

## TRICO BANCSHARES ANNOUNCES FOURTH QUARTER 2023 RESULTS

### Notable Items from the Quarter

- Net income was \$26.1 million compared to \$30.6 million in the trailing quarter, and compared to \$36.3 million in the same quarter of the prior year; Pre-tax pre-provision net revenue was \$42.4 million compared to \$46.2 million in the trailing quarter, and compared to \$55.3 million in the same quarter of the prior year
- Cash flows generated from the investment securities portfolio and use of borrowing capacities continue to support the overall balance sheet with the loan to deposit ratio reaching 86.7%
- Proceeds of \$46.9 million from the sale of available-for-sale investment securities resulted in a pre-tax realized loss of \$120,000 and an expected earn back period of less than 9-months.
- Average yield on earning assets was 5.10%, an increase of 16 basis points over the 4.94% in the trailing quarter, and an increase of 58 basis points over the 4.52% from the same quarter in the prior year
- Net interest margin was 3.81% in the recent quarter, narrowing 7 basis points from 3.88% in the trailing quarter. Over the past several quarters the pace of margin compression has continued to slow, which is consistent with management's expectation that net interest margin will reach an inflection point by mid-2024
- We continue to operate without the utilization of brokered deposits or FRB's Bank Term Funding Program
- Loan balances increased \$85.8 million or 1.3% while deposit balances declined \$175.6 million or 2.2% from the trailing quarter
- The average cost of total deposits was 1.05% for the quarter as compared to 0.86% in the trailing quarter and 0.10% in the same quarter of the prior year and, as a result, the Company's total cost of deposits have increased 101 basis points since FOMC rate actions began in March 2022, which translates to a cycle-to-date deposit beta of 19.2%

"The cumulative impact of the FOMC's series of rate increases, along with the overall level of higher interest rates appears to be slowing the rate of inflation and, just as importantly, reducing borrowers' overall demand for credit. As consumers and businesses adjust to a 'higher for longer' rate cycle, our focus will continue to be on driving new customer acquisition opportunities. We continue to be cautious and diligent in our approach to our allowance and the management of our loan portfolio but are not seeing systemic weakness and overall levels of non-performing loans remain historically low," explained Rick Smith, President and Chief Executive Officer. Peter Wiese, EVP and Chief Financial Officer added, "2023 was eventful and challenging for TriCo and the industry alike as the continued higher interest rate environment caused compression on margins while cyber costs and the regulatory response to bank failures caused pressure on non-interest expenses. As we look forward to 2024, we are confident that continuing to maintain a fortress balance sheet, along with effective execution of long-term strategies will drive organic and acquisitive revenue growth."

CHICO, CA – (January 25, 2024) – TriCo Bancshares (NASDAQ: TCBK) (the "Company"), parent company of Tri Counties Bank, today announced net income of \$26.1 million for the quarter ended December 31, 2023, compared to \$30.6 million during the trailing quarter ended September 30, 2023, and \$36.3 million during the quarter ended December 31, 2022. Diluted earnings per share were \$0.78 for the fourth quarter of 2023, compared to \$0.92 for the trailing quarter and \$1.09 during the fourth quarter of 2022.

## Balance Sheet

Total loans outstanding grew to \$6.8 billion as of December 31, 2023, an organic increase of 5.3% over December 31, 2022. As compared to September 30, 2023, total loans outstanding increased during the quarter by \$85.8 million or 5.1% annualized. Investments decreased to \$2.31 billion as of December 31, 2023, an annualized decrease of 12.4% over December 31, 2022. Quarterly average earning assets to quarterly total average assets was 91.6% on December 31, 2023, compared to 91.4% at December 31, 2022. The loan-to-deposit ratio was 86.7% on December 31, 2023, as compared to 77.4% at December 31, 2022. The Company did not utilize brokered deposits during 2023 or 2022 and has relied solely on short-term borrowings to fund cash flow timing differences.

Total shareholders' equity increased by \$89.3 million during the quarter ended December 31, 2023, as a result of accumulated other comprehensive losses decreasing by \$72.2 million and net income of \$26.1 million, offset partially by cash dividend payments on common stock of approximately \$10.0 million. As a result, the Company's book value grew to \$34.86 per share at December 31, 2023, compared to \$31.39 at December 31, 2022. The Company's tangible book value per share, a non-GAAP measure, calculated by subtracting goodwill and other intangible assets from total shareholders' equity and dividing that sum by total shares outstanding, was \$25.39 per share at December 31, 2023, as compared to \$21.76 at December 31, 2022. As noted above, changes in the fair value of available-for-sale investment securities, net of deferred taxes continue to create moderate levels of volatility in tangible book value per share.

### Trailing Quarter Balance Sheet Change

Ending balances (dollars in thousands)	December 31, 2023	September 30, 2023	\$ Change	Annualized % Change
Total assets	\$ 9,910,089	\$ 9,897,006	\$ 13,083	0.5 %
Total loans	6,794,470	6,708,666	85,804	5.1
Total investments	2,305,882	2,333,162	(27,280)	(4.7)
Total deposits	7,834,038	8,009,643	(175,605)	(8.8)
Total other borrowings	632,582	537,975	94,607	70.3

Loans outstanding increased by \$85.8 million or 5.1% on an annualized basis during the quarter ended December 31, 2023. During the quarter, loan originations/draws totaled approximately \$450.0 million while payoffs/repayments of loans totaled \$368.0 million, which compares to originations/draws and payoffs/repayments during the trailing quarter ended of \$495.0 million and \$308.0 million, respectively. While origination volume decreased from the previous quarter, activity levels continue to be lower relative to the comparative period in 2022 due in part to disciplined pricing and underwriting, as well as decreased borrower appetite given economic uncertainties. Investment security balances decreased \$27.3 million or 4.7% on an annualized basis as the result of net prepayments, maturities, and sales totaling approximately \$130.7 million, offset by net increases in the market value of securities of \$103.6 million. Management intends to utilize excess cash flows from the investment security portfolio to support loan growth or reduce borrowings, thus driving an improved mix of earning assets. Deposit balances decreased by \$175.6 million or 8.8% annualized during the period. Funding for the net cash outflows of loans, investment securities and deposits during the quarter were supported by a net increase of \$94.6 million in short-term borrowings, which totaled \$632.6 million at December 31, 2023.

Total other borrowings	632,582	264,605	367,977	139.1

Loan balances increased as a result of organic activities by approximately \$344.5 million or 5.3% during the twelve-month period ending December 31, 2023. Over the same period deposit balances have declined by \$495.0 million or 5.9%. The Company has offset these declines through the deployment of excess cash balances, runoff of investment security balances, and proceeds from short-term

Federal Home Loan Bank (FHLB) borrowings. As of December 31, 2023 and December 31, 2022, short-term borrowings from the FHLB totaled \$600.0 million and \$216.7 million and had a weighted average interest rate of 5.38% and 4.65%, respectively.

## Liquidity

The Company's primary sources of liquidity include the following for the periods indicated:

(dollars in thousands)	December 31, 2023	September 30, 2023	December 31, 2022
Borrowing capacity at correspondent banks and FRB	\$ 2,921,525	\$ 2,927,065	\$ 2,815,574

Estimated uninsured deposit balances	\$ 2,371,000	\$ 2,407,000	\$ 2,701,000

At December 31, 2023, the Company's primary sources of liquidity represented 50% of total deposits and 166% of estimated total uninsured (excluding collateralized municipal deposits and intercompany balances) deposits, respectively. As secondary sources of liquidity, the Company's held-to-maturity investment securities had a fair value of \$125.1 million, including approximately \$8.3 million in net unrealized losses. The Company did not utilize any brokered deposits during 2023 or 2022.

## Net Interest Income and Net Interest Margin

During the twelve-month period ended December 31, 2023, the Federal Open Market Committee's (FOMC) actions have resulted in an increase in the Fed Funds Rate by approximately 100 basis points. During the same period the Company's yield on total loans (excluding PPP) increased 54 basis points to 5.64% for the three months ended December 31, 2023, from 5.10% for the three months ended December 31, 2022. Moreover, the tax equivalent yield on the Company's investment security portfolio was 3.50% for the quarter ended December 31, 2023, an increase of 37 basis points from the 3.13% for the three months ended December 31, 2022. The cost of total interest-bearing deposits and total interest-bearing liabilities increased by 144 basis points and 169 basis points, respectively, between the three month periods ended December 31, 2023 and 2022. Since FOMC rate actions began in March 2022, the Company's cost of total deposits has increased 101 basis points which translates to a cycle to date deposit beta of 19.2%.

The Company continues to manage its cost of deposits through the use of various pricing and product mix strategies. As of December 31, 2023, September 30, 2023, and December 31, 2022, deposits priced utilizing these strategies totaled \$1.3 billion, \$1.2 billion and \$579.1 million, respectively, and carried weighted average rates of 3.60%, 3.53%, and 1.64%, respectively.

Loans may be acquired at a premium or discount to par value, in which case, the premium is amortized (subtracted from) or the discount is accreted (added to) interest income over the remaining life of the loan. The dollar impact of loan discount accretion and loan premium amortization decrease as the purchased loans mature or pay off early. Upon the early pay off of a loan, any remaining unaccreted discount or unamortized premium is immediately taken into interest income; and as loan payoffs may vary significantly from quarter to quarter, so may the impact of discount accretion and premium amortization on interest income. Despite the elevated rate environment, the prepayment rate of portfolio loans, inclusive of those acquired at a premium or discount, increased during 2023 as compared to 2022. During the year ended December 31, 2023 and December 31, 2022, the purchased loan discount accretion was \$5.7 million and \$5.5 million, respectively.

The following table shows the components of net interest income and net interest margin on a fully tax-equivalent (FTE) basis for the quarterly periods indicated:

(1) Fully taxable equivalent (FTE). All yields and rates are calculated using specific day counts for the period and year as applicable.

(2) Net interest spread is the average yield earned on interest-earning assets minus the average rate paid on interest-bearing liabilities.

(3) Net interest margin is computed by calculating the difference between interest income and interest expense, divided by the average balance of interest-earning assets.

Net interest income (FTE) during the three months ended December 31, 2023, decreased \$1.6 million or 1.8% to \$87.0 million compared to \$88.5 million during the three months ended September 30, 2023. In addition, net interest margin declined 7 basis points to 3.81%, compared to the trailing quarter. The decrease in net interest income is primarily attributed to an additional \$3.7 million or 21.4% in deposit interest expense due to changes in product mix as customers continue to be drawn towards higher paying accounts. Deposit cost increases during the current quarter were also influenced by continued competitive pricing pressures. As a partial offset, total interest income increased \$3.5 million or 3.1% as compared to the trailing quarter.

As compared to the same quarter in the prior year, average loan yields, excluding PPP, increased 54 basis points from 5.10% during the three months ended December 31, 2022, to 5.64% during the three months ended December 31, 2023. The accretion of discounts from acquired loans added 9 and 11 basis points to loan yields during the quarters ended December 31, 2023 and December 31, 2022, respectively.

The rates paid on interest bearing deposits increased by 26 basis points during the quarter ended December 31, 2023, compared to the trailing quarter. The cost of interest-bearing deposits increased by 144 basis points between the quarter ended December 31, 2023, and the same quarter of the prior year. In addition, the average balance of noninterest-bearing deposits decreased by \$148.9 million quarter over quarter and decreased by \$845.8 million from three month average for the period ended December 31, 2022 amidst a continued migration of customer funds to interest-bearing products. As of December 31, 2023, the ratio of average total noninterest-bearing deposits to total average deposits was 35.2%, as compared to 36.9% and 42.9% at September 30, 2023 and December 31, 2022, respectively.

### **Interest Rates and Earning Asset Composition**

Throughout 2023 market interest rates, including many rates that serve as reference indices for variable rate loans and investment securities increased. As noted above, these rate increases have continued to benefit growth in total interest income. As of December 31, 2023, the Company's loan portfolio consisted of approximately \$6.8 billion in outstanding principal with a weighted average coupon rate of 5.44%. During the three-month periods ending December 31, 2023, September 30, 2023, and December 31, 2022, the weighted average coupon on loan production in the quarter was 7.54%, 7.14% and 6.25%, respectively. Included in the December 31, 2023 loan total are adjustable rate loans totaling \$3.5 billion, of which, \$985.0 million are considered floating based on the Wall Street Prime index. In addition, the Company holds certain investment securities with fair values totaling \$355.4 million which are subject to repricing on not less than a quarterly basis.

### **Asset Quality and Credit Loss Provisioning**

During the three months ended December 31, 2023, the Company recorded a provision for credit losses of \$6.0 million, as compared to \$4.2 million during the trailing quarter, and \$4.2 million during the fourth quarter of 2022.

The following table presents details of the provision for credit losses for the periods indicated:

(dollars in thousands)	Three months ended		Twelve months ended	
	December 31, 2023	December 31, 2022	December 31, 2023	December 31, 2022

The allowance for credit losses (ACL) was \$121.5 million or 1.79% of total loans as of December 31, 2023. The provision for credit losses on loans of \$6.0 million during the recent quarter was the net effect of charge-offs and increases in reserves for qualitative factors and quantitative reserves under the cohort model from loan growth as well as a \$1.5 million increase in specific reserves for individually evaluated credits. On a comparative basis, the provision for credit losses of \$4.3 million during the three months ended December 31, 2022, was attributed to both loan growth and qualitative components of the ACL model. For the current quarter, the qualitative components of the ACL resulted in a net increase in required reserves due primarily to year over year increases in BBB US Corporate bond yields. The quantitative component of the ACL increased reserve requirements by approximately \$3.4 million over the trailing quarter, primarily attributed to increases in specific reserves and to a lesser extent, organic loan growth.

The Company utilizes a forecast period of approximately eight quarters and obtains the forecast data from publicly available sources as of the balance sheet date. This forecast data continues to evolve and includes improving shifts in the magnitude of changes for both the unemployment and GDP factors leading up to the balance sheet date. Despite continued declines on a year over year comparative basis, core inflation remains elevated from wage pressures, and higher living costs such as housing, energy and food prices resulting in a rising rate environment for nearly all of 2023. Management notes the rapid intervals of rate increases by the Federal Reserve may create repricing risk for certain borrowers and continued inversion of the yield curve, creates informed expectations of the US potentially entering a recession within 12 months. While projected cuts in interest rates from the Federal Reserve during 2024 may improve this outlook, the uncertainty associated with the extent and timing of these potential reductions has inhibited a material benefit to forecasted reserve levels. As a result, management continues to believe that certain credit weaknesses are likely present in the overall economy and that it is appropriate to cautiously maintain a reserve level that incorporates such risk factors.

Loans past due 30 days or more increased by \$11.3 million during the quarter ended December 31, 2023, to \$19.4 million, as compared to \$8.1 million at September 30, 2023. Of the total \$19.4 million in loans identified as past due, approximately \$12.9 million is less than 90 days past due, the majority of which is well-secured. Non-performing loans were \$31.9 million at December 31, 2023, an increase of \$2.1 million from \$29.8 million as of September 30, 2023, and an increase of \$10.6 million from \$21.3 million as of December 31, 2022. The increase in non-performing loans as compared to the trailing quarter is largely concentrated within agriculture lending, and specifically the result of declines in commodity pricing and therefore, expected revenue available to borrowers from harvest proceeds. Management continues to proactively work with these borrowers to identify actionable and appropriate resolution strategies which are customary for the industry. Of the \$31.9 million loans designated as non-performing as of December 31, 2023, approximately \$18.4 million are current with respect to payments required under their original loan agreements.

The following table illustrates the total loans by risk rating and their respective percentage of total loans for the periods presented:

Classified loans to total loans	1.29 %		1.22 %		1.11 %	
Loans past due 30+ days to total loans	0.29 %		0.12 %		0.08 %	

The ratio of classified loans of 1.29% as of December 31, 2023 increased 7 basis points from September 30, 2023 and increased 18 basis points from the comparative quarter ended 2022. The newly classified credits are spread amongst several agriculture relationships. As a percentage of total loans outstanding, classified assets remain consistent with volumes experienced prior to the recent quantitative easing cycle spurred by the COVID pandemic, and reflects management's historically conservative approach to credit risk monitoring. The Company's combined criticized loan balances increased during the quarter by \$15.1 million to \$191.3 million as of December 31, 2023 and Management believes any credit risk has been adequately reserved against.

As of December 31, 2023, other real estate owned consisted of nine properties with a carrying value of approximately \$2.7 million, an increased of \$0.2 million from the trailing quarter ended.

Non-performing assets of \$34.6 million at December 31, 2023, represented 0.35% of total assets, a change from the \$32.7 million or 0.33% and \$24.8 million or 0.25% as of September 30, 2023 and December 30, 2022, respectively.

In addition to the allowance for credit losses above, the Company has acquired various performing loans whose fair value as of the acquisition date was determined to be less than the principal balance owed on those loans. This difference represents the collective discount of credit, interest rate and liquidity measurements which is expected to be amortized over the life of the loans. As of December 31, 2023, the unamortized discount associated with acquired loans totaled \$24.6 million.

### Non-interest Income

Non-interest income increased \$0.1 million or 0.4% to \$16.0 million during the three months ended December 31, 2023, compared to \$16.0 million during the quarter ended September 30, 2023. Other service fees increased by \$0.3 million or 25.4% resulting from improved profitability on small business account services. This was partially offset by a decline of \$0.2 million or 219.8% in the value of mortgage servicing rights attributed to a decrease in the reference rates during the quarter. A loss on the sale of investment securities

totaling \$0.1 million was recorded during the quarter in connection with the Company's strategic sale of \$46.9 million in available for sale securities.

Total non-interest income	\$ 61,400	\$ 63,046	\$ (1,646)	(2.6)%

Non-interest income decreased \$1.6 million or 2.6% to \$61.4 million during the year ended December 31, 2023, as compared to \$63.0 million during the year ended December 31, 2022. During 2023, total service charges and fees increased \$323,000, which is net of approximately \$930,000 in waived or reversed fees related to the network outage that occurred in the first quarter of the year. Mortgage origination related activity has declined year over year from elevated interest rates, as the income recorded from the sale of loans is down \$1.2 million or 50.2%. Changes in interest rates also led to a decline in fair value of mortgage servicing rights during the twelve months ended December 31, 2023, which decreased by \$0.8 million or 268.1%, as compared to the trailing twelve month period ended. Other income declined \$1.5 million or 63.1%, \$0.7 million of which is attributed to the sale of deposits mentioned above.

Non-interest expense for the quarter ended December 31, 2023, increased \$2.4 million or 4.1% to \$60.3 million as compared to \$57.9 million during the trailing quarter ended September 30, 2023. Total salaries and benefits expense decreased by \$0.4 million or 1.2%, largely reflecting the reduction in incentive compensation paid on production and sales volumes. Other changes in non-interest expenses were primarily the result of expense timing and other operational activities.

The following table presents the key components of non-interest expense for the current and prior year quarterly periods indicated:

Non-interest expense increased \$0.8 million or 1.3% to \$60.3 million during the three months ended December 31, 2023, as compared to \$59.5 million for the quarter ended December 31, 2022. Total salaries and benefits expense decreased by \$2.6 million or 7.0% to \$34.1 million, largely from a reduction in incentive compensation, and the absence of a non-recurring charge of \$2.1 million in the comparative 2022 period following amendments to certain of the Company's retirement plans. Data processing and software expenses increased by \$0.9 million or 22.3% related to ongoing investments in the Company's data management and security infrastructure. The increase in professional fees of \$0.9 million was directly associated with various legal and consulting projects during the period.

Average full-time equivalent staff	1,214	1,169	45	3.8 %

Total non-interest expense increased \$16.5 million or 7.6% to \$233.2 million during the year ended December 31, 2023, as compared to \$216.6 million for the comparative period in 2022, for reasons primarily associated with the acquisition of Valley Republic Bank in March of 2022 which resulted in expense increases for nearly every identified category. Merger and acquisition expenses associated with this acquisition totaled \$6.2 million for the twelve-month period ended 2022. The reasons for additional specific changes in various costs identified above, including data processing and professional fees are consistent with the discussions provided above for the most recent three months ended December 31, 2023 as compared with the trailing quarter ended September 30, 2023. Regulatory assessment charges also increased by approximately \$1.2 million during the year as a result of increases in assessment rates. Other miscellaneous expenses also increased by \$4.1 million in 2023 due to, among other things, changes in regulatory requirements which resulted in an estimated \$0.8 million in refunds to customers previously charged non-sufficient funds fees, changes in the valuation of other real estate owned which contributed to \$0.9 million in variance from the prior year, and other increases generally associated with increased operational costs.

### **Provision for Income Taxes**

The Company's effective tax rate was 28.4% and 27.0% for the quarter and year ended December 31, 2023, respectively, as compared to 27.3% for the period ended September 30, 2023, and 27.9% for the year ended December 31, 2022. Differences between the Company's effective tax rate and applicable federal and state blended statutory rate of approximately 29.6% are due to the proportion of non-taxable revenues, non-deductible expenses, and benefits from tax credits as compared to the levels of pre-tax earnings.

## **Forward-Looking Statements**

The statements contained herein that are not historical facts are forward-looking statements based on management's current expectations and beliefs concerning future developments and their potential effects on the Company. Such statements involve inherent risks and uncertainties, many of which are difficult to predict and are generally beyond our control. We caution readers that a number of important factors could cause actual results to differ materially from those expressed in, or implied or projected by, such forward-looking statements. These risks and uncertainties include, but are not limited to, the following: the conditions of the United States economy in general and the strength of the local economies in which we conduct operations; the impact of any future federal government shutdown and uncertainty regarding the federal government's debt limit or changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System; the impacts of inflation, interest rate, market and monetary fluctuations on the Company's business condition and financial operating results; the impact of changes in financial services industry policies, laws and regulations; regulatory restrictions affecting our ability to successfully market and price our products to consumers; the risks related to the development, implementation, use and management of emerging technologies, including artificial intelligence and machine learning; extreme weather, natural disasters and other catastrophic events that may or may not be caused by climate change and their effects on the Company's customers and the economic and business environments in which the Company operates; the impact of a slowing U.S. economy and decreases in housing and commercial real estate prices, potentially increased unemployment on the performance of our loan portfolio, the market value of our investment securities and possible other-than-temporary impairment of securities held by us due to changes in credit quality or rates; the availability of, and cost of, funding and the demand for our products; adverse developments with respect to U.S. or global economic conditions and other uncertainties, including the impact of supply chain disruptions, commodities prices, inflationary pressures and labor shortages on the economic recovery and our business; the impacts of international hostilities, wars, terrorism or geopolitical events; adverse developments in the financial services industry generally such as the recent bank failures and any related impact on depositor behavior or investor sentiment; risks related to the sufficiency of liquidity; the possibility that our recorded goodwill could become impaired, which may have an adverse impact on our earnings and capital; the costs or effects of mergers, acquisitions or dispositions we may make, as well as whether we are able to obtain any required governmental approvals in connection with any such activities, or identify and complete favorable transactions in the future, and/or realize the anticipated financial and business benefits; the regulatory and financial impacts associated with exceeding \$10 billion in total assets; the negative impact on our reputation and profitability in the event customers experience economic harm or in the event that regulatory violations are identified; the ability to execute our business plan in new markets; the future operating or financial performance of the Company, including our outlook for future growth and changes in the level and direction of our nonperforming assets and charge-offs; the appropriateness of the allowance for credit losses, including the assumptions made under our current expected credit losses model; any deterioration in values of California real estate, both residential and commercial; the effectiveness of the Company's asset management activities managing the mix of earning assets and in improving, resolving or liquidating lower-quality assets; the effect of changes in the financial performance and/or condition of our borrowers; changes in accounting standards and practices; changes in consumer spending, borrowing and savings habits; our ability to attract and maintain deposits and other sources of liquidity; the effects of changes in the level or cost of checking or savings account deposits on our funding costs and net interest margin; increasing noninterest expense and its impact on our financial performance; competition and innovation with respect to financial products and services by banks, financial institutions and non-traditional competitors including retail businesses and technology companies; the challenges of attracting, integrating and retaining key employees; the vulnerability of the Company's operational or security systems or infrastructure, the systems of third-party vendors or other service providers with whom the Company contracts, and the Company's customers to unauthorized access, computer viruses, phishing schemes, spam attacks, human error, natural disasters, power loss and data/security breaches and the cost to defend against and respond to such incidents; the impact of the recent cyber security ransomware incident on our operations and reputation; increased data security risks due to work from home arrangements and email vulnerability; failure to safeguard personal information, and any resulting litigation; the effect of a fall in stock market prices on our brokerage and wealth management businesses; the transition from the LIBOR to new interest rate benchmarks; the emergence or continuation of widespread health emergencies or pandemics; the costs and effects of litigation and of unexpected or adverse outcomes in such litigation; and our ability to manage the risks involved in the foregoing. There can be no assurance that future developments affecting us will be the same as those anticipated by management. Additional factors that could cause results to differ materially from those described above can be found in our Annual Report on Form 10-K for the year ended December 31, 2022, which has been filed with the Securities and Exchange Commission (the "SEC") and all subsequent filings with the SEC under Sections 13(a), 13(c), 14, and 15(d) of the Securities Act of 1934, as amended. Such filings are also available in the "Investor Relations" section of our website, <https://www.tcbk.com/investor-relations> and in other documents we file with the SEC. Annualized, pro forma, projections and estimates are not forecasts and may not reflect actual results. We undertake no obligation (and expressly disclaim any such obligation) to update or alter our forward-looking statements, whether as a result of new information, future events, or otherwise, except as required by law.

**TRICO BANCSHARES—NON-GAAP FINANCIAL MEASURES**  
(Unaudited. Dollars in thousands)

In addition to results presented in accordance with generally accepted accounting principles in the United States of America (GAAP), this press release contains certain non-GAAP financial measures. Management has presented these non-GAAP financial measures in this press release because it believes that they provide useful and comparative information to assess trends in the Company's core operations reflected in the current quarter's results and facilitate the comparison of our performance with the performance of our peers. However, these non-GAAP financial measures are supplemental and are not a substitute for any analysis based on GAAP. Where applicable, comparable earnings information using GAAP financial measures is also presented. Because not all companies use the same calculations, our presentation may not be comparable to other similarly titled measures as calculated by other companies. For a reconciliation of these non-GAAP financial measures, see the tables below:
