows the Company's loan balances, including net deferred loan costs, as of the dates indicated:

(In thousands)	 March 31, 2015	I	December 31, 2014
Real estate mortgage	\$ 1,646,863	\$	1,615,359
Consumer	410,727		417,084
Commercial	177,540		174,945
Real estate construction	 85,753		75,136
Total loans	\$ 2,320,883	\$	2,282,524

At March 31, 2015 loans, including net deferred loan costs, totaled \$2,320,883,000 which was a \$38,359,000 (1.68%) increase over the balances at December 31, 2014. Demand for all categories of loans was moderate during the three months ended March 31, 2015.

The following table shows the Company's loan balances, including net deferred loan costs, as a percentage of total loans for the periods indicated:

	March 31, 2015	December 31, 2014
Real estate mortgage	71.0%	70.7%
Consumer	17.7%	18.3%
Commercial	7.6%	7.7%
Real estate construction	3.7%	3.3%
Total loans	100.0%	100.0%

Assets Quality and Nonperforming Assets

Nonperforming Assets

Loans originated by the Company, i.e., not purchased or acquired in a business combination, are referred to as originated loans. Originated loans are reported at the principal amount outstanding, net of deferred loan fees and costs. Loan origination and commitment fees and certain direct loan origination costs are deferred, and the net amount is amortized as an adjustment of the related loan's yield over the actual life of the loan. Originated loans on which the accrual of interest has been discontinued are designated as nonaccrual loans.

Originated loans are placed in nonaccrual status when reasonable doubt exists as to the full, timely collection of interest or principal, or a loan becomes contractually past due by 90 days or more with respect to interest or principal and is not well secured and in the process of collection. When an originated loan is placed on nonaccrual status, all interest previously accrued but not collected is reversed. Income on such loans is then recognized only to the extent that cash is received and where the future collection of principal is probable. Interest accruals are resumed on such loans only when they are brought fully current with respect to interest and principal and when, in the judgment of Management, the loan is estimated to be fully collectible as to both principal and interest.

An allowance for loan losses for originated loans is established through a provision for loan losses charged to expense. Originated loans and deposit related overdrafts are charged against the allowance for loan losses when Management believes that the collectability of the principal is unlikely or, with respect to consumer installment loans, according to an established delinquency schedule. The allowance is an amount that Management believes will be adequate to absorb probable losses inherent in existing loans and leases, based on evaluations of the collectability, impairment and prior loss experience of loans and leases. The evaluations take into consideration such factors as changes in the nature and size of the portfolio, overall portfolio quality, loan concentrations, specific problem loans, and current economic conditions that may affect the borrower's ability to pay. The Company defines an originated loan as impaired when it is probable the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired originated loans are measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate. As a practical expedient, impairment may be measured based on the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. When the measure of the impaired loan is less than the recorded investment in the loan, the impairment is recorded through a valuation allowance.

In situations related to originated loans where, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession for other than an insignificant period of time to the borrower that the Company would not otherwise consider, the related loan is classified as a troubled debt restructuring (TDR). The Company strives to identify borrowers in financial difficulty early and work with them to modify to more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where the Company grants the borrower new terms that result in the loan being classified as a TDR, the Company measures any impairment on the restructuring as noted above for impaired loans. TDR loans are classified as impaired until they are fully paid off or charged off. Loans that are in nonaccrual status at the time they become TDR loans, remain in nonaccrual status until the borrower demonstrates a sustained period of performance which the Company generally believes to be six consecutive months of payments, or equivalent. Otherwise, TDR loans are subject to the same nonaccrual and charge-off policies as noted above with respect to their restructured principal balance.

Credit risk is inherent in the business of lending. As a result, the Company maintains an allowance for loan losses to absorb losses inherent in the Company's originated loan portfolio. This is maintained through periodic charges to earnings. These charges are included in the Consolidated Statements of Income as provision for loan losses. All specifically identifiable and quantifiable losses are immediately charged off against the allowance. However, for a variety of reasons, not all losses are immediately known to the Company and, of those that are known, the full extent of the loss may not be quantifiable at that point in time. The balance of the Company's allowance for originated loan losses is meant to be an estimate of these unknown but probable losses inherent in the portfolio.

The Company formally assesses the adequacy of the allowance for originated loan losses on a quarterly basis. Determination of the adequacy is based on ongoing assessments of the probable risk in the outstanding originated loan portfolio, and to a lesser extent the Company's originated loan commitments. These assessments include the periodic re-grading of credits based on changes in their individual credit characteristics including delinquency, seasoning, recent financial performance of the borrower, economic factors, changes in the interest rate environment, growth of the portfolio as a whole or by segment, and other factors as warranted. Loans are initially graded when originated. They are re-graded as they are renewed, when there is a new loan to the same borrower, when identified facts demonstrate heightened risk of nonpayment, or if they become delinquent. Re-grading of larger problem loans occurs at least quarterly. Confirmation of the quality of the grading process is obtained by independent credit reviews conducted by consultants specifically hired for this purpose and by various bank regulatory agencies.

The Company's method for assessing the appropriateness of the allowance for originated loan losses includes specific allowances for impaired originated loans and leases, formula allowance factors for pools of credits, and allowances for changing environmental factors (e.g., interest rates, growth, economic conditions, etc.). Allowance factors for loan pools were based on historical loss experience by product type and prior risk rating.

During the three months ended March 31, 2014, the Company modified its methodology used to determine the allowance for changing environmental factors by adding a new environmental factor based on the California Home Affordability Index ("CHAI"). The CHAI measures the percentage of households in California that can afford to purchase the median priced home in California based on current home prices and mortgage interest rates. The use of the CHAI environmental factor consists of comparing the current CHAI to its historical baseline, and allows management to consider the adverse impact that a lower than historical CHAI may have on general economic activity and the performance of our borrowers. Based on an analysis of historical data, management believes this environmental factor gives a better estimate of current economic activity compared to other environmental factors that may lag current economic activity to some extent. This change in methodology resulted in no change to the allowance for loan losses as of March 31, 2014 compared to what it would have been without this change in methodology.

Loans purchased or acquired in a business combination are referred to as acquired loans. Acquired loans are valued as of acquisition date in accordance with Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 805, Business Combinations. Loans acquired with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are referred to as purchased credit impaired (PCI) loans. PCI loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. Under FASB ASC Topic 805 and FASB ASC Topic 310-30, PCI loans are recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. Fair value is defined as the present value of the future estimated principal and interest payments of the loan, with the discount rate used in the present value calculation representing the estimated effective yield of the loan. Default rates, loss severity, and prepayment speed assumptions are periodically reassessed and our estimate of future payments is adjusted accordingly. The difference between contractual future payments and estimated future payments is referred to as the nonaccretable difference. The difference between estimated future payments and the present value of the estimated future payments is referred to as the accretable yield. The accretable yield represents the amount that is expected to be recorded as interest income over the remaining life of the loan. If after acquisition, the Company determines that the estimated future cash flows of a PCI loan are expected to be more than the originally estimated, an increase in the discount rate (effective yield) would be made such that the newly increased accretable yield would be recognized, on a level yield basis, over the remaining estimated life of the loan. If, after acquisition, the Company determines that the estimated future cash flows of a PCI loan are expected to be less than the previously estimated, the discount rate would first be reduced until the present value of the reduced cash flow estimate equals the previous present value however, the discount rate may not be lowered below its original level at acquisition. If the discount rate has been lowered to its original level and the present value has not been sufficiently lowered, an allowance for loan loss would be established through a provision for loan losses charged to expense to decrease the present value to the required level. If the estimated cash flows improve after an allowance has been established for a loan, the allowance may be partially or fully reversed depending on the improvement in the estimated cash flows. Only after the allowance has been fully reversed may the discount rate be increased. PCI loans are put on nonaccrual status when cash flows cannot be reasonably estimated. PCI loans on nonaccrual status are accounted for using the cost recovery method or cash basis method of income recognition. PCI loans are charged off when evidence suggests cash flows are not recoverable. Foreclosed assets from PCI loans are recorded in foreclosed assets at fair value with the fair value at time of foreclosure representing cash flow from the loan. ASC 310-30 allows PCI loans with similar risk characteristics and acquisition time frame to be "pooled" and have their cash flows aggregated as if they were one loan. The Company elected to use the "pooled" method of ASC 310-30 for PCI – other loans in the acquisition of certain assets and liabilities of Granite and Citizens.

Acquired loans that are not PCI loans are referred to as purchased not credit impaired (PNCI) loans. PNCI loans are accounted for under FASB ASC Topic 310-20, *Receivables – Nonrefundable Fees and Other Costs*, in which interest income is accrued on a level-yield basis for performing loans. For income recognition purposes, this method assumes that all contractual cash flows will be collected, and no allowance for loan losses is established at the time of acquisition. Post-acquisition date, an allowance for loan losses may need to be established for acquired loans through a provision charged to earnings for credit losses incurred subsequent to acquisition. Under ASC 310-20, the loss would be measured based on the probable shortfall in relation to the contractual note requirements, consistent with our allowance for loan loss policy for similar loans.

When referring to PNCI and PCI loans we use the terms "nonaccretable difference", "accretable yield", or "purchase discount". Nonaccretable difference is the difference between undiscounted contractual cash flows due and undiscounted cash flows we expect to collect, or put another way, it is the undiscounted contractual cash flows we do not expect to collect. Accretable yield is the difference between undiscounted cash flows we expect to collect and the value at which we have recorded the loan on our financial statements. On the date of acquisition, all purchased loans are recorded on our consolidated financial statements at estimated fair value. Purchase discount is the difference between the estimated fair value of loans on the date of acquisition and the principal amount owed by the borrower, net of charge offs, on the date of acquisition. We may also refer to "discounts to principal balance of loans owed, net of charge-offs". Discounts to principal balance of loans owed, net of charge-offs, and loans as recorded on our financial statements. Discounts to principal balance of loans owed, net of charge-offs arise from purchase discounts, and equal the purchase discount on the acquisition date.

Loans are also categorized as "covered" or "noncovered". Covered loans refer to loans covered by a FDIC loss sharing agreement. Noncovered loans refer to loans not covered by a FDIC loss sharing agreement.

Originated loans and PNCI loans are reviewed on an individual basis for reclassification to nonaccrual status when any one of the following occurs: the loan becomes 90 days past due as to interest or principal, the full and timely collection of additional interest or principal becomes uncertain, the loan is classified as doubtful by internal credit review or bank regulatory agencies, a portion of the principal balance has been charged off, or the Company takes possession of the collateral. Loans that are placed on nonaccrual even though the borrowers continue to repay the loans as scheduled are classified as "performing nonaccrual" and are included in total nonperforming loans. The reclassification of loans as nonaccrual does not necessarily reflect Management's judgment as to whether they are collectible.

Interest income on originated nonaccrual loans that would have been recognized during the months ended March 31, 2015 and 2014, if all such loans had been current in accordance with their original terms, totaled \$698,000 and \$886,000, respectively. Interest income actually recognized on these originated loans during the three months ended March 31, 2015 and 2014 was \$47,000 and \$6,000, respectively. Interest income on PNCI nonaccrual loans that would have been recognized during the three months ended March 31, 2015 and 2014, if all such loans had been current in accordance with their original terms, totaled \$80,000 and \$68,000, respectively. Interest income actually recognized on these PNCI loans during the three months ended March 31, 2015 and 2014 was \$9,000 and \$6,000.

The Company's policy is to place originated loans and PNCI loans 90 days or more past due on nonaccrual status. In some instances when an originated loan is 90 days past due Management does not place it on nonaccrual status because the loan is well secured and in the process of collection. A loan is considered to be in the process of collection if, based on a probable specific event, it is expected that the loan will be repaid or brought current. Generally, this collection period would not exceed 30 days. Loans where the collateral has been repossessed are classified as foreclosed assets. Management considers both the adequacy of the collateral and the other resources of the borrower in determining the steps to be taken to collect nonaccrual loans. Alternatives that are considered are foreclosure, collecting on guarantees, restructuring the loan or collection lawsuits.

The following table sets forth the amount of the Bank's nonperforming assets as of the dates indicated. For purposes of the following table, "PCI – other" loans that are 90 days past due and still accruing are not considered nonperforming loans. "Performing nonaccrual loans" are loans that may be current for both principal and interest payments, or are less than 90 days past due, but for which payment in full of both principal and interest is not expected, and are not well secured and in the process of collection:

In thousands)		March 31, 2015		ecember 31, 2014
Performing nonaccrual loans	\$	45,952	\$	45,072
Nonperforming nonaccrual loans		2,937		2,517
Total nonaccrual loans		48,889		47,589
Originated and PNCI loans 90 days past due and still accruing		328		_
Total nonperforming loans		49,217		47,589
Noncovered foreclosed assets		5,447		4,449
Covered foreclosed assets		445		445
Total nonperforming assets	\$	55,109	\$	52,483
U.S. government, including its agencies and its government-sponsored agencies, guaranteed portion of				
nonperforming loans	\$	148	\$	123
Indemnified portion of covered foreclosed assets	\$	445	\$	356
Nonperforming assets to total assets		1.97%		1.88%
Nonperforming loans to total loans		2.12%		2.08%
Allowance for loan losses to nonperforming loans		73%		77%
Allowance for loan losses, unamortized loan fees, and discounts to loan principal balances owed		3.16%		3.31%

The following table set forth the amount of the Bank's nonperforming assets as of the dates indicated. For purposes of the following table, "PCI – other" loans that are 90 days past due and still accruing are not considered nonperforming loans. "Performing nonaccrual loans" are loans that may be current for both principal and interest payments, or are less than 90 days past due, but for which payment in full of both principal and interest is not expected, and are not well secured and in the process of collection:

	March 31, 2015									
(dollars in thousands)		Originated	_	PNCI	PCI	– cash basis	P	CI – other		Total
Performing nonaccrual loans	\$	31,955	\$	2,020	\$	5,551	\$	6,426	\$	45,952

The following table set forth the amount of the Bank's nonperforming assets as of the dates indicated. For purposes of the following table, "PCI – other" loans that are 90 days past due and still accruing are not considered nonperforming loans. "Performing nonaccrual loans" are loans that may be current for both principal and interest payments, or are less than 90 days past due, but for which payment in full of both principal and interest is not expected, and are not well secured and in the process of collection:

Total nonperforming assets	\$ 55,109	\$ 6,184	\$ 121	\$ (2,533)	\$ (1,146)			\$ 52,483

Nonperforming assets increased during the first quarter of 2015 by \$2,626,000 (5.0%) to \$55,109,000 at March 31, 2015 compared to \$52,483,000 at December 31, 2014. The increase in nonperforming assets during the first quarter of 2015 was primarily the result of new nonperforming loans of \$6,184,000, advances on existing nonperforming loans and capitalized costs on foreclosed assets of \$121,000, less pay-downs, sales or upgrades of nonperforming loans to performing status totaling \$2,038,000, less dispositions of foreclosed assets totaling \$495,000, less loan charge-offs of \$1,080,000, and less write-downs of foreclosed assets of \$66,000.

The \$6,184,000 in new nonperforming loans during the first quarter of 2015 was comprised of increases of \$617,000 on two residential real estate loans, \$4,042,000 on four commercial real estate loans, \$923,000 on 13 home equity lines and loans, \$68,000 on 26 consumer loans, and \$534,000 on nine C&I loans.

The \$617,000 in new nonperforming residential real estate loans was primarily comprised of a single loan in the amount of \$594,000 secured by a single family residence in northern California.

The \$4,042,000 in new nonperforming commercial real estate loans was primarily made up of one loan in the amount of \$2,904,000 secured by a commercial retail property in northern California, one loan in the amount of \$690,000 secured by hospitality real estate in northern California, and one loan in the amount of \$328,000 secured by a commercial office property in northern California.

The \$534,000 in new nonperforming commercial and industrial loan was primarily comprised of a single lending relationship in the amount of \$479,000 secured by various non-real estate business assets in central California. Related charge-offs are discussed below.

Loan charge-offs during the three months ended March 31, 2015

In the first quarter of 2015, the Company recorded \$1,080,000 in loan charge-offs and \$155,000 in deposit overdraft charge-offs less \$390,000 in loan recoveries and \$118,000 in deposit overdraft recoveries resulting in \$727,000 of net charge-offs. Primary causes of the loan charges taken in the first quarter of 2015 were gross charge-offs of \$81,000 on two residential real estate loans, \$352,000 on 10 home equity lines and loans, \$113,000 on 29 other consumer loans, and \$534,000 on eight C&I loans.

The \$534,000 in charge-offs the bank incurred in its commercial and industrial portfolio was primarily the result of \$479,000 in charge-offs incurred on a single relationship secured by various non-real estate business assets in central California. The remaining \$55,000 was spread over four loans spread throughout the Company's footprint.

Differences between the amounts explained in this section and the total charge-offs listed for a particular category are generally made up of individual charges of less than \$250,000 each. Generally losses are triggered by non-performance by the borrower and calculated based on any difference between the current loan amount and the current value of the underlying collateral less any estimated costs associated with the disposition of the collateral.

Allowance for Loan Losses

The Company's allowance for loan losses is comprised of allowances for originated, PNCI and PCI loans. All such allowances are established through a provision for loan losses charged to expense.

Originated and PNCI loans, and deposit related overdrafts are charged against the allowance for originated loan losses when Management believes that the collectability of the principal is unlikely or, with respect to consumer installment loans, according to an established delinquency schedule. The allowances for originated and PNCI loan losses are amounts that Management believes will be adequate to absorb probable losses inherent in existing originated loans, based on evaluations of the collectability, impairment and prior loss experience of those loans and leases. The evaluations take into consideration such factors as changes in the nature and size of the portfolio, overall portfolio quality, loan concentrations, specific problem loans, and current economic conditions that may affect the borrower's ability to pay. The Company defines an originated or PNCI loan as impaired when it is probable the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. Impaired originated and PNCI loans are measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate. As a practical expedient, impairment may be measured based on the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. When the measure of the impaired loan is less than the recorded investment in the loan, the impairment is recorded through a valuation allowance.

In situations related to originated and PNCI loans where, for economic or legal reasons related to a borrower's financial difficulties, the Company grants a concession for other than an insignificant period of time to the borrower that the Company would not otherwise consider, the related loan is classified as a troubled debt restructuring (TDR). The Company strives to identify borrowers in financial difficulty early and work with them to modify to more affordable terms before their loan reaches nonaccrual status. These modified terms may include rate reductions, principal forgiveness, payment forbearance and other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. In cases where the Company grants the borrower new terms that provide for a reduction of either interest or principal, the Company measures any impairment on the restructuring as noted above for impaired loans. TDR loans are classified as impaired until they are fully paid off or charged off. Loans that are in nonaccrual status at the time they become TDR loans, remain in nonaccrual status until the borrower demonstrates a sustained period of performance which the Company generally believes to be six consecutive months of payments, or equivalent. Otherwise, TDR loans are subject to the same nonaccrual and charge-off policies as noted above with respect to their restructured principal balance.

Credit risk is inherent in the business of lending. As a result, the Company maintains an allowance for loan losses to absorb losses inherent in the Company's originated and PNCI loan portfolios. These are maintained through periodic charges to earnings. These charges are included in the Consolidated Income Statements as provision for loan losses. All specifically identifiable and quantifiable losses are immediately charged off against the allowance. However, for a variety of reasons, not all losses are immediately known to the Company and, of those that are known, the full extent of the loss may not be quantifiable at that point in time. The balance of the Company's allowances for originated and PNCI loan losses are meant to be an estimate of these unknown but probable losses inherent in these portfolios.

The Company formally assesses the adequacy of the allowance for originated and PNCI loan losses on a quarterly basis. Determination of the adequacy is based on ongoing assessments of the probable risk in the outstanding originated and PNCI loan portfolios, and to a lesser extent the Company's originated and PNCI loan commitments. These assessments include the periodic regrading of credits based on changes in their individual credit characteristics including delinquency, seasoning, recent financial performance of the borrower, economic factors, changes in the interest rate environment, growth of the portfolio as a whole or by segment, and other factors as warranted. Loans are initially graded when originated or acquired. They are re-graded as they are renewed, when there is a new loan to the same borrower, when identified facts demonstrate heightened risk of nonpayment, or if they become delinquent. Re-grading of larger problem loans occurs at least quarterly. Confirmation of the quality of the grading process is obtained by independent credit reviews conducted by consultants specifically hired for this purpose and by various bank regulatory agencies.

The Company's method for assessing the appropriateness of the allowance for originated and PNCI loan losses includes specific allowances for impaired loans and leases, formula allowance factors for pools of credits, and allowances for changing environmental factors (e.g., interest rates, growth, economic conditions, etc.). Allowance factors for loan pools are based on historical loss experience by product type and prior risk rating. Allowances for impaired loans are based on analysis of individual credits. Allowances for changing environmental factors are Management's best estimate of the probable impact these changes have had on the originated or PNCI loan portfolio as a whole. The allowances for originated and PNCI loans are included in the allowance for loan losses.

As noted above, the allowances for originated and PNCI loan losses consists of a specific allowance, a formula allowance, and an allowance for environmental factors. The first component, the specific allowance, results from the analysis of identified credits that meet management's criteria for specific evaluation. These loans are reviewed individually to determine if such loans are considered impaired. Impaired loans are those where management has concluded that it is probable that the borrower will be unable to pay all

amounts due under the contractual terms. Impaired loans are specifically reviewed and evaluated individually by management for loss potential by evaluating sources of repayment, including collateral as applicable, and a specified allowance for loan losses is established where necessary.

The second component of the allowance for originated and PNCI loan losses, the formula allowance, is an estimate of the probable losses that have occurred across the major loan categories in the Company's originated and PNCI loan portfolios. This analysis is based on loan grades by pool and the loss history of these pools. This analysis covers the Company's entire originated and PNCI loan portfolios including unused commitments but excludes any loans that were analyzed individually and assigned a specific allowance as discussed above. The total amount allocated for this component is determined by applying loss estimation factors to outstanding loans and loan commitments. The loss factors were previously based primarily on the Company's historical loss experience tracked over a five-year period and adjusted as appropriate for the input of current trends and events. Because historical loss experience varies for the different categories of originated loans, the loss factors applied to each category also differed. In addition, there is a greater chance that the Company would suffer a loss from a loan that was risk rated less than satisfactory than if the loan was last graded satisfactory. Therefore, for any given category, a larger loss estimation factor was applied to less than satisfactory loans than to those that the Company last graded as satisfactory. The resulting formula allowance was the sum of the allocations determined in this manner.

The third component of the allowances for originated and PNCI loan losses, the environmental factor allowance, is a component that is not allocated to specific loans or groups of loans, but rather is intended to absorb losses that may not be provided for by the other components.

There are several primary reasons that the other components discussed above might not be sufficient to absorb the losses present in the originated and PNCI loan portfolios, and the environmental factor allowance is used to provide for the losses that have occurred because of them.

The first reason is that there are limitations to any credit risk grading process. The volume of originated and PNCI loans makes it impractical to re-grade every loan every quarter. Therefore, it is possible that some currently performing originated or PNCI loans not recently graded will not be as strong as their last grading and an insufficient portion of the allowance will have been allocated to them. Grading and loan review often must be done without knowing whether all relevant facts are at hand. Troubled borrowers may deliberately or inadvertently omit important information from reports or conversations with lending officers regarding their financial condition and the diminished strength of repayment sources.

The second reason is that the loss estimation factors are based primarily on historical loss totals. As such, the factors may not give sufficient weight to such considerations as the current general economic and business conditions that affect the Company's borrowers and specific industry conditions that affect borrowers in that industry. The factors might also not give sufficient weight to other environmental factors such as changing economic conditions and interest rates, portfolio growth, entrance into new markets or products, and other characteristics as may be determined by Management.

Specifically, in assessing how much environmental factor allowance needed to be provided, management considered the following:

- with respect to the economy, management considered the effects of changes in GDP, unemployment, CPI, debt statistics, housing starts, housing sales, auto sales, agricultural prices, home affordability, and other economic factors which serve as indicators of economic health and trends and which may have an impact on the performance of our borrowers, and
- with respect to changes in the interest rate environment, management considered the recent changes in interest rates and the resultant economic impact it may have had on borrowers with high leverage and/or low profitability; and
- with respect to changes in energy prices, management considered the effect that increases, decreases or volatility may have on the performance of our borrowers, and
- with respect to loans to borrowers in new markets and growth in general, management considered the relatively short seasoning of such loans and the lack of experience with such borrowers, and
- with respect to loans that have not yet been identified as impaired, management considered the volume and severity of past due loans.

Each of these considerations was assigned a factor and applied to a portion or the entire originated and PNCI loan portfolios. Since these factors are not derived from experience and are applied to large non-homogeneous groups of loans, they are available for use across the portfolio as a whole.

During the three months ended March 31, 2014, the Company modified its methodology used to determine the allowance for changing environmental factors by adding a new environmental factor based on the California Home Affordability Index ("CHAI"). The CHAI measures the percentage of households in California that can afford to purchase the median priced home in California based on current

home prices and mortgage interest rates. The use of the CHAI environmental factor consists of comparing the current CHAI to its historical baseline, and allows management to consider the adverse impact that a lower than historical CHAI may have on general economic activity and the performance of our borrowers. Based on an analysis of historical data, management believes this environmental factor gives a better estimate of current economic activity compared to other environmental factors that may lag current economic activity to some extent. This change in methodology resulted in no change to the allowance for loan losses as of March 31, 2014 compared to what it would have been without this change in methodology.

Acquired loans are valued as of acquisition date in accordance with FASB ASC Topic 805, Business Combinations. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are referred to as purchased credit impaired (PCI) loans. PCI loans are accounted for under FASB ASC Topic 310-30, Loans and Debt Securities Acquired with Deteriorated Credit Quality. In addition, because of the significant credit discounts associated with the loans acquired in the Granite acquisition, the Company elected to account for all loans acquired in the Granite acquisition under FASB ASC Topic 310-30, and classify them all as PCI loans. Under FASB ASC Topic 805 and FASB ASC Topic 310-30, PCI loans are recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date. Fair value is defined as the present value of the future estimated principal and interest payments of the loan, with the discount rate used in the present value calculation representing the estimated effective yield of the loan. The difference between contractual future payments and estimated future payments is referred to as the nonaccretable difference. The difference between estimated future payments and the present value of the estimated future payments is referred to as the accretable yield. The accretable yield represents the amount that is expected to be recorded as interest income over the remaining life of the loan. If after acquisition, the Company determines that the future cash flows of a PCI loan are expected to be more than the originally estimated, an increase in the discount rate (effective yield) would be made such that the newly increased accretable yield would be recognized, on a level yield basis, over the remaining estimated life of the loan. If after acquisition, the Company determines that the future cash flows of a PCI loan are expected to be less than the previously estimated, the discount rate would first be reduced until the present value of the reduced cash flow estimate equals the previous present value however, the discount rate may not be lowered below its original level. If the discount rate has been lowered to its original level and the present value has not been sufficiently lowered, an allowance for loan loss would be established through a provision for loan losses charged to expense to decrease the present value to the required level. If the estimated cash flows improve after an allowance has been established for a loan, the allowance may be partially or fully reversed depending on the improvement in the estimated cash flows. Only after the allowance has been fully reversed may the discount rate be increased. PCI loans are put on nonaccrual status when cash flows cannot be reasonably estimated. PCI loans are charged off when evidence suggests cash flows are not recoverable. Foreclosed assets from PCI loans are recorded in foreclosed assets at fair value with the fair value at time of foreclosure representing cash flow from the loan. ASC 310-30 allows PCI loans with similar risk characteristics and acquisition time frame to be "pooled" and have their cash flows aggregated as if they were one loan.

The Components of the Allowance for Loan Losses

The following table sets forth the allowance for loan losses as of the dates indicated:

(In thousands)	 March 31, 2015		ecember 31, 2014
Allowance for originated and PNCI loan losses:			
Specific allowance	\$ 4,692	\$	4,267
Formula allowance	20,988		22,076
Environmental factors allowance	 7,277		6,815
Allowance for originated and PNCI loan losses	32,957		33,158
Allowance for PCI loan losses	 3,098		3,427
Allowance for loan losses	\$ 36,055	\$	36,585
Allowance for loan losses to loans	 1.55%		1.60%

For additional information regarding the allowance for loan losses, including changes in specific, formula, and environmental factors allowance categories, see "Provision for Loan Losses" at "Results of Operations" and "Allowance for Loan Losses" above. Based on the current conditions of the loan portfolio, management believes that the \$36,055,000 allowance for loan losses at March 31, 2015 is adequate to absorb probable losses inherent in the Bank's loan portfolio. No assurance can be given, however, that adverse economic conditions or other circumstances will not result in increased losses in the portfolio.

The following table summarizes the allocation of the allowance for loan losses between loan types as of the dates indicated:

(In thousands)	N	March 31, 2015		December 31, 2014	
Real estate mortgage	\$	13,216	\$	12,313	
Consumer		17,863		18,201	
Commercial		3,976		4,226	
Real estate construction		1,000		1,845	
Total allowance for loan losses	\$	36,055	\$	36,585	

The following table summarizes the allocation of the allowance for loan losses between loan types as a percentage of the total allowance for loan losses as of the dates indicated:

(In thousands)	March 31, 2015	December 31, 2014
Real estate mortgage	36.7%	33.7%
Consumer	49.5%	49.7%
Commercial	11.0%	11.6%
Real estate construction	2.8%	5.0%
Total allowance for loan losses	100.0%	100.0%

The following table summarizes the allocation of the allowance for loan losses as a percentage of the total loans for each loan category as of the dates indicated:

(In thousands)	March 31, 2015	December 31, 2014
Real estate mortgage	0.80%	0.76%
Consumer	4.34%	4.36%
Commercial	2.24%	2.42%
Real estate construction	1.17%	2.46%
Total allowance for loan losses	1.55%	1.60%

The following tables summarize the activity in the allowance for loan losses, reserve for unfunded commitments, and allowance for losses (which is comprised of the allowance for loan losses and the reserve for unfunded commitments) for the periods indicated (in thousands):

	Three months ended March 31,

Commercial real estate				 					
Total covered	445	_		_		_			445
Total foreclosed assets	\$ 5,892		\$ 316	\$ (495)	\$ (67)	\$ 1,244		\$	4,894

Premises and Equipment

Premises and equipment were comprised of:

(In thousands)	<u>N</u>	December 31, 2014		
Land & land improvements	\$	8,883	\$	8,933
Buildings		38,939		39,638
Furniture and equipment		36,260		28,446
Less: Accumulated depreciation		84,082 (41,252)		77,017 (33,570)
		42,830		43,447
Construction in progress		16		46
Total premises and equipment	\$	42,846	\$	43,493

During the three months ended March 31, 2015, premises and equipment decreased \$647,000 due to purchases of \$706,000, that were partially offset by depreciation of \$1,268,000 and disposals of premises and equipment with net book value of \$85,000. Included in the depreciation expense of \$1,268,000 during the three months ended March 31, 2015 was \$131,000 of accelerated depreciation of leasehold improvements taken on one branch that was closed during the quarter ended March 31, 2015.

Intangible Assets

Intangible assets at March 31, 2015 and December 31, 2014 were comprised of the following:

(In thousands)	March 31, 2015		December 31, 2014		
Core-deposit intangible	\$	6,762	\$	7,051	
Goodwill		63,462		63,462	
Total intangible assets	\$	70,224	\$	70,513	

The core-deposit intangible assets resulted from the Bank's acquisition of North Valley Bancorp in 2014, Citizens in 2011, and Granite in 2010. The goodwill intangible asset includes \$47,943,000 from the North Valley Bancorp acquisition in 2014, and \$15,519,000 from the North State National Bank acquisition in 2003. Amortization of core deposit intangible assets amounting to \$289,000, \$52,000, and \$52,000 was recorded during the three months ended March 31, 2015, 2014, and 2013 respectively.

Deposits

Deposits at March 31, 2015 decreased \$30,935,000 (0.91%) over the 2014 year-end balances to \$3,349,488,000. All categories of deposits were up at March 31, 2015 when compared to December 31, 2014 except time certificates and noninterest-bearing deposits. Included in the March 31, 2015 and December 31, 2014 certificate of deposit balances are \$5,000,000 from the State of California. The Bank participates in a deposit program offered by the State of California whereby the State may make deposits at the Bank's request subject to collateral and creditworthiness constraints. The negotiated rates on these State deposits are generally more favorable than other wholesale funding sources available to the Bank.

Long-Term Debt

See Note 16 to the condensed consolidated financial statements at Item 1 of Part I of this report for information about the Company's other borrowings, including long-term debt.

Junior Subordinated Debt

See Note 17 to the condensed consolidated financial statements at Item 1 of Part I of this report for information about the Company's junior subordinated debt.

Off-Balance Sheet Arrangements

See Note 18 to the condensed consolidated financial statements at Item 1 of Part I of this report for information about the Company's commitments and contingencies including off-balance-sheet arrangements.

Capital Resources

The current and projected capital position of the Company and the impact of capital plans and long-term strategies are reviewed regularly by Management.

The Company adopted and announced a stock repurchase plan on August 21, 2007 for the repurchase of up to 500,000 shares of the Company's common stock from time to time as market conditions allow. The 500,000 shares authorized for repurchase under this plan represented approximately 3.2% of the Company's approximately 15,815,000 common shares outstanding as of August 21, 2007. The Company did not repurchase any shares during the three months ended March 31, 2015. This plan has no stated expiration date for the repurchases. As of March 31, 2015, the Company had repurchased 166,600 shares under this plan, which left 333,400 shares available for repurchase under the plan. Shares that are repurchased in accordance with the provisions of a Company stock option plan or equity compensation plan are not counted against the number of shares repurchased under the repurchase plan adopted on August 21, 2007.

The Company's primary capital resource is shareholders' equity, which was \$424,833,000 at March 31, 2015. This amount represents an increase of \$6,661,000 (1.6%) from December 31, 2014, the net result of comprehensive income for the period of \$8,456,000, and the effect of equity compensation vesting and tax benefits of \$342,000, and the exercise of stock options of \$887,000, that were partially offset by dividends paid of \$2,515,000, and the repurchase of common stock as it was tendered in lieu of cash to exercise stock options and pay related taxes of \$509,000. The Company's ratio of equity to total assets was 10.9% and 10.7% as of March 31, 2015 and December 31, 2014, respectively.

In July, 2013, the federal banking agencies approved final rules that substantially amend the regulatory risk-based capital rules applicable to TriCo and the Bank. The final rules implement the "Basel III" regulatory capital reforms and changes required by the Dodd-Frank Act. "Basel III" refers to two consultative documents released by the Basel Committee on Banking Supervision in December 2009, the rules text released in December 2010, and loss absorbency rules issued in January 2011, which include significant changes to bank capital, leverage and liquidity requirements.

The rules include new risk-based capital and leverage ratios, which will be phased in from 2015 to 2019, and will refine the definition of what constitutes "capital" for purposes of calculating those ratios. The new minimum capital level requirements applicable to TriCo and the Bank as of January 1, 2015 under the final rules are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. The final rules also establish a "capital conservation buffer" above the new regulatory minimum capital requirements, which must consist entirely of common equity Tier 1 capital. The capital conservation buffer will be phased-in over four years beginning on January 1, 2016, as follows: the maximum buffer will be 0.625% of risk-weighted assets for 2016, 1.25% for 2017, 1.875% for 2018, and 2.5% for 2019 and thereafter. This will result in the following minimum ratios beginning in 2019: (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. Under the final rules, institutions are subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its

capital level falls below the buffer amount. These limitations establish a maximum percentage of eligible retained income that could be utilized for such actions.

Basel III provided discretion for regulators to impose an additional buffer, the "countercyclical buffer," of up to 2.5% of common equity Tier 1 capital to take into account the macro-financial environment and periods of excessive credit growth. However, the final rules permit the countercyclical buffer to be applied only to "advanced approach banks" (i.e., banks with \$250 billion or more in total assets or \$10 billion or more in total foreign exposures), which currently excludes TriCo and the Bank. The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses, as well as certain instruments that will no longer qualify as Tier 1 capital, some of which will be phased out over time. However, the final rules provide that small depository institution holding companies with less than \$15 billion in total assets as of December 31, 2009 (such as TriCo) will be able to permanently include non-qualifying instruments that were issued and included in Tier 1 or Tier 2 capital prior to May 19, 2010 in additional Tier 1 or Tier 2 capital until they redeem such instruments or until the instruments mature. The final rules also allow banks other than advanced approach banks to make a one-time election to permanently exclude or include unrealized gains and losses on available for sale securities in accumulated other comprehensive income from Tier 1 capital. The Company has elected to exclude unrealized gains and losses on available for sale securities in accumulated other comprehensive income from Tier 1 capital.

The final rules also contain revisions to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including the Bank, if their capital levels begin to show signs of weakness. These revisions became effective on January 1, 2015. Under the prompt corrective action requirements, which are designed to complement the capital conservation buffer, insured depository institutions will be required to meet the following increased capital level requirements in order to qualify as "well capitalized:" (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8% (increased from 6%); (iii) a total capital ratio of 10% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 5% (increased from 4%).

The final rules also set forth certain changes for the calculation of risk-weighted assets, which will be phased in beginning January 1, 2015. The standardized approach final rule utilizes an increased number of credit risk exposure categories and risk weights, and also addresses: (i) an alternative standard of creditworthiness consistent with Section 939A of the Dodd-Frank Act; (ii) revisions to recognition of credit risk mitigation; (iii) rules for risk weighting of equity exposures and past due loans; (iv) revised capital treatment for derivatives and repo-style transactions; and (v) disclosure requirements for top-tier banking organizations with \$50 billion or more in total assets that are not subject to the "advance approach rules" that apply to banks with greater than \$250 billion in consolidated assets. We believe that we were in compliance with the requirements applicable to us as set forth in the final rules as of January 1, 2015 and March 31, 2015.

The following summarizes the Company's ratios of capital to risk-adjusted assets as of the dates indicated:

	March	March 31, 2015		er 31, 2014
	Ratio	Minimum Regulatory Requirement	Ratio	Minimum Regulatory Requirement
Total capital	15.23%	8.00%	15.63%	8.00%
Tier I capital	13.99%	6.00%	14.38%	4.00%
Common equity Tier 1 capital	12.11%	4.50%	n/a	n/a
Leverage	10.68%	4.00%	10.80%	4.00%

See Note 19 and Note 29 to the condensed consolidated financial statements at Item 1 of Part I of this report for additional information about the Company's capital resources.

Liquidity

The Bank's principal source of asset liquidity is cash at Federal Reserve and other banks and marketable investment securities available for sale. At March 31, 2015, cash at Federal Reserve and other banks in excess of reserve requirements and investment securities available for sale totaled \$441,357,000, or 11.3% of total assets, representing a decrease of \$194,960,000 (30.6%) from 636,317,000, or 16.2% of total assets at December 31, 2014. This decrease in cash and securities available for sale is due mainly to increases in investments available for sale, investments held to maturity and loans during the three months ended March 31, 2015. In addition, the Company generates additional liquidity from its operating activities. The Company's profitability during the first three months of 2015 generated cash flows from operations of \$12,961,000 compared to \$12,286,000 during the first three months of 2014. Maturities of investment securities produced cash inflows of \$24,754,000 during the three months ended March 31, 2015 compared to \$10,889,000 for the three months ended March 31, 2014. During the three months ended March 31, 2015, the Company invested in securities totaling \$293,435,000 and loans totaling \$40,331,000 net of loan principal reductions, compared to \$107,790,000

investment in securities and \$14,326,000 of cash provided by net loan principal decreases, respectively, during the first three months of 2014. Proceeds from the sale of foreclosed assets accounted for \$806,000 and \$5,413,000 of investing sources of funds during the three months ended March 31, 2015 and 2014, respectively. These changes in investment and loan balances, and proceeds from sale of foreclosed assets, contributed to net cash used by investing activities of \$309,227,000 during the three months ended March 31, 2015, compared to net cash used by investing activities of \$107,849,000 during the three months ended March 31, 2014. Financing activities used net cash of \$33,234,000 during the three months ended March 31, 2015, compared to net cash used by financing activities of \$554,000 during the three months ended March 31, 2014. Deposit balance decreases accounted for \$30,935,000 of financing uses of funds during the three months ended March 31, 2015, compared to \$637,000 of financing sources of funds during the three months ended March 31, 2015, compared to \$637,000 of cash during the three months ended March 31, 2015 and 2014, respectively. The Company's liquidity is dependent on dividends received from the Bank. Dividends from the Bank are subject to certain regulatory restrictions.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company's assessment of market risk as of March 31, 2015 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the Company's disclosure controls and procedures as of March 31, 2015. Disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), are controls and procedures designed to reasonably assure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported on a timely basis. Disclosure controls are also designed to reasonably assure that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Based upon their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of March 31, 2015.

During the three months ended March 31, 2015, there were no changes in our internal controls or in other factors that have materially affected or are reasonably likely to materially affect our internal controls over financial reporting.

PART II - OTHER INFORMATION

Item 1 – Legal Proceedings

Due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

See Note 18 to the condensed consolidated financial statements at Item 1 of Part I of this report, for a discussion of the Company's involvement in litigation.

Item 1A – Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under "Part I—Item 1A—Risk Factors" in our Form 10-K for the year ended December 31, 2014 which are incorporated by reference herein. These factors could materially adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Item 2 – Unregistered Sales of Equity Securities and Use of Proceeds

The following table shows the repurchases made by the Company or any affiliated purchaser (as defined in Rule 10b-18(a)(3) under the Exchange Act) during the three months ended March 31, 2015:

Period	(a) Total number of shares purchased ⁽¹⁾	 verage price d per share	shares purchased as of part of publicly announced plans or programs	(d) Maximum number shares that may yet be purchased under the plans or programs ⁽²⁾	
Jan. 1-31, 2015	_	_	_	333,400	
Feb. 1-28, 2015	21,461	\$ 23.72	_	333,400	
Mar. 1-31, 2015	23,000	\$ 24.32	_	333,400	
Total	44,461	\$ 24.03		333,400	

- (1) Includes shares purchased by the Company's Employee Stock Ownership Plan and pursuant to various other equity incentive plans. See Note 19 to the condensed consolidated financial statements at Item 1 of Part I of this report, for a discussion of the Company's stock repurchased under equity compensation plans.
- (2) Does not include shares that may be purchased by the Company's Employee Stock Ownership Plan and pursuant to various other equity incentive plans.

Item 6 – Exhibits

Exhibit No.	Exhibit
2.1	Purchase and Assumption Agreement Whole Bank All Deposits, among the Federal Deposit Insurance Corporation, receiver of Granite Community Bank, N.A., Granite Bay, California, the Federal Deposit Insurance Corporation and Tri Counties Bank, dated as of May 28, 2010, and related addendum (incorporated by reference to Exhibit 2.1 to TriCo's Current Report on Form 8-K filed June 3, 2010).
2.2	Purchase and Assumption Agreement Whole Bank All Deposits, among the Federal Deposit Insurance Corporation, receiver of Citizens Bank of Northern California, Nevada City, California, the Federal Deposit Insurance Corporation and Tri Counties Bank, dated as of September 23, 2011, and related addendum (incorporated by reference to Exhibit 2.1 to TriCo's Current Report on Form 8-K filed September 27, 2011).
2.3	Agreement and Plan of Merger and Reorganization by and between TriCo and North Valley Bancorp dated January 21, 2014 (incorporated by reference to Exhibit 2.1 to TriCo's Current Report on Form 8-K filed January 21, 2014).
3.1	Restated Articles of Incorporation (incorporated by reference to Exhibit 3.1 to TriCo's Current Report on Form 8-K filed on March 17, 2009).
3.2	Bylaws of TriCo, as amended (incorporated by reference to Exhibit 3.1 to TriCo's Current Report on Form 8-K filed February 17, 2011).
4.1	Instruments defining the rights of holders of the long-term debt securities of the TriCo and its subsidiaries are omitted pursuant to section (b)(4)(iii)(A) of Item 601 of Regulation S-K. TriCo hereby agrees to furnish copies of these instruments to the Securities and Exchange Commission upon request.
10.1*	Form of Change of Control Agreement dated as of July 17, 2013, among TriCo, Tri Counties Bank and each of Dan Bailey, Craig Carney, Richard O'Sullivan, Thomas Reddish, and Ray Rios (incorporated by reference to Exhibit 10.2 to TriCo's Current Report on Form 8-K filed on July 23, 2013).
10.2*	TriCo's 1995 Incentive Stock Option Plan (incorporated by reference to Exhibit 4.1 to TriCo's Form S-8 Registration Statement dated August 23, 1995 (No. 33-62063)).
10.3*	TriCo's 2001 Stock Option Plan, as amended (incorporated by reference to Exhibit 10.7 to TriCo's Quarterly Report on Form 10-Q for the quarter ended June 30, 2005).
10.4*	TriCo's 2009 Equity Incentive Plan, as amended (incorporated by reference to Exhibit 10.2 to TriCo's Current Report on Form 8-K filed April 3, 2013).
10.5*	Amended Employment Agreement between TriCo and Richard Smith dated as of March 28, 2013 (incorporated by

Exhibit No.	Exhibit
	reference to Exhibit 10.1 to TriCo's Current Report on Form 8-K filed April 3, 2013).
10.6*	Transaction Bonus Agreement between TriCo Bancshares and Richard P. Smith dated as of August 7, 2014 (incorporated by reference to Exhibit 10.4 to TriCo's Form 8-K filed on August 13, 2014).
10.7*	Tri Counties Bank Executive Deferred Compensation Plan restated April 1, 1992, and January 1, 2005 (incorporated by reference to Exhibit 10.9 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2005).
10.8*	Tri Counties Bank Deferred Compensation Plan for Directors effective January 1, 2005 (incorporated by reference to Exhibit 10.10 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2005).
10.9*	2005 Tri Counties Bank Deferred Compensation Plan for Executives and Directors effective January 1, 2005 (incorporated by reference to Exhibit 10.11 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2005).
10.10*	Tri Counties Bank Supplemental Retirement Plan for Directors dated September 1, 1987, as restated January 1, 2001, and amended and restated January 1, 2004 (incorporated by reference to Exhibit 10.12 to TriCo's Quarterly Report on Form 10-Q for the quarter ended June 30, 2004).
10.11*	2004 TriCo Bancshares Supplemental Retirement Plan for Directors effective January 1, 2004 (incorporated by reference to Exhibit 10.13 to TriCo's Quarterly Report on Form 10-Q for the quarter ended June 30, 2004).
10.12*	Tri Counties Bank Supplemental Executive Retirement Plan effective September 1, 1987, as amended and restated January 1, 2004 (incorporated by reference to Exhibit 10.14 to TriCo's Quarterly Report on Form 10-Q for the quarter ended June 30, 2004).
10.13*	2004 TriCo Bancshares Supplemental Executive Retirement Plan effective January 1, 2004 (incorporated by reference to Exhibit 10.15 to TriCo's Quarterly Report on Form 10-Q for the quarter ended June 30, 2004).
10.14*	Form of Joint Beneficiary Agreement effective March 31, 2003 between Tri Counties Bank and each of George Barstow, Dan Bay, Ron Bee, Craig Carney, Robert Elmore, Greg Gill, Richard Miller, Richard O'Sullivan, Thomas Reddish, Jerald Sax, and Richard Smith (incorporated by reference to Exhibit 10.14 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).
10.15*	Form of Joint Beneficiary Agreement effective March 31, 2003 between Tri Counties Bank and each of Don Amaral, William Casey, Craig Compton, John Hasbrook, Michael Koehnen, Donald Murphy, Carroll Taresh, and Alex Vereschagin (incorporated by reference to Exhibit 10.15 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).
10.16*	Form of Tri Counties Bank Executive Long Term Care Agreement effective June 10, 2003 between Tri Counties Bank and each of Craig Carney, Richard Miller, Richard O'Sullivan, and Thomas Reddish (incorporated by reference to Exhibit 10.16 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).
10.17*	Form of Tri Counties Bank Director Long Term Care Agreement effective June 10, 2003 between Tri Counties Bank and each of Don Amaral, William Casey, Craig Compton, John Hasbrook, Michael Koehnen, Donald Murphy, Carroll Taresh, and Alex Vereschagin (incorporated by reference to Exhibit 10.17 to TriCo's Quarterly Report on Form 10-Q for the quarter ended September 30, 2003).
10.18*	Form of Indemnification Agreement between TriCo and its directors and executive officers (incorporated by reference to Exhibit 10.1 to TriCo's Current Report on Form 8-K filed September 10, 2013).
10.19*	Form of Indemnification Agreement between Tri Counties Bank its directors and executive officers (incorporated by reference to Exhibit 10.2 to TriCo's Current Report on Form 8-K filed September 10, 2013).
10.20*	Form of Stock Option Agreement and Grant Notice pursuant to TriCo's 2009 Equity Incentive Plan (incorporated by reference to Exhibit 10.1 to TriCo's Current Report on Form 8-K filed May 25, 2010).
10.21*	Form of Restricted Stock Unit Agreement and Grant Notice for Non-Employee Executives pursuant to TriCo's 2009 Equity Incentive Plan (incorporated by reference to Exhibit 10.1 to TriCo's Current Report on Form 8-K filed November 14, 2014).
10.22*	Form of Restricted Stock Unit Agreement and Grant Notice for Directors pursuant to TriCo's 2009 Equity Incentive Plan (incorporated by reference to Exhibit 10.1 to TriCo's Current Report on Form 8-K filed November 14, 2014).
10.23*	Form of 2014 Performance Award Agreement and Grant Notice pursuant to TriCo's 2009 Equity Incentive Plan (incorporated by reference to Exhibit 10.3 to TriCo's Current Report on Form 8-K filed August 13, 2014).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

TRICO BANCSHARES

(Registrant)

Date: May 11, 2015 /s/ Thomas J. Reddish

Thomas J. Reddish Executive Vice President and Chief Financial Officer (Principal accounting and financial officer)

EXHIBITS

Exhibit 31.1

Rule 13a-14(a)/15d-14(a) Certification of CEO

I, Richard P. Smith, certify that;

- 1. I have reviewed this report on Form 10-Q of TriCo Bancshares;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:
 - Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be
 designed under our supervision, to ensure that material information relating to the registrant, including its
 consolidated subsidiary, is made known to us by others within those entities, particularly during the period in
 which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial data; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Exhibit 31.2

Rule 13a-14(a)/15d-14(a) Certification of CFO

I, Thomas J. Reddish, certify that;

- 1. I have reviewed this report on Form 10-Q of TriCo Bancshares;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and we have:
 - Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be
 designed under our supervision, to ensure that material information relating to the registrant, including its
 consolidated subsidiary, is made known to us by others within those entities, particularly during the period in
 which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial data; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: May 11, 2015 /s/ Thomas J. Reddish

Thomas J. Reddish
Executive Vice President and Chief Financial Officer

Exhibit 32.1

Section 1350 Certification of CEO

In connection with the Quarterly Report of TriCo Bancshares (the "Company") on Form 10-Q for the period ended March 31, 2015 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Richard P. Smith, President and Chief Executive Officer of the Company, certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.
