Net interest income (not FTE)		<u>\$ 26,072</u>			<u>\$ 26,339</u>			<u>\$ 24,569</u>	

Net interest income (FTE) during the first quarter of 2014 increased \$1,524,000 (6.2%) from the same period in 2013 to \$26,154,000. The increase in net interest income (FTE) was due primarily to a \$242,907,000 (147%) increase in the average balance of investments to \$407,848,000, and a \$122,666,000 (7.9%) increase in the average balance of loans to \$1,671,231,000 that were partially offset by a 54 basis point decrease in the average yield on loans from 6.22% during the three months ended March 31, 2013 to 5.68% during the three months ended March 31, 2014. During much of 2013 and the three months ended March 31, 2014, the Company used a portion of its Fed funds sold to buy investments. The increase in average loan balances was due to organic loan growth and the purchase of \$62,698,000 of loans during 2013. The decrease in average loan yields was due primarily to declines in market yields on new and renewed loans compared to yields on repricing, maturing, and paid off loans. The increases in average investment and loan balances added \$1,780,000 and \$1,907,000 to net interest income (FTE) while the decrease in average loan yields reduced net interest income (FTE) by \$2,241,000 when compared to the year-ago quarter. During much of 2013 and the three months ended March 31, 2014, the Company deployed some of its excess Federal funds sold into some higher yielding investments while trying to maintain an appropriate level of interest rate risk. Loans acquired through purchase or acquisition of other banks are classified as Purchased Not Credit Impaired (PNCI), Purchased Credit Impaired – cash basis (PCI – cash basis), or Purchased Credit Impaired – other (PCI – other). Loans not acquired in an acquisition or otherwise “purchased” are classified as “originated”. Often, such purchased loans are purchased at a discount to face value, and part of this discount is accreted into (added to) interest income over the remaining life of the loan. Generally, as time goes on, the effect of this discount accretion decreases as these purchased loans mature or payoff early. Further details regarding interest income from loans, including fair value discount accretion, may be found under the heading “Supplemental Loan Interest Income Data” in the Consolidated Financial Data table at the end of this press release.

The Company benefited from a \$1,355,000 reversal of provision for loan losses during the three months ended March 31, 2014 versus a benefit of \$1,108,000 during the three months ended March 31, 2013. The reversal of provision for loan losses during the first quarter of 2014 was primarily the result of improvements in collateral values and estimated cash flows related to nonperforming originated loans and purchased credit impaired loans, reductions in nonperforming originated loans and purchased credit impaired loans, and decreased loss histories for performing originated loans.

The following table presents the key components of noninterest income for the periods indicated:

(dollars in thousands)	Three months ended		\$ Change	% Change
	March 31,			
	2014	2013		
Service charges on deposit accounts	\$2,690	\$3,140	(\$450)	(14.3%)

Increase in cash value of life insurance	397	426	(29)	(6.8%)
Change in indemnification asset	(412)	(101)	(311)	307.9%
Gain on sale of foreclosed assets	1,227	551	676	122.7%
Other noninterest income	386	358	28	7.8%
Total other noninterest income	<u>2,833</u>	<u>4,289</u>	<u>(1,456)</u>	<u>(33.9%)</u>
Total noninterest income	<u>\$8,295</u>	<u>\$10,218</u>	<u>(\$1,923)</u>	<u>(18.8%)</u>

Noninterest income decreased \$1,923,000 (18.8%) to \$8,295,000 in the three months ended March 31, 2014 when compared to the three months ended March 31, 2013. The decrease in noninterest income was due primarily to a \$1,830,000 (79.9%) decrease in gain on sale of loans to \$464,000, and a \$450,000 (14.3%) decrease in service charges on deposit accounts that were partially offset by a \$676,000 (123%) increase in gain on sale of foreclosed assets to \$1,227,000. The decrease in gain on sale of loans was primarily due to the increase in residential real estate mortgage rates that occurred in May 2013 that resulted in a significant decrease in mortgage refinance activity, and thus a significant decrease in newly originated mortgages for the Company to sell. The decrease in service charges on deposit accounts was primarily due to reduced customer overdrafts and a resulting decrease in non-sufficient funds fees. The increase in gain on sale of foreclosed assets was due to a general increase in property values and sales activity from their lows during the financial crisis that started in 2008.

Salary and benefit expenses increased \$342,000 (2.6%) to \$13,303,000 during the three months ended March 31, 2014 compared to the three months ended March 31, 2013. Base salaries increased \$518,000 (6.2%) to \$8,866,000 during the three months ended March 31, 2014 versus the year ago period despite a 1.5% decrease in the average number of full time equivalent employees from 743 to 732. The average number of full time equivalent employees decreased primarily due to the reductions in staff from the closing of five branches since December 31, 2012 that was partially offset by increases in full time equivalent back office staff and management. The salary expense attributable to the newly added back office staff and management outweighed the reduction in salaries from the branch closings. Annual salary merit increases of approximately 2.5% also contributed to the increase in base salary expense. Incentive and commission related salary expenses decreased \$163,000 (12.7%) to \$1,123,000 during three months ended March 31, 2014 due primarily to decreases in production related incentives tied to reduced residential real estate mortgage loan originations and sales. Benefits expense, including retirement, medical and workers' compensation insurance, and taxes, decreased \$13,000 (0.4%) to \$3,314,000 during the three months ended March 31, 2014.

Other noninterest expenses increased \$1,374,000 (15.9%) to \$10,014,000 during the three months ended March 31, 2014 compared to the three months ended March 31, 2013. The increase in other noninterest expense was due

primarily a \$303,000 (18.3%) increase in occupancy expense to \$1,962,000 that included \$238,000 of accelerated depreciation expense of leasehold improvements related to the closing of two branches in the quarter ended March 31, 2014, a \$255,000 (58%) reduction in reversal of provision for losses on unfunded commitments to \$185,000 from \$440,000, a \$228,000 (44.8%) increase in professional fees to \$739,000 that included \$296,000 of legal and consulting fees related to the proposed merger with North Valley Bancorp, a \$147,000 (29.6%) increase in ATM network charges to \$643,000, and a \$100,000 (9.3%) increase in data processing and software expense.
